Driver Training

To safely operate a commercial motor vehicle a driver must possess core knowledge and skills, often referred to as competencies.

To ensure proper training and competency from drivers.

With new or existing drivers we ensure the driver is competent by training then in a method to improve a driver's competency.

The following are the training provided to our drivers: Aziz & Son Transport LLC

- Typically around 8 to 16 hours of initial training before they begin transporting loads for a new company. The length and type of training is dependent on their individual knowledge and skills as well as the uniqueness of your operations. A driver orientation checklist should be created to guide the process and document each topic covered. Topics include :
- A review of your organization's general policies, procedures, and rules as well as your organization's commitment to safety and consequences for unsafe operation.
- Safety procedures, which are unique to your operations or customer requirements (e.g., load securement and protection, temperature monitoring, security measures, personal protective equipment, etc.)
- General defensive driving techniques including speed and space management, backing, lane changes, driver attention, fatigue management, etc.
- Specific skills and knowledge the driver is lacking that are identified during the hiring process
- Regulatory required training such as HAZMAT
- SPILL CONTROL, PLAN, etc.

Periodic – All Driver Training (Safety Meetings)

Policies, procedures, and regulations changes throughout the year. Drivers can develop bad habits, which lead to unsafe driving or inadequate compliance with regulations. Drivers need periodic training throughout the year to ensure their knowledge and skills remain adequate. In the trucking industry periodic training is typically conducted in one-on-one- session due to the difficulty to getting all drivers together at once or in-group safety meetings. The frequency of periodic training is dependent on many factors, but two to three meetings a year is typical unless a critical issue requires immediate training,

Typical topics for periodic, all-driver training include:

- New Regulations, policies, and producers.
- Organization accidents, injuries, or other claims. Discussion of trends and corrective measures
- Organization FMCSA SMS BASIC score and violations. Discussion of trends and corrective actions needed
- A defensive driving topic.
- Regulatory required training such as HAZMAT
- SPILL CONTROL PLAN
