To the people who swore to be our voices and representatives,

As a Delaware resident I vehemently opposed this data center in Delaware City.

There are no net positives.

The impact on the environment will not be impactful to both humans and animals alike. There are multiple endangered species existing in that area. There will be an extreme increase in pollutants in the air, water and surrounding areas.

There will be extreme light pollution. It will increase residents' risks of cancer, miscarriages and many other negatively impactful side effects greatly.

The electricity needs will be a problem for the county and state. Delaware does not produce any electricity now and depends far too much on outside vendors which is costly.

Furthermore this data center will not produce nearly enough well paying jobs to offset the problems mentioned above.

Please do not allow this project to move forward.

Your voter,
Briana L [REDACTED]
