Subject: PLEASE, NO DATA CENTERS
Date: Saturday, December 20, 2025 1:00:57 PM

I am opposed to any and all data center proposals in the state of Delaware. The amount of electricity they use will cause local rates to go up. The amount of water they use is absolutely sickening. Water is a finite resource and these data centers are a threat to that supply long term, and will raise prices short term. They also produce huge amounts of carbon emissions which is very bad for our environment. Noise pollution is another negative. Please, do not allow any data centers in Delaware, in any way, shape or form. Please.

Sincerely,
Bill G [REDACTED]
