Blair / Ivyland Construction

Preparedness, Prevention and Contingency Plan

I. Emergency Action

In the event of an on the road spill or other emergency, the driver will adhere to the following procedures:

1. Remain with the unit and warn all pedestrians and motorists to stay away from the spill area, pointing out to them the danger involved and have someone call the police or fire department.
2. Upon arrival of the police or fire department, the driver will inform them of what kind of material has been spilled and request the area to be blocked off to prevent property damage or personal injury.
3. The driver will request the first responder, fire or police personnel to protect the area while the driver reports to the Emergency Response Coordinator listed in Section VI.
4. The Emergency Response Coordinator will gather the information outlined in the emergency reporting section and relay it to the Emergency Response Agencies listed in Section VII.

II. Specific Actions to be taken at the scene of the spill

1. The primary concern is to prevent the escape of any hazardous substances into the ground or storm water or sanitary sewer. The driver should attempt the following procedures dependant upon the physical property of the waste:
 - a. Erect a barrier to prevent escape of spilled liquids. Put a bucket under any leaking pipe, valve or tank to catch leak. Clean up any spotting with absorbent and/or spill pillows. Create a vacuum in the tank trailer to keep material from leaking further.
 - b. Use tarp or plastic to contain solids in wet and windy conditions.
 - c. The source of the spill or leak in a drum should be located and controlled, e g. a drum plugged or taped, turned upside down or over-packed.
2. In the event of a major spill and there is a possibility of fire or generation of toxic fumes, the personnel should be evacuated to a distance of at least one 1/2 mile. If no fire threatens and no containers have ruptured, a distance of 50-100 feet should suffice.
3. Cleanup will be affected depending upon spill area. If the spill is on a paved surface, compatible absorbent material will be used. If the spillage has reached earth, all contaminated dirt will be collected. The extent of the contamination will be determined by laboratory analysis. All damaged drums will be over-packed to prevent further contamination. All contained material will be disposed of at an EPA approved disposal facility.

III. Decontamination

1. All vehicles will be decontaminated at the site, and then transported to an authorized facility for further decontamination.
2. Each item of equipment will be placed in an open head container and thoroughly rinsed with a compatible solvent or cleaning compound. The residue will then be drained into a tight head container, sealed and disposed of in accordance with Federal and State Regulations.
3. All contaminated clothing will be placed with the residue and disposed of accordingly. If clothing is reusable, then it will be decontaminated properly and the residue added to the other waste.

IV. Emergency Reporting

In the event of an emergency or a hazardous waste spill during transportation, the transporter's Emergency Response Coordinator will immediately notify the Environmental Protection Agency for the state where the incident occurs and the National Response Center with the following information:

1. Name of person reporting the incident;
2. Transporter's name, address and EPA identification number;
3. Phone number where the person reporting the incident can be reached:
 - a. At the location of the incident
 - b. Emergency Response Coordinator's phone number.
4. Date, time and location of the incident
5. Mode of transportation and type of transport vehicle (liquid tank truck, dump truck, box truck, etc.);
6. A brief description of the incident, including the type of incident
7. For each waste involved in a spill, the following information is required:
 - a. The name and EPA ID# of the generator of the waste
 - b. DOT shipping name, hazardous class and UN number of the waste
 - c. Estimated quantity of the waste spilled
 - d. The extent of the contamination of the land and/or water and/or air
8. Shipping name, hazard class and the UN or N.A. number of any other material carried (this concerns mixed shipments of drums)
9. Extent of any injuries, if any

The transporter will also immediately notify the affected municipality by calling the state and local police departments.

The transporter will submit a report of the incident in writing to the following agency:

Information System Manager
DHM-63
Research and Special Programs Administration
U.S. Department of Transportation
Washington, DC 20590-0001

And send copies of the report to:

Now, I just await the information regarding the signature. I also assumed that R.P. Blair and L.S. Blair Corp are not for-hire carriers. "For-hire" refers to transporting passengers, regulated property, or household goods owned by others for compensation. Do they transport any of these? If they do, I will need an MCS-90 endorsement form for both companies.

Subject: Incomplete DE SW Transporter Permit Application (SW1792)

Categories: Egress Switch: Unprotected

Hello Mr. Blair,

Thank you for submitting your application to renew your Delaware solid waste transporter permit. Upon review, I have found that some information is missing or needs to be updated. Please address the items listed below:

- **Section 9(b)**- Do you have any other state solid waste permits?
- **Section 10**- Please provide an MCS-90 endorsement form with policy number 52364631.
- **Section 14**- You did not provide a list of vehicle operators.
- **Section 16**- For your (Eric Blair) signature to be valid, you must provide the same information as Rudy Blair. Otherwise, Rudy Blair will have to sign the application.

Please provide the information requested above via e-mail within five (5) days.

Thank you,
