SOLID WASTE TRANSPORTER PERMIT APPLICATION

Language Preference:

Instructions: You must complete this application in its entirety and attach all applicable documentation. (**Note:** For applicants renewing an existing permit, this application requires the submission of updated information and documentation. References to material submitted under previous applications are no longer accepted.)

The application must be signed by the company owner or a corporate officer. A check or money order payable to the "**State of Delaware**" must accompany this application and be sent to:

Delaware Department of Natural Resources and Environmental Control
Compliance and Permitting Section
89 Kings Highway
Dover, DE 19901

1. Type of Permit

- ☐ New – **SCRAP TIRES ONLY** Submit a check or money order, payable to the "State of Delaware," in the amount of \$75.00.
- ☐ New – **ALL OTHERS** Submit a check or money order, payable to the "State of Delaware" in the amount of \$350.00.
- ☒ Renewal: Permit # DE-SW- 0463 Expiration Date 12/31/2025

Please indicate the term for which you desire your permit to be issued. Submit a check or money order, payable to the "State of Delaware," for the indicated permit fee.

SCRAP TIRES ONLY

- ☐ One Year - \$75.00
- ☐ Two Years - \$125.00
- ☐ Three Years - \$175.00
- ☐ Four Years - \$225.00
- ☒ Five Years - \$275.00

ALL OTHERS

- ☐ One Year - \$350.00
- ☐ Two Years - \$650.00
- ☐ Three Years - \$950.00
- ☐ Four Years - \$1250.00
- ☐ Five Years - \$1550.00

2. Release to Public

Do you wish to be included on the list of transporters that is provided to persons requesting a list of Delaware permitted solid waste transporters? ☒ Yes ☐ No

3. Company Information

Company Name Veolia ES Technical Solutions, LLC

Location Address:	Mailing Address:
1 Eden Lane, Flanders, NJ 07836	1 Eden Lane, Flanders, NJ 07836

Contact: Denise Krous Title: Permits Coordinator

Business Phone: 973/691-7321 Fax: 973/691-3978

E-mail: denise.krous@veolia.com

24 hr Emergency Contact Phone: 1-800-688-4005

4. Company Ownership Information

(a). Please indicate the company type:

- ☐ Proprietorship
☐ Partnership
☐ Corporation - If company is a corporation, indicate city, state, and date of incorporation.

City: _____ State: _____ Date: _____

☐ Municipality

☐ Public institution

☒ Limited Liability Corporation (LLC) State: DE

☐ Other: (must specify) _____

(b). For each Owner, Partner, or Corporate Officer, attach a list with name, title, mailing address, date of birth, and % ownership. Include all stockholders owning greater than 5% outstanding shares.

☐ Attachment A No percentage of ownership. Corporate officers attached

(c). If company is owned by or affiliated with a parent company, attach parent company name, address & mailing address, and % ownership.

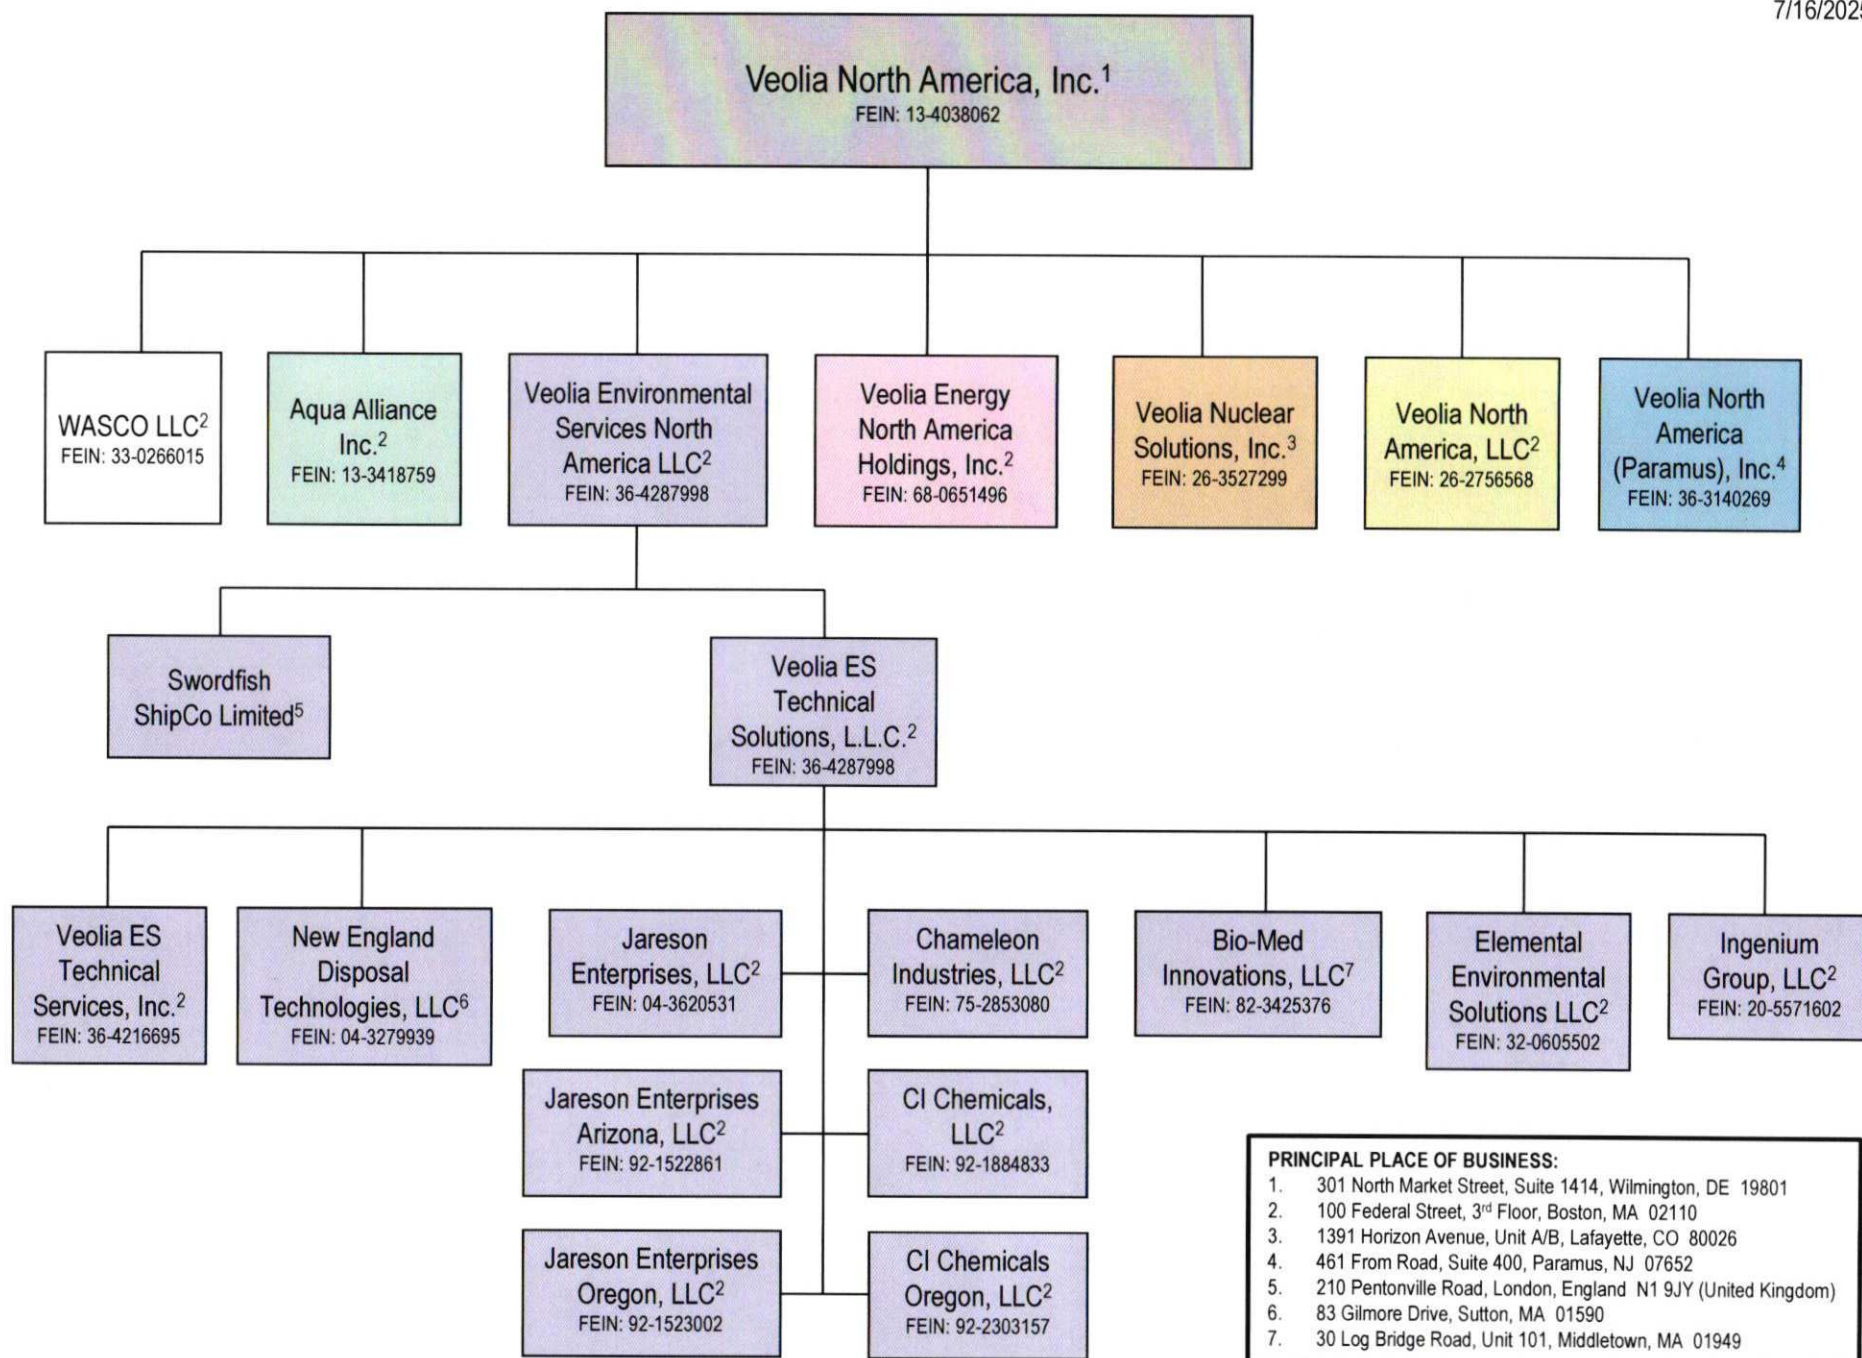

☐ Attachment B Veolia Environmental Services North America, LLC

☐ No parent company

5. Company locations in Delaware

List name and *street* address of each company location, including freight terminals, within the State of Delaware.

- ☐ Attachment C
☒ No Delaware locations

6. Company Affiliates

List name, location and mailing addresses, nature of business relationship of all company Affiliates, which affiliates are engaged in the business of waste transport, treatment, storage, disposal, recovery or reclamation. (Affiliated companies are defined as those companies owned by the same owners, corporate officers, or parent company.)

- ☒ Attachment _____
☐ No affiliates

7. Type of Waste to be Transported

(a). Check all that apply. Refer to Delaware's *Regulations Governing Solid Waste* for definitions of waste categories.

- ☐ Residential waste
☐ Commercial waste (from **non-manufacturing, non-processing** businesses and offices)
☒ Industrial waste (from a manufacturing or industrial process)
☐ Dry waste: ☐ construction/demolition debris
☐ trees/stumps
☐ other (must specify) _____
☐ Ash: ☐ municipal incinerator
☐ coal ash
☐ other (must specify) _____
☒ Infectious waste
☒ Non-hazardous petroleum-hydrocarbon contaminated soils
☒ Asbestos-containing waste
☐ Scrap Tires

(b). Does your company collect and transport residential (household) waste from single family homes, condominiums and apartment complexes in Delaware? ☐ Yes ☒ No

(c). If you answered "YES" to question 7.b., above, does your company provide recycling services to those customers? ☐ Yes ☐ No ☒ N/A

(d). If you offer recycling services, does your company collect and transport the recyclables separately from the waste generated by your customers? ☐ Yes ☒ No

(e). If you offer recycling services, are the recyclables ultimately taken to an incinerator (waste-to-energy) or landfill? ☐ Yes ☒ No

8. Treatment, Storage, and Disposal Facilities

- (a). Do you cross state lines with the waste? ☒ Yes ☐ No
- (b). Identify in an attachment **all** solid waste Treatment, Storage, Disposal Facilities, Reclamation Facilities and Transfer Stations to which the waste will be transported.
- ☐ Delaware Solid Waste Authority locations: (attachment) _____
 - ☐ Clean Earth of New Castle, Inc. (thermal treatment facility for PHC-soils)
 - ☐ Delaware Recyclable Products, Inc. (dry waste, commercial, industrial, and PHC-soils)
 - ☐ Other in-state solid waste facilities, including private facilities: (attachment) _____
 - ☒ Out of state solid waste TSD facilities: (attachment) D

9. Other Transporter Permits

- (a). Attach a copy of your home state solid waste transporter permit. (N/A if Delaware is your home state.)
- ☒ Attachment E
- ☐ Not applicable-No transporter permit required for these solid waste types in our home state.
- (b). List solid waste transporter permits held in other states.
- ☒ Attachment F
- ☐ No transporter permits in other states
- (c). Indicate your Federal DOT number and Motor Carrier number:
- DOT# 609181 MC# 295758
- ☐ N/A If N/A, please provide an explanation, on the following page, as to why you are not required to have a DOT or MC number.

10. Proof of Financial Responsibility

The transporter must submit proof of financial responsibility as established in section 7.2.4 of Delaware's *Regulations Governing Solid Waste*. This proof may be established by a Certificate of Insurance, with MCS-90 endorsement where applicable, or by other means approved by the Department. (The Certificate of Insurance must identify the **Department of Natural Resources and Environmental Control, Compliance and Permitting Section** as the certificate holder.)

- (a). Are you for-hire in interstate commerce? ☒ Yes ☐ No (For-Hire means you are in the business of transporting, for compensation or payment, wastes generated by a company other than your own.)
- (b). Do you transport in the State of Delaware Only (Intrastate)? ☐ Yes ☒ No
- (c). Do you transport Interstate? ☒ Yes ☐ No

Please note, the expiration date as stated on this form relates to the process for renewing the Information Collection Request for this form with the Office of Management and Budget. This requirement to collect information as requested on this form does not expire. For questions, please contact the Office of Registration and Safety Information, Registration, Licensing, and Insurance Division.

A Federal Agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2126-0008. Public reporting for this collection of information is estimated to be approximately 2 minutes per response, including the time for reviewing instructions, gathering the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Motor Carrier Safety Administration, MC-RRA, Washington, D.C. 20590.

United States Department of Transportation
Federal Motor Carrier Safety Administration

Endorsement for Motor Carrier Policies of Insurance for Public Liability
under Sections 29 and 30 of the Motor Carrier Act of 1980

FORM MCS-90

Issued to VEOLIA ES TECHNICAL SOLUTIONS LLC of NEW JERSEY
(Motor Carrier name) (Motor Carrier state or province)

Dated at 12:01 AM on this 1ST day of JANUARY, 2025

Amending Policy Number: RM5CA00066-251 Effective Date: 01/01/2025

Name of Insurance Company: EVEREST NATIONAL INSURANCE COMPANY

Countersigned by: 
(authorized company representative)

The policy to which this endorsement is attached provides primary or excess insurance, as indicated for the limits shown (check only one):

- ☒ This insurance is primary and the company shall not be liable for amounts in excess of \$ 5,000,000.00 for each accident.
- ☐ This insurance is excess and the company shall not be liable for amounts in excess of \$ _____ for each accident in excess of the underlying limit of \$ _____ for each accident.

Whenever required by the Federal Motor Carrier Safety Administration (FMCSA), the company agrees to furnish the FMCSA a duplicate of said policy and all its endorsements. The company also agrees, upon telephone request by an authorized representative of the FMCSA, to verify that the policy is in force as of a particular date. The telephone number to call is: 908-604-3000.

Cancellation of this endorsement may be effected by the company or the insured by giving (1) thirty-five (35) days notice in writing to the other party (said 35 days notice to commence from the date the notice is mailed, proof of mailing shall be sufficient proof of notice), and (2) if the insured is subject to the FMCSA's registration requirements under 49 U.S.C. 13901, by providing thirty (30) days notice to the FMCSA (said 30 days notice to commence from the date the notice is received by the FMCSA at its office in Washington, DC).

Filings must be transmitted online via the Internet at <http://www.fmcsa.dot.gov/urs>.

(continued on next page)

DEFINITIONS AS USED IN THIS ENDORSEMENT

Accident includes continuous or repeated exposure to conditions or which results in bodily injury, property damage, or environmental damage which the insured neither expected nor intended.

Motor Vehicle means a land vehicle, machine, truck, tractor, trailer, or semitrailer propelled or drawn by mechanical power and used on a highway for transporting property, or any combination thereof.

Bodily Injury means injury to the body, sickness, or disease to any person, including death resulting from any of these.

Property Damage means damage to or loss of use of tangible property.

Environmental Restoration means restitution for the loss, damage, or destruction of natural resources arising out of the accidental discharge, dispersal, release or escape into or upon the land, atmosphere, watercourse, or body of water, of any commodity transported by a motor carrier. This shall include the cost of removal and the cost of necessary measures taken to minimize or mitigate damage to human health, the natural environment, fish, shellfish, and wildlife.

Public Liability means liability for bodily injury, property damage, and environmental restoration.

The insurance policy to which this endorsement is attached provides automobile liability insurance and is amended to assure compliance by the insured, within the limits stated herein, as a motor carrier of property, with Sections 29 and 30 of the Motor Carrier Act of 1980 and the rules and regulations of the Federal Motor Carrier Safety Administration (FMCSA).

In consideration of the premium stated in the policy to which this endorsement is attached, the insurer (the company) agrees to pay, within the limits of liability described herein, any final judgment recovered against the insured for public liability resulting from negligence in the operation, maintenance or use of motor vehicles subject to the financial responsibility requirements of Sections 29 and 30 of the Motor Carrier Act of 1980 regardless of whether or not each motor vehicle is specifically described in the policy and whether or not such negligence occurs on any route or in any territory authorized to be served by the insured or elsewhere. Such insurance as is afforded, for public liability, does not apply to injury to or death of the insured's employees while engaged in the course of their employment, or property transported by the insured, designated as cargo. It is understood and agreed that no condition, provision, stipulation, or limitation contained in the policy, this endorsement, or any other endorsement thereon,

or violation thereof, shall relieve the company from liability or from the payment of any final judgment, within the limits of liability herein described, irrespective of the financial condition, insolvency or bankruptcy of the insured. However, all terms, conditions, and limitations in the policy to which the endorsement is attached shall remain in full force and effect as binding between the insured and the company. The insured agrees to reimburse the company for any payment made by the company on account of any accident, claim, or suit involving a breach of the terms of the policy, and for any payment that the company would not have been obligated to make under the provisions of the policy except for the agreement contained in this endorsement.

It is further understood and agreed that, upon failure of the company to pay any final judgment recovered against the insured as provided herein, the judgment creditor may maintain an action in any court of competent jurisdiction against the company to compel such payment.

The limits of the company's liability for the amounts prescribed in this endorsement apply separately to each accident and any payment under the policy because of anyone accident shall not operate to reduce the liability of the company for the payment of final judgments resulting from any other accident.

(continued on next page)

SCHEDULE OF LIMITS — PUBLIC LIABILITY

Type of carriage	Commodity transported	January 1, 1985
(1) For-hire (in interstate or foreign commerce, with a gross vehicle weight rating of 10,001 or more pounds).	Property (nonhazardous)	\$750,000
(2) For-hire and Private (in interstate, foreign, or intrastate commerce, with a gross vehicle weight rating of 10,001 or more pounds).	Hazardous substances, as defined in 49 CFR 171.8 , transported in cargo tanks, portable tanks, or hopper-type vehicles with capacities in excess of 3,500 water gallons; or in bulk Division 1.1, 1.2, and 1.3 materials, Division 2.3, Hazard Zone A, or Division 6.1, Packing Group I, Hazard Zone A material; in bulk Division 2.1 or 2.2; or highway route controlled quantities of a Class 7 material, as defined in 49 CFR 173.403 .	\$5,000,000
(3) For-hire and Private (in interstate or foreign commerce, in any quantity; or in intrastate commerce, in bulk only; with a gross vehicle weight rating of 10,001 or more pounds).	Oil listed in 49 CFR 172.101 ; hazardous waste, hazardous materials, and hazardous substances defined in 49 CFR 171.8 and listed in 49 CFR 172.101 , but not mentioned in (2) above or (4) below.	\$1,000,000
(4) For-hire and Private (In interstate or foreign commerce, with a gross vehicle weight rating of less than 10,001 pounds).	Any quantity of Division 1.1, 1.2, or 1.3 material; any quantity of a Division 2.3, Hazard Zone A, or Division 6.1, Packing Group I, Hazard Zone A material; or highway route controlled quantities of a Class 7 material as defined in 49 CFR 173.403 .	\$5,000,000

*The schedule of limits shown does not provide coverage. The limits shown in the schedule are for information purposes only.

- (d). Certificate of Insurance must be attached and include minimum automobile liability coverage as follows:

	FOR-HIRE INTERSTATE	ALL OTHERS
Residential Waste	\$750,000.00 + MCS-90 <input type="checkbox"/>	\$350,000.00 <input type="checkbox"/>
Commercial Waste	\$750,000.00 + MCS-90 <input type="checkbox"/>	\$350,000.00 <input type="checkbox"/>
Industrial Waste	\$750,000.00 + MCS-90 <input type="checkbox"/>	\$350,000.00 <input type="checkbox"/>
Dry Waste	\$750,000.00 + MCS-90 <input type="checkbox"/>	\$350,000.00 <input type="checkbox"/>
Ash	\$750,000.00 + MCS-90 <input type="checkbox"/>	\$350,000.00 <input type="checkbox"/>
Infectious Waste	\$1,000,000.00 + MCS-90 <input type="checkbox"/>	\$750,000.00 + MCS-90 <input type="checkbox"/>
Non-Hazardous Petroleum Contaminated Soils	\$750,000.00 + MCS-90 <input type="checkbox"/>	\$350,000.00 <input type="checkbox"/>
Asbestos	\$1,000,000.00 + MCS-90 <input type="checkbox"/> (For Hire & Private)	\$350,000.00 <input type="checkbox"/>
Scrap Tires Only	\$350,000.00 <input type="checkbox"/>	\$350,000.00 <input type="checkbox"/>

11. Spill Control and Safety

List all spill control and safety equipment that will be carried on each vehicle. (**Note:** Separate lists by type of vehicle and type of waste may be required.) Attach a copy of the Spill Control Plan. The Spill Control Plan **must** contain the following elements: (1) List of safety and spill control equipment carried in the vehicle, (2) Driver preventive measures, (3) Driver immediate corrective actions, (4) Company internal communications, (5) Company external communications including the **Delaware Emergency Reporting Numbers: 1-800-662-8802 and 302-739-9401**, and (6) Cleanup and decontamination measures.

Spill Control Plan: Attachment G

12. Driver Training

IN SUMMARY OR OUTLINE FORM, describe the procedures that your company takes to ensure that all company drivers are safe and competent drivers. Small owner-operators may describe their years of experience and driving record in lieu of a formal program.

- Include requirements for special licenses (e.g. CDL, including any special endorsements), any special training received, including dates training was received (e.g. asbestos training), and any ongoing company programs. (e.g. weekly safety meetings or annual refresher courses);
- Include your company procedure for periodic checks of the driver's records for moving violations, and your company policy on progressive counseling/discipline based on points;
- Describe how drivers are instructed in the following:
 - Knowledge of proper handling procedures for the type of solid waste being transported.
 - Familiarity with the approved accidental discharge containment plan. (Spill Control Plan)
 - Familiarity with the conditions of the solid waste transporter's permit.

Driver Training, attachment G / H

Safety Equipment	ATTACHMENT A
Veolia Directory of Locations	ATTACHMENT B
State Emergency Response Contact List	ATTACHMENT C
Operational and Management Plan for Infectious Waste	ATTACHMENT D
Arizona RMW Transporter Contingency Plan	ATTACHMENT E

PURPOSE

The Contingency Plan is a document that must be carried in the transport vehicle to provide information and direction to the driver during an emergency. This plan has been developed by the Veolia Corporate Transportation Department and is applicable to all Veolia drivers. It is accepted by the regulatory agencies as the transporter's written assurance that certain activities will be conducted in an acceptable manner.

OVERVIEW

In the event of a discharge of hazardous materials, including hazardous wastes, during transportation, the driver must take appropriate and immediate action to protect human health and the environment.

In most instances, the environmental specialists who initially packaged the materials accompany the shipment. These field personnel are fully trained in emergency response procedures, including the use of the Emergency Response Guidebook (ERG) and site remediation. During shipment, the necessary tools and personal protective equipment are available for immediate use. (See Attachment A)

DRIVER RESPONSIBILITIES

The Veolia driver and crew are responsible for taking the following actions upon the discovery of a discharge. Prior to responding to an incident, the driver should review all shipping papers to identify the nature and hazards of the materials involved. Based on the hazards of the material, proper personal protective equipment must be selected. In all incidents, the area should remain clear except for those persons trained in emergency response procedures and those who are absolutely necessary to deal with the emergency. All broken or leaking containers will be repackaged, marked, and labeled in compliance with the USDOT regulations.

Response Actions & Routine Decontamination Procedures

◆ **Leaking Containers**

If leaking drum(s) or packages are identified, the driver should immediately proceed to the nearest off-road impermeable surface (if possible) and post reflectors warning traffic approaching from each direction. Vermiculite and/or speedy-dry should immediately be applied around the container to prevent the flow of liquid from reaching soil or surface water. If possible, leaking containers should be inverted or plugged. Any contamination in the trailer should be swept, washed, or steam cleaned, and the collected waste and rinsate containerized for appropriate disposal.

◆ **Discharge to Pavement, Concrete or Metal Surfaces**

The spill area should be contained to prevent materials from reaching soil or surface water. Absorbents should be applied and the spilled material collected and placed into suitable containers for disposal at an appropriate licensed treatment or disposal facility. Large spills may require the use of pumps and/or vacuum trucks.

Once the spilled material has been satisfactorily recovered and containerized, the area should be washed and the rinsate containerized for appropriate disposal. Veolia has pumps available and has agreements in place with subcontractors for the use of vacuum pumps.

◆ Discharge to Soil

The spill area should be diked with absorbents to prevent the spread of contaminants to surrounding areas. Liquids, depending on quantity, should be absorbed or pumped into containers. Contaminated soil, depending on quantity, should be excavated by hand or machine so that all contamination is removed. Veolia has shovels available and has agreements in place with subcontractors to provide heavy equipment such as backhoes, if needed. Contaminated soil should be placed in drums, roll-offs, or water-proof dump trailers for ultimate disposal at a licensed treatment or disposal facility. Veolia has substantial experience in this type of remediation activity.

◆ Discharge to Water

The nature and quantity of the spill, as well as the type of water body contaminated, should determine the action to be taken.

Spills contaminating small quantities of surface water should be either absorbed or pumped into containers for appropriate disposal. Spills reaching sewers will require special equipment to block water flow for pumping.

Spills to lakes or rivers may require booms, skimmers, vacuum trucks, pumps, etc., which will be provided by Veolia subcontractors. Veolia has a geographical listing of subcontractors on 24-hour call to respond to such emergencies.

◆ Containment of Elemental Mercury

Spills of elemental mercury are more difficult to contain than spills of other liquids, since typical absorbent materials will not absorb mercury. A mercury spill clean-up product is required to contain mercury. Each vehicle transporting elemental mercury is equipped with a mercury spill clean-up kit. The driver should form a small berm around the location of the spill with the powder absorbent from the spill kit. If the spill is small enough, the driver should cover the entire area with the spill powder.

◆ Infectious/Biomedical Waste Releases

Spills or emergencies involving infectious/biomedical wastes require unique response procedures, see Veolia Environmental Services – Operational and Management Plan for Biohazardous Wastes (ATTACHMENT D) for complete details.

◆ Releases of Radioactive Materials

Spills involving radioactive materials require special handling. Immediately contact Liza Krass (973) 722-1562 for further incident management.

◆ Equipment Decontamination

After addressing the immediate emergency aspects of the spill, any equipment that was exposed to the released materials must be decontaminated. The truck or trailer that is contaminated must be adequately cleaned prior to returning to the roadway to prevent further contamination. Upon returning to the Veolia facility, the vehicle may require additional decontamination.

All equipment and tools utilized in the remediation procedure must be decontaminated using an appropriate cleaning solution. All residual waste and wash water must be collected and containerized. The containers should be labeled and manifested to a Veolia-authorized treatment or disposal facility in accordance with all applicable federal and state regulations.

Other contaminated articles such as personal protective equipment, rags and towels and etc., should also be placed in sealed containers and disposed of along with the above materials.

EMERGENCY RESPONSE CONTRACTORS

Veolia is a commercially-available emergency response contractor and has all required emergency response equipment and personnel available to respond to any hazardous materials incident. Veolia also has mutual aid agreements available with subcontractors where a response by our own personnel would be geographically impractical.

**Veolia
National Emergency Response
800-688-4005**

Telephone Notifications & External Communication

◆ **Contact Local Police - Dial 911**

For any release of hazardous material contact the local police and fire departments by dialing "911". The truck's cellular phone or nearby phone should be used to request assistance. If at all possible, the scene of the incident should not be left unattended. The required USDOT shipping papers should be consulted and matched to the leaking container(s). This will help to identify the materials involved in the incident and the corresponding hazards.

◆ **Contact Veolia Home Office**

The driver must, in all incidents, contact his/her Veolia home office (Attachment B) and report the following:

- Location of the incident
- Nature of the materials involved and injury/damage to individuals or property
- Quantity released
- Proper DOT shipping name of the material, including whether the material exceeds the Reportable Quantity (RQ)
- Time and duration of release
- Nature of incident causing the release of materials
- Any known health risks associated with the emergency
- Proper precautions such as evacuation
- Whether the spilled materials have reached the soil or surface water, sewer or air
- Immediate actions taken and spill clean-up actions to be taken to clean up the site
- A list of agencies notified
- Phone numbers where the person can be reached

The Emergency Coordinator at the home office will assure the necessary notifications are made to the appropriate state and federal authorities and emergency response committees.

◆ Assistance from Velocity EHS

If additional information is required regarding specific emergency procedures for a chemical incident, assistance is available from Velocity EHS. by dialing: **1-877-818-0087**. Velocity EHS personnel can reference Veolia WIP numbers to obtain specific chemical data on a spilled material.

Velocity EHS is a 24-hour chemical emergency response system, which provides up-to-date information and comprehensive assistance in emergency situations involving hazardous materials and wastes.

Velocity EHS is listed as the emergency contact on Veolia shipping papers as required by 49 CFR, §172.602 and §172.604.

EMERGENCY COORDINATOR RESPONSIBILITIES

It is the responsibility of the Emergency Coordinator to ensure that all written and verbal notifications are completed as required.

Verbal Reporting

For all incidents, the following notifications must be made to the following:

- ◆ The appropriate Veolia Branch Manager, the local EH&S Manager and the Corporate EH&S Manager.
- ◆ The generator or shipper of the material that was released or spilled
- ◆ The appropriate State Department of Environmental Protection and municipality must be notified (Attachment C) with the following information:
 - Name of the person reporting the incident
 - Name, Address, and the EPA identification number of the transporter
 - Phone number where the person reporting the incident can be reached
 - Date, time and location of the incident
 - Mode of transportation and type of transport vehicle
 - A brief description of the incident, including the type of incident and nature of hazardous material/waste involved and whether a continuing danger exists at the scene.
 - For each waste involved in the spill:
 - The name and EPA identification number of the generator of the waste
 - Shipping name, hazard class and UN/NA number of the waste
 - Estimated quantity of the material or the waste spilled
 - The extent of the contamination of land, water or air
 - Shipping name, hazard class and UN/NA number of any other material carried
 - Extent of injuries, if any
- ◆ The National Response Center (NRC) requires immediate telephonic notification after an incident if the following conditions exist:
 - As a direct result of a hazardous material –
 - A person is killed,
 - A person receives an injury requiring admittance to a hospital,

- The general public is evacuated for one hour or more,
 - A major transportation artery or facility is closed or shut down for one hour or more; or
 - The operational flight pattern or routine of an aircraft is altered
-
- Fire, breakage, spillage, or suspected radioactive contamination occurs involving a radioactive material;
 - Fire, breakage, spillage, or suspected contamination occurs involving an infectious substance other than a diagnostic specimen or regulated medical waste;
 - A release of a marine pollutant occurs in a quantity exceeding 450 L (119 gallons) for a liquid or 400 kg (882 pounds) for a solid;
 - A release of a hazardous substance equal to or exceeding its RQ (in accordance with CERCLA requirements this notification must be made within 15 minutes of the time you were notified of the occurrence; see "Additional Reporting for Releases of Hazardous Substances" below), or
 - A situation exists of such a nature (e.g., a continuing danger to life exists at the scene of the incident) that, in the judgement of the person in possession of the hazardous material, it should be reported to the NRC even though it does not meet the criteria of the above requirements.

NRC: 800-424-8802

Additional Reporting for Releases of Hazardous Substances

In addition to contacting the NRC if the material released is equal to or exceeds its RQ, the Emergency Coordinator must also notify the local emergency response commission and provide the following information:

- The chemical name or identity of any substance involved in the release
- An indication of whether the substance is an extremely hazardous substance
- An estimate of the quantity of any such substance that was released into the environment
- The time and duration of the release
- The medium or media into which the release occurred
- Any known or anticipated acute or chronic health risks associated with the emergency and, where appropriate, advice regarding medical attention necessary for exposed individuals
- Proper precautions to take as a result of the release, including evacuation
- The names and telephone number of the person or persons to be contacted for further information

Written Reports

- ◆ **Federal Written Report** – Within 30 days after an incident occurs during transportation (including loading, unloading or temporary storage), USDOT Form 5800.1 must be submitted to the USDOT. Be sure to follow the guidelines outlined in Veolia's "USDOT Hazardous Materials Incident Reporting" policy to ensure compliance with all company and federal requirements.
- ◆ **Individual State Written Reporting** – Per individual state requirements, incident reports will also be sent to the appropriate state agencies as identified on Attachment C.

TRAINING

Veolia employees who are directly involved in the transportation of hazardous materials and wastes are trained in accordance with the requirements of 49 CFR, Part 172 Subpart H. This training includes general awareness training and function specific training with an emphasis on the following topics:

- USDOT Hazardous Materials Regulations
- USEPA RCRA Regulations including specific state variations as applicable
- Chemical and Physical Properties of Hazardous Materials
- Safety and health hazards associated with materials being transported
- Practices for preventing spills
- Procedures for responding properly and rapidly to spills
- Emergency procedures (i.e., use of contingency plan, first aid)
- Use of emergency equipment
- In-Depth Security Plan and Security Awareness training

ATTACHMENT A

SAFETY EQUIPMENT

Safety Equipment

- Absorbents (i.e., vermiculite, speedi-dry, clay)
- ABC dry chemical fire extinguisher
- Fully equipped first aid kit including eye wash
- Drum opening tools, shovel, broom, bucket, scoop, poly sheets
- Empty containers
- Spare fuses, flashlight
- Reflective triangles
- Cellular phone
- Drum truck
- Protective clothing to enable company personnel to safely handle closed packagings of hazardous materials and wastes including:
 - Safety glasses
 - Uniform
 - Work gloves
 - Boots
 - Hard hat
- Chemical protective equipment for personnel packaging and transferring hazardous materials and those trained in responding to hazardous materials spills including:
 - Chemical resistant suits and gloves
 - Respirators with spare cartridges
 - pH paper to assess corrosivity

Additional Equipment for Specialized Shipments

Bulk Liquid Shipments

- Absorbent booms and pads

Bulk Solid Shipments

- Spare roll-off liner or roll of poly sheeting

Specialized Mercury Shipments

- Mercury Spill Kit containing the following minimum materials:
 - (2) Mercury absorbent sponges
 - (1) 500 gm bottle, Mercury absorbent powder

Spill Equipment Available through Emergency Response Clean-up Team

- Vacuum Truck
- Special Pumps and tools
- Large stock of absorbents (vermiculite, speedi-dry, booms, activated carbon, lime)
- Self-contained breathing apparatus
- Earth excavation equipment and water-tight dump trailers

-
- 85-gallon overpack salvage drums

Care and Maintenance of Safety Equipment

All equipment will be tested and maintained as necessary to assure its proper operation in time of an emergency. After an emergency, all equipment will be decontaminated, cleaned and determined to be suitable for its intended use before normal operations resume.

ATTACHMENT D

OPERATIONAL AND MANAGEMENT PLAN FOR INFECTIOUS WASTES

Purpose

This plan has been prepared to assure the safe and compliant handling and transportation of infectious wastes by Veolia employees. Veolia is a permitted transporter of infectious wastes in several states, including New Jersey, Connecticut, Montana and Rhode Island. In this plan, the term "infectious wastes" is synonymous with the terms "regulated medical waste" and "biohazardous waste".

Veolia Responsible Individuals

Veolia environmental technicians are responsible for the safe and compliant handling and transportation of infectious waste. Technicians are trained in the implementation of this management plan that specifically includes use of the spill kit in the response to infectious waste spills.

Waste Management Plan

Types of Infectious Wastes to be Managed:

Veolia transports infectious wastes generated by its clients. These wastes include:

1. Cultures and stocks
2. Pathological wastes
3. Human blood and blood products
4. Sharps (used and unused)
5. Animal wastes
6. Isolation wastes
7. Chemotherapy wastes

Packaging

Infectious waste is packaged in accordance with USDOT and individual State packaging requirements. The following minimum packaging is required for infectious waste. The infectious waste is placed in a red plastic bag and tightly sealed. This package is then placed into a second bag that has shown to preclude ripping, tearing or bursting under normal handling and transportation conditions. The bag is then placed into a container that meets the UN packaging standards for packaging group II. Packages will be properly marked and labeled as a Division 6.2 hazard class according to USDOT regulations.

Handling of Packages

Packages of infectious waste are handled in a manner to prevent rupturing or breaking of the package. Individual packages are either loaded by hand onto the transportation vehicle or are placed on a pallet and secured by shrink-wrap. Completed pallets are loaded onto the transportation vehicle by a pallet jack. Employees handling

infectious wastes take all necessary precautions to avoid direct contact with the infectious materials.

Security

Special care is taken to assure the security of the wastes during loading and transportation. At no time is the waste left unattended on the vehicle unless the cargo portion of the vehicle is securely locked.

Transportation Procedures

Veolia transports infectious wastes in closed vehicles ranging in size from tractor-trailers to 26-foot box vans to pick-up trucks. Wastes are not transported in the passenger compartment of the vehicle. Wastes are transported from the generator's facility to either a transfer facility or a treatment facility permitted to manage infectious wastes. Waste shipments are tracked on an appropriate shipping paper meeting federal and state regulatory requirements. Containers of infectious waste, that upon delivery to the receiving facility are determined to be off-specification or require rejection, will be returned to the original generator. All tracking forms will be revised accordingly to note such rejections.

Contingency and Spill Response

Veolia has developed a detailed Transporter Contingency Plan that describes the methods for responding to a spill or emergency involving hazardous materials during transportation. This plan is also applicable to the transportation of infectious wastes. The additional contingency plan requirements unique to the management of an emergency involving infectious wastes are:

- **Disinfection** - Surfaces contaminated as a result of spills or releases of infectious wastes require proper disinfection. Disinfection is completed through rinsing the contaminated surface with a 10% volume/volume of sodium hypochlorite and water solution. Should a release occur, possible surfaces to be disinfected include the packages, the floors and walls of the cargo compartment of the vehicle, and areas outside the vehicle where infectious wastes may have leaked or spilled. Decontamination procedures are conducted by employees trained in the proper response procedures and that are equipped with the proper personal protective equipment as required by the Veolia Corporate Safety and Health Program.
- **Notification of Authorities**- Should an incident involving infectious waste occur during transportation the proper authorities must be contacted. In addition to the authorities listed in the Veolia Transporter Contingency Plan, immediately notify the following State agencies as appropriate:
 - NJDEP Emergency Response 24-hour hotline (1-877-WARNDEP)
 - Local Health Department and CTDEP Solid Waste Division
 - Rhode Island Department of Environmental Management
 - Montana Department of Environmental Quality / Waste and Remediation Division
 - Colorado Department of Public Health and Environment's 24-hour spill reporting hotline at 1-877-518-5608, to the local governing body having jurisdiction, and to the wastewater treatment facility where the spill or release occurred, if applicable, within twenty-four (24) hours.
- **Written Notification** – In the event of a spill or accident involving a vehicle transporting medical waste in the State of New Jersey a written accident report form provided by the DEP will be submitted within 48 hours to the NJDEP. In the state of Rhode Island, a Rhode Island Medical Waste Spill and Accident Report will be

completed and submitted to the State within 48 hours. The State of Colorado requires a written report to be submitted within 15 days describing the spill/release and the actions taken to remediate it.

For additional state reporting requirements refer to the applicable state regulations.

- **Spill Kit** – In addition to the spill kit items listed in the Veolia Transporter Contingency Plan, the following items are available on each vehicle used to transport medical waste:
 1. Two sets of oversized disposable tyvek coveralls, gloves, boots, caps made of a moisture resistant/moisture-proof material, latex gloves, and tape for sealing wrists and ankles of the protective coveralls. When sharps are present, puncture resistant or puncture proof gloves will be available.
 2. Protective eye covering and protective breathing devices (surgical masks or full-face respirator) impermeable to liquids.
 3. One gallon of hospital grade disinfectant or the sodium hypochlorite disinfection solution described above which is effective against mycobacteria
 4. Absorbent sufficient to clean-up a 10 gallon spill
 5. 50 extra red bags large enough to overpack any container usually used by the generator for regulated medical waste packaging along with sealing tape (or devices for sealing). Bags must be leak resistant, impervious to moisture and sufficiently strong to prevent tearing or bursting under normal conditions of use and handling.
 6. 1 gallon disinfectant sprayer (sprayer required) capable of dispersing its charge in a mist or a stream
 7. Medical Waste Labels
 8. Scoops, shovels, push brooms, and buckets
 9. First Aid kit, boundary marking tape, fire extinguisher, lights and other appropriate safety equipment
 10. Communication device (Cell Phone)
 11. Copy of approved Spill Management Plan in each vehicle and site.
- **Remedial Activities** – The procedures for responding to a fire, release, or any emergency involving infectious wastes are identical to the procedures described in the Veolia Transporter Contingency Plan. In addition, this plan addresses the protective clothing needed for the handling of hazardous materials, including infectious wastes.
- **Availability of the Plan** - This plan is being submitted to the appropriate state agencies as required. Furthermore, a copy of this plan will be carried on each Veolia vehicle used for the transport of infectious waste. Upon request, this plan will be made available to public health officials, environmental officials, and clients.

ATTACHMENT E

OPERATIONAL AND MANAGEMENT PLAN FOR REGULATED MEDICAL WASTE IN ARIZONA

Purpose

This plan has been prepared to assure the safe and compliant handling and transportation of regulated medical wastes by Veolia employees in the State of Arizona.

Veolia Responsible Individuals

Veolia environmental technicians are responsible for the safe and compliant handling and transportation of regulated medical waste. Technicians are trained in the implementation of this management plan that specifically includes use of the spill kit in the response to infectious waste spills.

Basic Description and Technical Name

Regulated medical waste will be assigned with the following USDOT shipping name:

UN3291, Regulated Medical Waste, n.o.s., 6.2, PG II

Potential Health Hazards

Potential health hazards related to the transportation of regulated medical waste includes:

1. Inhalation or contact may cause infection, disease, or death; and
2. Runoff from fire control may cause pollution.

Risk from Fire or Explosion

1. The reusable containers are fire resistance: U.L. 94 HB Material High Density Polyethylene; and
2. Some of the waste material may burn, but none ignite readily.

Immediate Precautions

1. Assess the extent of the incident and/or spill;
2. Isolate spill from unauthorized personnel using the yellow caution tape provided in the Spill Kit;
3. If applicable, stop continual leakage from container(s), by using absorbent, or additional liners and additional polyvinyl container as needed;
4. Contain spill within an appropriate area, using absorbent and supplied rags as needed; and
5. If necessary, call your Veolia Transportation Manager, or the Veolia National Emergency Response Group: 1-800-688-4005.

Immediate Methods for Handling Fires

Small Fires: Use the ABC dry chemical fire extinguisher provided on the vehicle or if at a facility, locate the closest fire extinguisher prior to an incident.

Large Fires: Call 911; then the Veolia National Emergency Response Group 1-800-688-4005.

Spill Response Procedures

Biohazardous Medical Waste Spill:

Personnel (Drivers)

1. If a person has direct contact with untreated biohazardous medical waste, first remove any contaminated clothing and shower thoroughly or wash area with a germicidal soap.
2. Prior to conducting the following clean-up procedures, utilize the following personal protective equipment (PPE):
 - Tyvek suit (for liquid spills only);
 - Tyvek booties (for liquid spills only);
 - Impermeable gloves (i.e., latex, polyethylene, etc.); and
 - Safety glasses or face shield.

Surfaces Coming in Contact with the Spill:

1. The driver that becomes aware of the spill must inform the appropriate Supervisor, via telephone or other communication device, as soon as possible and cordon off the spill area using safety cones and caution tape from the Spill Kit.
2. The employee(s) cleaning up the spill must wear PPE as specified above.
3. Place an appropriate red plastic bag, meeting ASTM D 1709-97 and 1922-94a, inside a fiberboard box or reusable plastic container at the Packing Group II level.
4. Initially, shovel the solid portion of the spilled material into the previously prepared fiberboard box or reusable container.
5. Spray the contaminated area with Spor-Klenz Ready to Use Sterilant (EPA Reg #1043-119) or another EPA-approved disinfectant. Veolia can select equivalent products from the appropriate EPA-registered antimicrobial products from EPA Lists A, B, or D for the cleaning and disinfection of surfaces which have come in contact with blood or other potentially infectious materials.
6. Spread absorbent on the contaminated area and wait at least 10 minutes.
7. Shovel the absorbent and any other contaminated items into the container; continue until no visible contamination remains.
8. Once again spray the area previously covered by the spill with EPA-approved disinfectant.
9. Spray any tools that may have come into contact with the biohazard medical waste during this clean-up.
10. Remove and place all disposable PPE in the fiberboard box or reusable plastic container used during this clean-up. Seal the contents and mark the box or container as "Spill Cleanup".
11. Ensure that the inner packaging (bag) and the outer packaging (container) are closed according to the applicable packaging specifications. Mark the container "Spill Cleanup".
12. Segregate the "Spill Cleanup" container from any other loaded waste, to avoid mixing the contents with manifested waste contents.
13. Load all containers onto the transportation vehicle and ensure it is properly secured.

14. Generate a Tracking Document for any additions or subtractions to total quantity of waste caused by the spill response activity (i.e., biohazardous medical waste from one container cleaned up and placed into two new containers.)
15. The Supervisor must complete incident reporting requirements.

Incident Reporting

1. The incident will be reported to the employee's Supervisor as soon as possible
2. Gather the relevant data and complete the Incident Report Form in the Mountain Branch Incident Database.
3. Upon receipt of the complete Incident Report Form, the Supervisor then must:
 - Make the immediate telephone notice, if applicable, to the U.S. Department of Transportation as (800) 424-8802; and/or
 - Complete and submit a copy of Form 5800 to:
 - U.S. Department of Transportation within 30 days
 - The collection company (if other than Veolia) that collected this container
 - The Veolia representative assigned to the applicable customer (who will then communicate to the customer).

Emergency Response and First Aid

For large spills or emergencies requiring HazMat Emergency Response:

1. Call 911 to report the emergency
2. Call your Veolia Transportation Manager, or the Veolia National Emergency Response Group: 1-800-688-4005
3. Call the ADEQ Emergency Response Hotline (800) 234-5677 ext. 771-2330 or (602) 771-2330 to report the incident and follow ADEQ recommendations.
4. Call the Center for Disease Control (CDC) as (404) 633-5313 to report the incident and follow CDC recommendations.
5. Call the Arizona Department of Public Safety at (602) 223-2000.
6. Other agencies to consider contacting depending on the nature and scope of the spill include state or local police, local fire department and/or related agencies.
7. At the earliest possible opportunity, call your immediate supervisor to get additional instructions.

First Aid:

1. Move injured victims to safe area, away from the incident location.
2. Call 911 for emergency medical care, if necessary, or prepare to take the victim to the emergency room at a community hospital or closest emergency room if incident occurs outside of that service area.
3. Call your immediate supervisor or the Mountain Branch Environmental Health and Safety Department.
4. If the victim is not in immediate danger, remove and isolate any contaminated clothing and shoes
5. In the event of contact with biohazardous medical waste, immediately flush skin and/or eyes with sufficient amount of water (running water for at least 20 minutes).
6. In the event of contact of any contaminants with the eyes, immediately begin rendering first aid, and flush eyes with the provided squirt bottle with the clean water.
7. In the event of contact of contaminants with the eyes, the eyes must be flushed for 20 consecutive minutes in order to prevent further injury. Once step 6 has been complete, the victim shall be immediately moved to the

nearest medical facility, or to a location equipped with the appropriate eye flushing equipment in order to continue with eye flushing for the prescribed 20-minute period.

8. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

SPILL KIT CONTENTS

All vehicles shall carry Spill Containment Kits containing the following:

- Broom and dust pan or scooper
- Heavy duty latex exam gloves or disposable Nitrile gloves
- Two pairs of puncture-resistant heavy rubber gloves
- Full face shield
- Safety glasses
- Steel-toed rubber boots or other protective foot covering
- One spray container of disinfectant Spor-Klenz Ready to Use Sterilant (EPA Reg #1043-119)
- One small container of anti-bacterial skin cleanser (alcohol based hand sanitizer product)
- One bar of germicidal soap
- Two gallons of water for emergency first-aid and skin and eye contact
- Flashlight and batteries
- Emergency blanket
- One bag of rags
- One roll of duct tape
- One roll of caution tape
- A secondary container for spill cleanup, such as red biohazardous bags for biohazardous medical waste
- Safety Cones
- Shovel
- Marker and/or pen
- Scissors
- Tongs or forceps to pick up broken or sharp items
- First aid kit (on the truck):
 - Antiseptic towelettes
 - Antiseptic ointment
 - Adhesive tape
 - Roller gauze and gauze pads
 - Two quart-size eye wash containers
 - Band-aids in assorted sizes
 - Cold pack
- Paper towels
- Plastic garbage bags
- Markers, labels, and pens
- Tyvek suits (x 2)
- Tyvek Booties
- 10 pounds of absorbent (kitty litter or equivalent)
- Respiratory mask
- One warning triangle, flare kit, and barrier tape
- One ABC-rated fire extinguisher (carrier in the truck side box)

-
- Camera/Cell Phone
 - Emergency contact card for the Mountain Branch Phoenix Office
 - 5 gallon fold-a-carrier water container

The spill kit will be stored in a container marked "Spill Cleanup Equipment Kit" and will be stored separate from waste containers. The Spill Kit will be located so that it is readily accessible in the event of an emergency.

A copy of this Biohazardous Medical Waste TMP shall be kept in the Driver's Compartment of each transport vehicle and copy shall be kept in the Spill Kit.

Veolia ES Technical Solutions, LLC
Driver Training Programs

1. Purpose:

These programs have been developed to ensure compliance with all applicable regulations and to ensure that all drivers have the training necessary to professionally operate VES vehicles. They provide training regarding the safe handling of hazardous wastes/materials for all drivers assigned to work with or near potentially hazardous materials or activities.

The programs provide drivers of commercial motor vehicles owned or operated by VES with the knowledge and skills necessary to operate those vehicles in a safe and professional manner, in compliance with all applicable rule of the Office of Motor Carrier Safety and laws and rules of the States in which we operate.

2. Scope:

This plan applies to all Veolia ES Technical Solutions Drivers.

3. Regulatory Compliance Applicability:

The requirements set forth herein comply with regulations requiring employee health and safety training including:

- OSHA (29 CFR 1910.95, 1910.120, 1910.157, 1910.1030, 1910.1200)
- DOT (49 CFR 390.3(e), 172 Subpart F, 382 Subpart F, HM-126F)
- RCRA (40 CFR Part 263)

4. Responsibility:

It is the responsibility of the Director of Organizational Development and Training to insure the development and implementation of the corporate driver training program plan. The Regional /Branch Health and Safety Manager or designee is responsible for coordinating the implementation of this program at their respective regions. Regional Managers are responsible for providing the resources for meeting the requirements of this program and ensuring personnel receive the necessary training prior to starting their new positions. VES employees are responsible for actively participating in training, demonstrating competency of skills learned, and following the health and safety procedures presented in training. VES employees are also responsible for discussing with their supervisors or peers any task they consider to be unsafe and for which they have not been adequately trained.

5. Program Elements:*General Training Requirements*

Training is a continuous component for employees of Veolia ES Technical Solutions. Each new employee must meet certain training requirements. These requirements not only meet federal and local standards but also requirements set forth by Veolia ES Technical Solutions. This training should take place within the first month of an employee's employment. These training requirements are outlined below:

- Facility Contingency Plan (If Applicable)
- Drug and Substance Abuse Program and Policy (in accordance with 49 CFR 382 Subpart F)
- Sexual Harassment Policy and Awareness
- Veolia ES Technical Solutions Background and History
- Service Quality Commitment (SQC) Training
- Hazard Communication (in accordance with 29 CFR 1910.1030) including blood borne pathogens
- Fire Safety/Selection and Use of Portable Fire Extinguishers (in accordance with 29 CFR 1910.157)

- Workplace Violence

Driver Training Requirements

Once the initial requirements have been met, additional job-specific requirements are addressed. All VES drivers receive the following training:

- Introduction to DOT
- Federal Motor Carrier Safety Rules
- Hazardous Materials Rules
 - Hazard Classes
 - Precedence Table and Shipping Names
 - Packaging, Marking, and Labeling
 - Reportable Quantities
 - Manifesting
 - Drum Handling
 - Vehicle Segregation
 - Truck Loading
 - Placard Instruction
 - Basic Hazardous Materials Safety
 - Hazardous Material Transportation Security Awareness
- Personal Protective Equipment and Selection appropriate to their duties (including Hearing Protection in accordance with 29 CFR 1910.95 and Respiratory Protection in accordance with 29 CFR 1910.134 as applicable.)
- Proper Lifting and Back Safety
- Site Control/Work Zones and Practical
- Confined Space Overview/Awareness

Hazwoper Training:

This program is designed to meet the 24-hour or 40-hour training requirements under 29 CFR 1910.120 for routine RCRA activities. It provides drivers with the knowledge and skills required to work on uncontrolled hazardous waste site, within TSDF operations, or on emergency response projects.

Any individual who is involved in the preparation, transport, or receipt of hazardous waste or any employee who works with or near potentially hazardous materials or activities will attend the program. Employees will be required to demonstrate competency of the tasks and skills taught while training during this program. Upon completion of the program, the employee meets the requirements set forth in OSHA 29 CFR 1910.120 Hazardous Waste Operations and Emergency Response, DOT HM-126F, and OSHA 1910.1200 Hazard Communication.

- Introduction to DOT
- Hazard Classes
- Precedence Table and Shipping Names
- Packaging, Marking, and Labeling
- EPA Hazardous Waste Numbers
- Chemical Segregation
- Personal Protective Equipment and Selection
- Air Purifying Respirator and Self Contained Breathing Apparatus
- Proper Lifting and Back Safety
- Reportable Quantities
- Manifesting
- Air Monitoring
- Introduction to Reactive Chemicals
- Compressed Gas Safety
- Site Control/Work Zones and Practical

- Confined Space Overview and Practical
- Drum Handling
- Vehicle Segregation
- Truck Loading
- Placard Instruction
- Waste Information Profiles
- Hazardous Material Transportation Security Awareness
- Safe Handling of Flammable Liquids and Practical
- Generator Requirements
- Land Disposal Restrictions

Annual Safety Refreshers:

VES believes that frequent reinforcement and review of basic safety principles is paramount in providing a safe work environment. OSHA also requires that those employees engaged in activities that expose or potentially expose workers to hazardous substances and health hazards shall receive eight hours of refresher training annually. This training should be on a variety of subjects such as safety, health, and other hazards, use of personal protective equipment, engineering controls, and safe work practices. Therefore, any VES employee who meets the requirements of attending the New Employee Orientation also meets the requirements of attending Annual Safety Refresher Training. At a minimum, the following list of safety topics should be included in the annual refresher.

- Hazard Communication and Awareness
- Selection and Use of Personnel Protective Equipment
- Radiation and Biohazard Awareness
- Toxicology
- Use and Maintenance of Supplied Air and Self Contained Breathing Apparatus
- Use and Maintenance of Air Purifying Respirator/Respirator Fit Test
- Bonding and Grounding Flammable Liquids
- Establishing Site Control/Use of Work Zones
- Confined Space Recognition/Non-entry Confined Space Rescue
- Selection of Fire Extinguishers
- Site Specific Contingency Plan Review
- First Aid/ CPR

Each division, region, or office must determine if there are other training requirements specific for its operations that should be conducted annually. Annual training refers to training conducted at a frequency of once every twelve months. Training must be completed no later than 60 days past the anniversary date of the employee's previous OSHA 1910.120 training.

6. Record keeping:

OSHA requires that all safety training be documented. Documentation should consist of, at a minimum, a sign-in sheet listing the following information.

- Instructor(s)
- Attendees
- Date (training was conducted)
- Training Location
- Training Topic
- Course Length
- Brief Overview of Training

Veolia ES Technical Solutions, L.L.C. operates as an interstate contract carrier and hazardous waste transporter and has implemented the following safety and training programs as required by federal transportation and environmental regulations:

- Vehicle Inspection – All commercial motor vehicles operated by Veolia undergo periodic inspection at least once every 12 months in accordance with the FMCSA requirements in 49 CFR 396.17. Records of the periodic inspections are maintained as required by 49 CFR 396.21.
- Maintenance and Safety Program – All commercial vehicles operated by Veolia are systematically maintained as required by 49 CFR Part 396. Furthermore, drivers are instructed in the safe operation of the vehicles and satisfy the driver qualification and education requirements of 49 CFR Parts 391 (Qualification of Drivers), 392 (Driving of Commercial Motor Vehicles), and 395 (Hours of Service).
- Hazardous Waste Training – Veolia drivers are provided training as required by USEPA and USDOT for the management and transportation of hazardous wastes. Specifically, drivers are trained in the management, classification, and use of the manifest for transporting hazardous wastes (40 CFR Parts 261 – 263). In addition, drivers are provided training as hazmat employees in accordance with the hazardous materials regulations in 49 CFR Part 172, Subpart H.
