Good morning, i do have some concerns regarding the data sites.

1. How will the data centers affect the environment.

2. How will it affect the price of residential electricity.

3. Will the Data centers pay for their electricity usage and will this be apart of the proposal as well as the water usage.

4. No increases for electricty or water usage should be added to the residents bills of this county.

5. The residents of this community should not have pay anything. In regards to the data centers.
