**Flag Status:** Flagged

Absolutely no to any data centers in our fragile environment! We cannot afford the increase in utility costs we are already seeing in the state. We cannot afford more corporate environmental disasters in our state. Look at all the places they have put these database centers, massive pollution of every kind. Not to mention the tax on our water and electrical resources.

As a resident of Delaware [REDACTED] an Eastern Shore native, I implore you to stop this nightmare before it begins.

Thoughtfully,

Natalie H [REDACTED]
