Subject: Data center proposal for Delaware

Follow Up Flag: Follow up
Flag Status: Flagged

Hello,

I am opposed to the proposal for building a data center in Delaware City due to the excess resource usage that the multiple building center will require from the Delaware community....water usage, electricity draw as well as property necessary for this project.

Please do not approve this request to build a data center in any part of Delaware state.

thank you for your attention to this matter.
