To Whom it may concern, as a life long New Castle County resident I vehemently opposed to this data center in Delaware City. There are no net positives. The impact on the environment will not be good to say the least. The electricity needs will be a problem for the County and state. Delaware does not produce any electricity now and depend far too much on outside vendors which is costly. Furthermore this data center will not produce nearly enough well paying jobs to offset the problems mentioned above.

Please do not allow this project to move forward.

Regards,
