HAZARDOUS WASTE TRANSPORTER PERMIT APPLICATION

Instructions: You must complete this application in its entirety and attach all applicable documentation.

(Note: For applicants renewing an existing permit, this application requires the submission of updated information and documentation.)

The application must be signed by the company owner or a corporate officer. A check payable to the "State of Delaware" must accompany this application.

Delaware Department of Natural Resources and Environmental Control
Compliance and Permitting Section
89 Kings Highway
Dover, DE 19901

1. Type of Permit

☐ New – Submit a check or money order, payable to the "State of Delaware," in the amount of \$350.00.

☒ Renewal: Permit # DE-HW- 0611 _____ Expiration Date 06/30/2025 _____

Please indicate the term for which you desire your permit to be issued. Submit a check or money order, payable to the "State of Delaware," for the indicated permit fee.

☐ One Year - \$350.00

☐ Two Years - \$650.00

☐ Three Years - \$950.00

☐ Four Years - \$1250.00

☒ Five Years - \$1550.00

2. Release to Public:

Do you wish to be included on the list of transporters that is provided to persons requesting a list of Delaware permitted hazardous waste transporters? ☒ Yes ☐ No

3. Company Information:

Company Name: WRS Environmental Services, Inc. dba Champion Environmental Services

Location Address:	Mailing Address:
65 Corporate Drive Holtsville, NY 11742	65 Corporate Drive, Holtsville NY 11742
34 Edgeboro Road, East Brunswick, NJ 08816	65 Corporate Drive, Holtsville, NY 11742

Contact Person: Courtney Lampasona Title: Director of Human Resources

Business Phone: 631-924-8111 Fax: N/A

E-mail: clampasona@championssc.com 24 hr. Emergency Phone: 631-924-8111

EPA Identification Number: NYR000188490

Employer's Federal Tax ID Number: 26-0335675

4. Type of Company: (Check One)

- ☐ Proprietorship
☐ Partnership
☒ Corporation – City, State and Date of Incorporation: Albany, NY - 4/09/2007
☐ Municipality
☐ Public Institution
☐ Other – Explanation: _____

5. Parent Company Information:

Parent Company Name: Champion Painting Specialty Services
Parent Company Address: 130 SW 22nd Street
Ft. Lauderdale, FL 33315

6. Ownership/Stockholder Information:

For each owner, partner, or corporate officer, list the name, title, home address, and date of birth.

☒ List of owners, partners, or corporate officers: Attachment A

List the name and address of all stockholders owning greater than 5% outstanding shares.

- ☒ List of stockholders: Attachment A
☐ Not Applicable

7. Company Affiliations:

List all other companies owned by the same owners, corporate officers, or parent company that are engaged in the business of solid or hazardous waste transportation, treatment, storage, disposal, recovery, or reclamation.

- ☒ List of company affiliates: Attachment B
☐ No company affiliates

8. Type of Hazardous Waste to be Transported:

Indicate the waste types to be transported. (Note: Characteristic and listed hazardous wastes identified in Delaware's *Regulations Governing Hazardous Waste* (DRGHW) Part 261 are equivalent to RCRA 40 CFR Part 261 wastes.) Check all that apply.

- ☐ Part 261 characteristic or listed hazardous wastes
☒ Used or waste oils (as defined by Part 279, Used Oil Management Standards)
☐ Spent antifreeze exhibiting a characteristic of hazardous waste
☐ PCB-contaminated hazardous waste
☐ Spent fluorescent lighting tubes and ballasts when managed as non-universal waste

9. Treatment, Storage, and Disposal Facilities:

List all treatment, storage, and disposal facilities that have agreed to accept the hazardous wastes identified above.

- ☒ List of treatment, storage, and disposal facilities: Attachment C

10. Other Transporter Permits:

List all hazardous waste transporter permits held in other states.

- ☒ List of transporter permits: Attachment D
☐ No hazardous waste transporter permits held in other states

11. Federal DOT and Motor Carrier Numbers:

Indicate your Federal DOT number and Motor Carrier number:

DOT# 2103740 MC# _____

12. Proof of Insurance:

The transporter identified in this application must meet or exceed minimum insurance requirements as set forth in DOT Title 49 CFR Part 387. The DNREC Compliance and Permitting Section must be identified as the certificate holder. Also include a current MCS-90 endorsement or affirmation that the endorsement is still in effect.

- ☒ Certificate of insurance and MCS-90: Attachment E

13. Spill Control and Safety Equipment:

List all spill control and safety equipment that will be carried on each vehicle.

☒ List of spill control and safety equipment: Attachment F

14. Spill Control Plan:

Attach a copy of the Spill Control Plan that describes prevention, containment, and clean up procedures during transportation. The plan must demonstrate compliance with the requirements outlined in DRGHW Sections 263.30, 263.31, and 263.105. **Spill Control Plans must contain the following Delaware Emergency Reporting Telephone Numbers: 1-800-662-8802 and 302-739-9401.**

☒ Spill Control Plan: Attachment G

15. Driver Training:

Attach a copy of your driver training program. All drivers must be trained in current DOT Motor Carrier Safety Regulations and have knowledge of the proper handling procedures for the type of waste transported, the hazardous waste manifest system, and safe vehicle operation as provided in 49 CFR Parts 383, 390 – 399, and DRGHW Section 263.104. All drivers must be familiar with the approved Spill Control Plan.

☒ Driver Training Program: Attachment H

16. Controlled Substance Testing:

Do you maintain a controlled substance testing program for drivers in your employment (including contract drivers) in compliance with Federal DOT 49 CFR Part 391?

☒ Yes

☐ No, Explain:

--

17. Vehicle Identification Information:

List all vehicles to be used for the transportation of hazardous waste into, out of, or through Delaware. You may use the form provided or another printout that contains all required information.

☒ Vehicle Identification Information: Attachment I

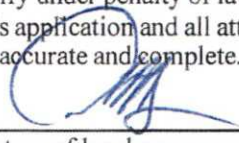

18. Environmental Record:

List all criminal citations, arrests or convictions, civil or administrative violations, and civil or administrative enforcement actions, and the disposition(s) thereof for the violation or alleged violation of any environmental statute, regulation, permit, license, approval, or order, regardless of the state in which it occurred. Indicate whether it was a local, state, or federal violation or alleged violation. List all such items for the applicant, and if the applicant is other than an individual, for any employee while employed by the applicant or any partner, officer, or director of the applicant as an individual or for any other former business of such partner, officer, or director. For civil or administrative violations or alleged violations, list all such items for the last five (5) years from the date of application.

- ☐ Environmental Record: Attachment _____
☒ Not Applicable – No violations within the specified time period

19. Signature:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attachments, and that upon personal knowledge and information, the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information.

**Endorsement for Motor Carrier Policies of Insurance for Public Liability
under Sections 29 and 30 of the Motor Carrier Act of 1980**

FORM MCS-90

Issued to WRS Environmental Services Inc dba Champion Environmental Services of New York
(Motor Carrier name) (Motor Carrier state or province)

Dated at 10:00 AM on this 29th day of May, 2024

Amending Policy Number: 5721631 Effective Date: 06/01/2024

Name of Insurance Company: National Union Fire Insurance Company of Pittsburgh, PA

Countersigned by: Don Bailey
(authorized company representative)

The policy to which this endorsement is attached provides primary or excess insurance, as indicated for the limits shown (check only one):

- ☒ This insurance is primary and the company shall not be liable for amounts in excess of \$ 5,000,000.00 for each accident.
- ☐ This insurance is excess and the company shall not be liable for amounts in excess of \$ _____ for each accident in excess of the underlying limit of \$ _____ for each accident.

Whenever required by the Federal Motor Carrier Safety Administration (FMCSA), the company agrees to furnish the FMCSA a duplicate of said policy and all its endorsements. The company also agrees, upon telephone request by an authorized representative of the FMCSA, to verify that the policy is in force as of a particular date. The telephone number to call is: 913-495-4065

Cancellation of this endorsement may be effected by the company or the insured by giving (1) thirty-five (35) days notice in writing to the other party (said 35 days notice to commence from the date the notice is mailed, proof of mailing shall be sufficient proof of notice), and (2) if the insured is subject to the FMCSA's registration requirements under 49 U.S.C. 13901, by providing thirty (30) days notice to the FMCSA (said 30 days notice to commence from the date the notice is received by the FMCSA at its office in Washington, DC).

Fillings must be transmitted online via the Internet at <http://www.fmcsa.dot.gov/urs>.

(continued on next page)

DEFINITIONS AS USED IN THIS ENDORSEMENT

Accident includes continuous or repeated exposure to conditions or which results in bodily injury, property damage, or environmental damage which the insured neither expected nor intended.

Motor Vehicle means a land vehicle, machine, truck, tractor, trailer, or semitrailer propelled or drawn by mechanical power and used on a highway for transporting property, or any combination thereof.

Bodily Injury means injury to the body, sickness, or disease to any person, including death resulting from any of these.

Property Damage means damage to or loss of use of tangible property.

Environmental Restoration means restitution for the loss, damage, or destruction of natural resources arising out of the accidental discharge, dispersal, release or escape into or upon the land, atmosphere, watercourse, or body of water, of any commodity transported by a motor carrier. This shall include the cost of removal and the cost of necessary measures taken to minimize or mitigate damage to human health, the natural environment, fish, shellfish, and wildlife.

Public Liability means liability for bodily injury, property damage, and environmental restoration.

The insurance policy to which this endorsement is attached provides automobile liability insurance and is amended to assure compliance by the insured, within the limits stated herein, as a motor carrier of property, with Sections 29 and 30 of the Motor Carrier Act of 1980 and the rules and regulations of the Federal Motor Carrier Safety Administration (FMCSA).

In consideration of the premium stated in the policy to which this endorsement is attached, the insurer (the company) agrees to pay, within the limits of liability described herein, any final judgment recovered against the insured for public liability resulting from negligence in the operation, maintenance or use of motor vehicles subject to the financial responsibility requirements of Sections 29 and 30 of the Motor Carrier Act of 1980 regardless of whether or not each motor vehicle is specifically described in the policy and whether or not such negligence occurs on any route or in any territory authorized to be served by the insured or elsewhere. Such insurance as is afforded, for public liability, does not apply to injury to or death of the insured's employees while engaged in the course of their employment, or property transported by the insured, designated as cargo. It is understood and agreed that no condition, provision, stipulation, or limitation contained in the policy, this endorsement, or any other endorsement thereon,

or violation thereof, shall relieve the company from liability or from the payment of any final judgment, within the limits of liability herein described, irrespective of the financial condition, insolvency or bankruptcy of the insured. However, all terms, conditions, and limitations in the policy to which the endorsement is attached shall remain in full force and effect as binding between the insured and the company. The insured agrees to reimburse the company for any payment made by the company on account of any accident, claim, or suit involving a breach of the terms of the policy, and for any payment that the company would not have been obligated to make under the provisions of the policy except for the agreement contained in this endorsement.

It is further understood and agreed that, upon failure of the company to pay any final judgment recovered against the insured as provided herein, the judgment creditor may maintain an action in any court of competent jurisdiction against the company to compel such payment.

The limits of the company's liability for the amounts prescribed in this endorsement apply separately to each accident and any payment under the policy because of anyone accident shall not operate to reduce the liability of the company for the payment of final judgments resulting from any other accident.

(continued on next page)

SCHEDULE OF LIMITS — PUBLIC LIABILITY

Type of carriage	Commodity transported	January 1, 1985
(1) For-hire (in interstate or foreign commerce, with a gross vehicle weight rating of 10,001 or more pounds).	Property (nonhazardous)	\$750,000
(2) For-hire and Private (in interstate, foreign, or intrastate commerce, with a gross vehicle weight rating of 10,001 or more pounds).	Hazardous substances, as defined in 49 CFR 171.8 , transported in cargo tanks, portable tanks, or hopper-type vehicles with capacities in excess of 3,500 water gallons; or in bulk Division 1.1, 1.2, and 1.3 materials, Division 2.3, Hazard Zone A, or Division 6.1, Packing Group I, Hazard Zone A material; in bulk Division 2.1 or 2.2; or highway route controlled quantities of a Class 7 material, as defined in 49 CFR 173.403 .	\$5,000,000
(3) For-hire and Private (in interstate or foreign commerce, in any quantity; or in intrastate commerce, in bulk only; with a gross vehicle weight rating of 10,001 or more pounds).	Oil listed in 49 CFR 172.101 ; hazardous waste, hazardous materials, and hazardous substances defined in 49 CFR 171.8 and listed in 49 CFR 172.101 , but not mentioned in (2) above or (4) below.	\$1,000,000
(4) For-hire and Private (In interstate or foreign commerce, with a gross vehicle weight rating of less than 10,001 pounds).	Any quantity of Division 1.1, 1.2, or 1.3 material; any quantity of a Division 2.3, Hazard Zone A, or Division 6.1, Packing Group I, Hazard Zone A material; or highway route controlled quantities of a Class 7 material as defined in 49 CFR 173.403 .	\$5,000,000

*The schedule of limits shown does not provide coverage. The limits shown in the schedule are for information purposes only.

Attachment F
Spill Control & Safety Equipment

WRS Environmental Services, Inc. is in possession of the latest DOT Emergency Response Guidebook and that book is carried in all vehicles transporting hazardous waste.

All WRSES Trucks carry:

Safety Glasses	Ear Plugs	Tyvek Suits
Hard Hats	Safety Vests	First Aid Kit
Flashlights	Cellular Phones	Eyewash
Spare Bulbs	Spare Fuses	
Fire Extinguishers	Hazardous Waste Handbook	
Cotton Gloves	Rubber Gloves	
Latex Gloves	Sample Jars	
Road Triangles	Flag	

Tankers/Guzzlers Spill Kits

Sausage Boom
Oil Pads
Speedy Dri
Garbage Bags
PCB Test Kits

Spill Response Trucks (Box Trucks)

Speedy Dri	Degreaser
55 gal. Drums with Liners	Rakes
Drum Plug Kits	Ladders
85 gal Overpack Drums	Hand Tools
Sausage Boom	Confined Space Equipment
Transfer Pump	Sorbent Pads
Brooms	Generator
Shovels	Suits, boots, gloves
PCB Test Kits	FIRE EXTINGUISHER
OIL PADS	FUEL CAN
POWER WASHER	LIGHTS
FIRST AID KIT	TRAFFIC CONES
EYE WASH

SPCC PLAN OUTLINE (WRSES REQUIREMENTS)

- **1.A. - Site Information:** Identify general site or vehicle information useful in planning, recognizing potential sources of spills, and identifying personnel responsible for managing and implementing the plan.
- **1.B. - Site or Vehicle Description:** Identify staging, storage, maintenance, and refueling areas and their relationship to drainage pathways, waterways, and other sensitive areas. Specifically address:
 - Equipment maintenance, refueling, cleaning activities and;
 - On site storage areas for hazardous materials.
- **1.C. - Spill Prevention and Containment:** Identify spill prevention and containment methods to be used at each site locations and vehicles.
- **1.D. - Spill Response:** Outline spill response procedures including assessment of the hazard, securing spill response and personal protective equipment, containing and eliminating the spill source, and mitigation, removal and disposal of the material.
- **1.E. - Standby, On-Site Material and Equipment:** The plan shall identify the equipment and materials maintain on site/vehicles to carry out the preventive and responsive measures for the items listed.
- **1.F. – Reporting:** The plan shall list all federal, state and local agencies telephone numbers that the Contractor must notify in the event of a spill.
- **1.G. - Program Management:** Identify site security measures, inspection procedures and personnel training procedures as they relate to spill prevention, containment, response, management and cleanup.
- **1.H. - Pre-existing Contamination:** If pre-existing contamination in the project area is described elsewhere in the plans or specifications, the SPCC plan shall indicate measures the Contractor will take to conduct work without allowing release or further spreading of the materials.
- **2.A. – Attachment:** Site plan showing the locations of spill, containment area and identified location of spill response material and equipment.
- **2.B. – Attachment:** Spill and Incident Report Forms, if any, that will be used.

INTRODUCTION

This Spill Prevention Control and Countermeasure (SPCC) Plan has been prepared by **WRS Environmental Services, Inc.** to satisfy federal, state and local standard regulatory requirements. This SPCC plan shall be modified to reflect site specific conditions and outline the project scope of work (including equipment, materials, and activities) and presents a comprehensive plan to prevent, respond to, and report spills or releases to the environment. The SPCC plan shall be updated as project work progresses or site activities change. An updated copy of this SPCC plan will be maintained at the project site.

SITE INFORMATION

This SPCC plan was developed for instructional and reference purpose to assist employees prevent, responding to and reporting spills as required by DOT, federal, state and local regulatory agencies. WRS Environmental Services, Inc. is a full service environmental company specializing in emergency spill response, control and countermeasures for various clients within the Tri-State area. Primary purpose of this plan is to assist, guide and educate all involved parties with the necessary tools to prevent, respond and handle an environmental spill.

General Site Information

WRS Environmental Services, Inc. (WRSES) manages a fleet of tankers and vacuum trucks to accept third-party waste as well as spill clean up. Vehicles are designated to handle various waste streams depending on the type and size of the spill. Each vehicle is equipped with an emergency spill control kit, inflatable berm and spill response instructions with emergency contact numbers. A number of advanced response mechanisms are available for controlling spills and minimizing their impacts on human health and the environment. The key to effectively combating spills is careful selection and proper use of the equipment and materials best suited to the type of oil/chemical and the conditions at the spill site.

Sensitive Areas/Receptors

Controlling spills from entering sensitive areas such as; floor drains, shorelines, wetlands, and from flammable chemicals.

Potential Spill Sources

Spill sources are generally divided into three (3) categories: radioactive, biological and chemical.

Radioactive Spills:

General guide for radioactive spills

- Restricting movement of all personnel is essential. Movement of people around a radiation spill can spread radiation beyond spill area
- Consider persons in area contaminated until monitoring proves otherwise
- Dispose of cleanup materials as radioactive waste
- Report all spills to supervisor

Simple spills

<10 uCi activity and
<1-liter volume

- Alert people in the area
- Don protective equipment
- Place absorbent pad over liquid spills, damp absorbent pad over solid spills
- Clean with normal lab cleaning agents, working from spill outer edge inward
- Monitor area and personnel
- Repeat cleanup until no contamination is detected
- Notify Hazardous Material Operation Supervisor (HOS).

Major spills

>10 uCi activity or
>1-liter volume

- Evacuate area
- Have potentially contaminated people stay in one area until they have been monitored and shown to be free of contamination
- Prevent entrance into area
- Call HOS before proceeding with cleanup, after hours call Emergency Response Number.

Biological Spills:

General guide for biological spills

- Spills outside a biological safety cabinet (BSC) generate aerosols, creating a greater hazard than spills inside a BSC
- Keep cleanup materials inside BSC (removing hands from inside cabinet disperses aerosols outside cabinet)
- Leave BSC running during cleanup and at least 10 minutes after completion
- Wash hands/face before and after cleanup
- Don fresh pair of disposable gloves before starting cleanup

- A 1 to 10 biocide solution is commonly used as a disinfectant; allow 20 minutes contact time, work cautiously and thoroughly, repeat three (3) times and HEPA vacuum with each cleaning.
- Dispose of cleanup materials as biohazard waste, autoclave before removal from area
- Report all spills to HOS.

Spills inside a BSC

- use clean cloth and disinfectant solution to wash interior surfaces
- for moderate to high risk spills, flood catch basins

Spill outside BSC

The spilled organism's class determines cleanup method and level of containment (class 1=BL1).

BL1 containment required

- Decontaminate with disinfectant
- Clean up with disposable towels and disinfectant

BL2 containment required

- Alert people in spill area
- Evacuate for 30 minutes
- Notify HOS
- Wear gloves, lab coat, goggles, and shoe covers (if necessary) to:
 - Isolate spill area
 - Apply absorbent to prevent spreading
 - Pour disinfectant around spill edges
 - Cover with disinfectant-soaked paper towels
 - Work from edges inward
 - Clean area again with disinfectant

BL3 containment required

- Hold your breath and evacuate immediately
- Close all doors
- Notify supervisor and HOS immediately
- HOS will direct cleanup. Respiratory protection required

Chemical Spills:

General guide for chemical spills

- Determine identity
- Consult MSDS
- Avoid breathing vapors, get as much fresh air into area as you can safely
- Absorbents and neutralizing agents must be compatible with chemical spilled
- Prevent spilled chemicals from going down drains (public water supply)
- Dispose of cleanup materials as chemical hazardous waste, small volumes of dilute acids and bases may be neutralized (pH 6-8) and discharge into sanitary sewer
- Call HOS for hazardous waste pickup, or guidance on cleanup or air monitoring

Simple spills--liquid

- Alert people in area
- Wear protective equipment
- Contain with appropriate absorbent
- Flammable--remove ignition sources (burners, motors, anything that could cause a spark), use plastic or nonmetallic cleanup equipment
- Absorb or neutralize with appropriate agent working from outside edges inward, sorbent do not remove toxic or flammable hazards, neutralization can produce heat causing boiling and splattering
 - Acid--sodium bicarbonate or acid spill kit
 - Base--sodium bisulfate, citric acid, or base spill kit
 - Formaldehyde--absorb or use polymerizer

Simple spills--dry

- If not water reactive, dampen to prevent airborne dust
- Control water reactive dust with sweeping compound

- Carefully brush solids into a dust pan or container
- Keep dust generation down to prevent creating inhalation hazard

Compressed gas leak--simple

- Presents no inhalation hazard
- Restrict access
- Place in fume hood if possible, tighten fittings
- Locate leak with soapy water (at below freezing temperatures use 50% glycerin solution)
- If cylinder still leaks, contact supplier

Compressed gas leak--major

- Large or uncontrollable leak or fire hazard
- Evacuate, ventilate affected area
- Call 911
- Contact supplier

Mercury

- Large or heated spills can be an inhalation hazard
- Isolate area to prevent tracking
- Wear gloves and shoe covers (if on floor)
- Consolidate and collect droplets using scraper, cardboard, wet paper towel, aspirator bulb, tape or special sponge from Biochemical Store
- Place all waste in sealed container

Major spills

Evacuate, call 911, and wait for responders

Contractor Personnel

The (**WRSES**) designated person responsible for managing, implementing, and maintaining this SPCC plan is Patrick McLoughlin.

Project phone numbers are as follows:

Patrick McLoughlin, Operations Director
William Cullen
Joe Robinson

PROJECT SITE DESCRIPTION

This SPCC Plan applies to all jobsites and vehicles responding to spill clean up assignments.

STANDBY, ON-SITE MATERIAL AND EQUIPMENT

WRS Environmental Services, Inc. (WRSES) manages a fleet of tankers and vacuum trucks to accept third-party waste as well as spill clean up. Vehicles are designated to handle various waste streams depending on the type and size of the spill. Each vehicle is equipped with an emergency spill control kit, portable berm and spill response instructions with emergency contact number. A number of advanced response mechanisms are available for controlling spills and minimizing their impacts on human health and the environment. The key to effectively combating spills is careful selection and proper use of the equipment and materials best suited to the type of oil/chemical and the conditions at the spill site.

Spill Response Equipment Brought On-Site

Recommended Spill Control Material Inventory

Your jobsite work area and vehicle should have sufficient quantities of absorbents or other types of materials to control any spill that can be reasonably anticipated. Sawdust, lined 5-gallon pails and limited spill control materials shall be available in emergency spill response kits, including PPE. Additional materials may be order by contacting the HOS.

Personal Protective Equipment

- 2 pairs chemical splash goggles
- 2 pairs of gloves (recommend Silver Shield or 4H)
- 2 pairs of shoe covers
- 2 plastic or Tyvek aprons and/or Tyvek suits

Absorption Materials

- 4 3M POWERSORB spill pillows (or equivalent)
- 1 3M POWERSORB spill sock
- 2 DOT pails (5 gallon) with polyethylene liners
 - 1 filled with loose absorbent, such as sawdust or clay
 - 1 with minimum amount of loose absorbent in the bottom

Neutralizing Materials

- Acid Neutralizer
- Caustic Neutralizer
 - Commercial neutralizers, such as Neutrasorb (for acids) and Neutrakit-2 (for bases) have built in color change to indicate complete neutralization
- Solvent Neutralizer
 - Commercial solvent neutralizers, such as Solusorb, act to reduce vapors and raise the flashpoint of the mixture

Mercury Spills

- Small mercury vacuum to pick up large drops (optional)
- Hg Absorb Sponges - amalgamate mercury residue
- Hg Absorb Powder - amalgamates mercury
- Hg Vapor Absorbent - reduces concentration of vapor in hard to reach areas
- Mercury Indicator - powder identifies presence of mercury

Clean-up Tools

- Polypropylene scoop or dust pan
- Broom or brush with polypropylene bristles
- 2 polypropylene bags
- Sealing tape
- PH test papers
- Waste stickers
- Floor sign - **DANGER Chemical Spill - Keep Away**

Pre-existing Site Conditions

Document all pre-existing site conditions prior to commencing any spill remediation control. Written and photogenic documentation shall be obtained to depicted actual condition.

SPILL PREVENTION AND CONTAINMENT

Mechanical containment or recovery is the primary line of defense against oil spills in the United States. Containment and recovery equipment includes a variety of booms, barriers, and skimmers, as well as natural and synthetic sorbent materials.

Spill Prevention and Containment Methods

Mechanical containment is used to capture and store the spilled material unit it can be disposed of properly. Chemical and biological methods can be used in conjunction with mechanical means for containing and cleaning up oil spills. Dispersants and gelling agents are most useful in helping to keep oil from reaching shorelines and other sensitive areas. Biological agents have the potential to assist recovery in sensitive areas as shorelines, marshes, wetlands, sewers, and floor drains.

SPILL RESPONSE

Response in the first ten to fifteen minutes is critical to minimize the impacts to human health and the environment and to minimize property damage and cleanup costs.

Chemical Spill Procedures

- Spill Response and Clean up Procedures
- Developing a Spill Response Plan
- Recommended Spill Control Materials Inventory

Spill Response and Clean-up Procedures

In the event of a chemical spill, the individual(s) who caused the spill is responsible for prompt and proper clean up. It is also their responsibility to have spill control and personal protective equipment appropriate for the chemicals being handled readily available. See Developing a Spill Response Plan for more information.

The following are general guidelines to be followed for a chemical spill. More detailed procedures may be available in your Departmental Chemical Hygiene Plan or Spill Response Plan.

1. Immediately alert area occupants and supervisor, and evacuate the area, if necessary.
2. If there is a fire or medical attention is needed, contact 911.
3. Attend to any people who may be contaminated. Contaminated clothing must be removed immediately and the skin flushed with water for no less than fifteen minutes. Clothing must be laundered before reuse. See First Aid for Chemical Exposures for more information.
4. If a volatile, flammable material is spilled, immediately warn everyone, control sources of ignition and ventilate the area.
5. Don personal protective equipment, as appropriate to the hazards. Refer to the Material Safety Data Sheet or other references for information.
6. Consider the need for respiratory protection. The use of a respirator or self-contained breathing apparatus requires specialized training and medical surveillance. Never enter a contaminated atmosphere without protection or use a respirator without training. If respiratory protection is needed and no trained personnel are available, call HOS at 631-924-8111. If respiratory protection is used, be sure there is another person outside the spill area in communication, in case of an emergency. If no one is available, contact emergency services @ 911.
7. Using the chart below, determine the extent and type of spill. If the spill is large, if there has been a release to the environment or if there is no one

knowledgeable about spill clean-up available, contact HOS at 631-924-8111 or 911.

Category	Size	Response	Treatment Materials
Small	up to 300cc	Chemical treatment or absorption	Neutralization or absorption spill kit
Medium	300 cc - 5 liters	absorption	Absorption spill kit
Large	more than 5 liters	Call HOS	Outside help

8. Protect floor drains or other means for environmental release. Spill socks and absorbents may be placed around drains, as needed.
9. Contain and clean up the spill according to the table above.
Loose spill control materials should be distributed over the entire spill area, working from the outside, circling to the inside. This reduces the chance of splash or spread of the spilled chemical. Bulk absorbents and many spill pillows do not work with hydrofluoric acid. POWERSORB (by 3M) products and their equivalent will handle hydrofluoric acid. Specialized hydrofluoric acid kits also are available. Many neutralizers for acids or bases have a color change indicator to show when neutralization is complete.
10. When spilled materials have been absorbed, use brush and scoop to place materials in an appropriate container. Polyethylene bags may be used for small spills. Five-gallon pails or 20-gallon drums with polyethylene liners may be appropriate for larger quantities.
11. Complete a hazardous waste sticker, identifying the material as Spill Debris involving XYZ Chemical, and affix onto the container. Spill control materials will probably need to be disposed of as hazardous waste. Contact HOS at 631-924-8111 for advice on storage and packaging for disposal.
12. Decontaminate the surface where the spill occurred using a mild detergent and water, when appropriate.
13. Report all spills to your HOS or the Principal Investigator.

Developing a Spill Response Plan

An effective spill response procedure should consider all of the items listed below. The complexity and detail of the plan will, of course depend upon the physical characteristics and volume of materials being handled, their potential toxicity, and the potential for releases to the environment.

1. Review Material Safety Data Sheets (MSDSs) or other references for recommended spill cleanup methods and materials, and the need for personal protective equipment (e.g., respirator, gloves, protective clothing, etc.)
2. Acquire sufficient quantities and types of appropriate spill control materials to contain any spills that can be reasonably anticipated. The need for equipment to disperse, collect and contain spill control materials (e.g., brushes, scoops, sealable containers, etc.) should also be reviewed. See Recommended Spill Control Materials Inventory for more details.
3. Acquire recommended personal protective equipment and training in its proper use. For example, if an air purifying respirator or self-contained breathing apparatus are needed, personnel must be enrolled in the Respiratory Protection Program and attend annual training and fit testing.
4. Place spill control materials and protective equipment in a readily accessible location within or immediately adjacent to the work area or vehicle.
5. Develop a spill response plan that includes:
 - Names and telephone numbers of individuals to be contacted in the event of a spill.
 - Evacuation plans for the room or building, as appropriate.
 - Instructions for containing the spilled material, including potential releases to the environment (e.g., protect floor drains).
 - Inventory of spill control materials and personal protective equipment.
 - Means for proper disposal of cleanup materials (in most cases, as hazardous waste) including contaminated tools and clothing.
 - Decontamination of the area following the cleanup.
6. Discuss the spill response plans with all employees in the area. EHS offers training for employees who work directly with chemicals (see Chemical Spills and Waste Procedures) and who are expected to respond outside their work area to assist with spill cleanup (see Chemical Emergency Response (HAZWOPER) First Responder - Operations Level Training).

REPORTING

WRS Environmental Services, Inc., personnel responsible for maintaining the SPCC plan is Patrick McLoughlin. He shall contact DOT project representatives and the federal, state and local regulatory agencies regarding spill response activities. He will work with the DOT project manager to ensure the proper information and data is collected and communicated to the appropriate agencies.

WRSES shall ensure that all personnel involved with preventing, responding and reporting spills are HAZWOPER trained.

Agency Notification Reference List Agency & Responsibilities Phone Contacts

Fire Department	911
Delaware Emergency Reporting	800.662.8802 302.739.9401
Hospital	
• Emergency Medical Room – Nearest to Site Location	
Waste Recycling Solutions	
– Emergency Response Team	631-924-8111
National Response Center	
• Reporting spills to water	(800) 424-8802 or 202.267.2675

Employees must contact the Generator whose name, address, phone number, and ID number can be found at the top of the hazardous waste manifest.

Notification is required for any amount of hazardous waste.

The National Response Center and Director of the Office of Hazardous Materials Regulation's, Materials Transportation Bureau, Department of Transportation, Washington D.C., must be notified of the following events:

1. A person is killed or requires hospitalization due to injuries;
2. Carrier or property damage exceeds \$50,000;
3. Accident and/or spill involves radioactive materials or etiological agents;
4. Notification caused by continued danger to life.

PROGRAM MANAGEMENT

Site security measures, site inspection procedures, and personnel training related to spill prevention, containment, response, management, and clean up are outlined below.

Security

WRSES personnel are given identification badge that are to be worn as part of the uniform requirement. Identification badges shall have an updated photograph of the employee.

Site Inspections

WRSES Environmental Health and Safety (EH&S) Division conducts random site and vehicle inspection to ensure compliance with SPCC plan. Quarterly reviews are conducted to update employees with new changes and regulatory updates.

Personnel training

WRSES site supervisor is responsible for overseeing site HAZWOPER training of all personnel and shall review procedures with crew semi-annually or whenever a new crewmember is added. Supervisor shall submit all documentation of employee training to the Hazardous Material Operations Supervisor (HOS) to be added to their files.

ATTACHMENT A SITE PLAN

WRSES site supervisor shall attach a copy of the site plan to this SPCC plan and review site-specific details with crew on site.

ATTACHMENT B SPILL AND INCIDENT REPORT FORMS

Instructions: Complete for any type of petroleum product or hazardous materials/waste spill or incident.

Provide a copy of this report to HOS management.

1. Person Reporting Spill or Incident:
Name Address
Organization

WRS ENVIRONMENTAL SERVICES, INC.

Title

Telephone

Fax Signature

2. Type of Spill:

Common Name of

Spilled Substance

Quantity Spilled (Estimate)

Concentration (Estimate)

Date of Spill ____/____/____

Time Spill Started ____ AM ____ PM Time Spill Ended ____ AM ____ PM

3. Location of Spill:

Attachment H
Driver Training

- A. Many of our employees have Commercial Driver's Licenses, both A and B classes. Some have tanker, hazmat, and double/triple endorsements.
- B. We conduct background screens on driving records as part of their initial employment as well as obtaining driving abstracts on an annual basis to check for any violations, accidents, revocations or suspensions. All CDL license holders are also put through the FMSCA Clearinghouse database. Any employees who receive driving violations during the course of their employment are disciplined according to our company disciplinary procedures.
- C. Drivers receive training on handling waste both on an annual basis during their hazardous waste refresher training class as well as the DOT Hazardous Materials training. A copy of the Spill Control Plan is required to be in all the vehicles along with any transporter permit that is required to be in the vehicle. Employees should be checking to make sure they have the appropriate permits and necessary equipment during their pre-trip inspections.

Attachment I
Vehicle Identification Information

Please see attached Vehicle Identification form.

VEHICLE INFORMATION - See Item 17 of the application.

Use this form, or other format which provides the same information, to answer the VEHICLE IDENTIFICATION requirement of the application. List all vehicles, both motorized and container (if a license plate is required on the container) to be used to haul solid waste in the state of Delaware. In addition, list the vehicle owner, owner's address, and domicile address if different from the company address provided in the application.
