**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

There has been no positive outcome or benefit from any of the data centers created anywhere in the country. The amount of energy, water, and infrastructure required for these things overwhelms and seriously and permanently damages the environment and quality of life in the area – not just that immediate geographic location. New Castle County does not need this. There are no net positives. The electricity needs will be a problem for the county and the state. Delaware already depends far too much on outside power vendors. Furthermore, this data center will not produce the number of well-paying jobs that its advocates claim. (No surprise there.)

Take a long, hard look at the disasters the data centers elsewhere are causing and put New Castle County and Delaware as a whole foremost in your decision making. Deny this application.

Thank you
