Hello:

I live in New Castle County in the suburbs of Newark. I am against the data center being proposed near Delaware City. In addition, there is a proposal to build a data center near Rt. 273, Newark which I am totally against. As a resident of New Castle County, these data centers will need the energy of electric and water. The funding of these will eventually come from my already increasingly high electric and water utility bills.

The data centers will add noise and air pollution to the already polluted and high cancer area. I would think we should try to decrease not increase pollution in Delaware.

Why are these data centers being proposed and by whom? Who is benefiting from them? Who will fund them?

I know that as a resident, these data centers will harm me financially and physically. This does not benefit me.

A survey should have gone out asking the public if they want these data centers before a proposal was made.

Thank- you for time and consideration.

A concerned citizen,

Laura H [REDACTED]
