Subject: Delaware's Coastal Zone VS a data center (project Washington)
Date: Thursday, January 8, 2026 8:37:29 AM

- Project Washington breaks the rules of Delaware's Coastal Zone.
- Data centers don't manufacture anything.
- 250 diesel generators poison the air.
- The grid can't handle it.
- Rising seas will swallow it.
- The law demands zero harm.

Project Washington's energy drain, water use, diesel emissions and industrial noise would break the law of Delaware's Coastal Zone, by creating harm. Do NOT allow it!
