Subject: Starwood Data Center
Date: Thursday, December 11, 2025 4:41:58 PM

I'm a resident of [REDACTED] and I'm requesting that there be a public hearing regarding the proposed building of the Starwood data center. The data center would undoubtedly be detrimental to residents, it has been proven in other states that have data centers that it puts a major strain on the water supply. There has been extensive research on the negative impact data centers have on the water supply, they can use up to 5 million gallons a day, the equivalent of 10,000 to 50,000 people. They threaten freshwater supplies, only .05 percent of freshwater on earth is safe for human consumption and natural sources of water in the US like lakes and rivers are shrinking as it is. Communities near data centers get very little water, if at all, leaving residents unable to bathe, flush their toilets, and what water they do get is brown and undrinkable. There are countless studies done and interviews with residents living near data centers that prove their undeniable negative impact on natural resources and residents. Please do not allow this to be built here and hold a public hearing.

Thank you
