HAZARDOUS WASTE TRANSPORTER PERMIT APPLICATION

Instructions: You must complete this application in its entirety and attach all applicable documentation.

(**Note:** For applicants renewing an existing permit, this application requires the submission of updated information and documentation.)

The application must be signed by the company owner or a corporate officer. A check payable to the "State of Delaware" must accompany this application.

Delaware Department of Natural Resources and Environmental Control
Compliance and Permitting Section
89 Kings Highway
Dover, DE 19901

1. Type of Permit

☐ New – Submit a check or money order, payable to the "State of Delaware," in the amount of \$350.00.

☒ Renewal: Permit # DE-HW- 0255 Expiration Date 12/31/2025

Please indicate the term for which you desire your permit to be issued. Submit a check or money order, payable to the "State of Delaware," for the indicated permit fee.

☐ One Year - \$350.00

☐ Two Years - \$650.00

☒ Three Years - \$950.00

☐ Four Years - \$1250.00

☐ Five Years - \$1550.00

2. Release to Public:

Do you wish to be included on the list of transporters that is provided to persons requesting a list of Delaware permitted hazardous waste transporters? ☒ Yes ☐ No

3. Company Information:

Company Name: Safety Kleen Systems, Inc

Location Address:	Mailing Address:
42 Longwater Drive	PO Box 9149
Norwell, MA 02061	Norwell, MA 02061

Contact Person: Kevin Ridings Title: EVP Trans Compliance and Logistics

Business Phone: 781-792-5000 Fax: 781-792-1006

E-mail: permitsus@cleanharbors.com 24 hr. Emergency Phone: 800-645-8265

EPA Identification Number: TXR00081205

Employer's Federal Tax ID Number: 39-6090019

4. Type of Company: (Check One)

- ☐ Proprietorship
☐ Partnership
☒ Corporation – City, State and Date of Incorporation: Wisconsin 7/12/63
☐ Municipality
☐ Public Institution
☐ Other – Explanation: _____

5. Parent Company Information:

Parent Company Name: Clean Harbors, Inc
Parent Company Address: 42 Longwater Drive
Norwell, MA 02061

6. Ownership/Stockholder Information:

For each owner, partner, or corporate officer, list the name, title, home address, and date of birth.

☒ List of owners, partners, or corporate officers: Attachment 1

List the name and address of all stockholders owning greater than 5% outstanding shares.

- ☐ List of stockholders: Attachment _____
☒ Not Applicable

7. Company Affiliations:

List all other companies owned by the same owners, corporate officers, or parent company that are engaged in the business of solid or hazardous waste transportation, treatment, storage, disposal, recovery, or reclamation.

- ☒ List of company affiliates: Attachment 2
☐ No company affiliates

8. Type of Hazardous Waste to be Transported:

Indicate the waste types to be transported. (Note: Characteristic and listed hazardous wastes identified in Delaware's *Regulations Governing Hazardous Waste* (DRGHW) Part 261 are equivalent to RCRA 40 CFR Part 261 wastes.) Check all that apply.

- ☒ Part 261 characteristic or listed hazardous wastes
☒ Used or waste oils (as defined by Part 279, Used Oil Management Standards)
☒ Spent antifreeze exhibiting a characteristic of hazardous waste
☒ PCB-contaminated hazardous waste
☒ Spent fluorescent lighting tubes and ballasts when managed as non-universal waste

9. Treatment, Storage, and Disposal Facilities:

List all treatment, storage, and disposal facilities that have agreed to accept the hazardous wastes identified above.

- ☒ List of treatment, storage, and disposal facilities: Attachment 3

10. Other Transporter Permits:

List all hazardous waste transporter permits held in other states.

- ☒ List of transporter permits: Attachment 4
☐ No hazardous waste transporter permits held in other states

11. Federal DOT and Motor Carrier Numbers:

Indicate your Federal DOT number and Motor Carrier number:

DOT# 151288 MC# 502328

12. Proof of Insurance:

The transporter identified in this application must meet or exceed minimum insurance requirements as set forth in DOT Title 49 CFR Part 387. The DNREC Compliance and Permitting Section must be identified as the certificate holder. Also include a current MCS-90 endorsement or affirmation that the endorsement is still in effect.

- ☒ Certificate of insurance and MCS-90: Attachment 5

13. Spill Control and Safety Equipment:

List all spill control and safety equipment that will be carried on each vehicle.

☒ List of spill control and safety equipment: Attachment 6

14. Spill Control Plan:

Attach a copy of the Spill Control Plan that describes prevention, containment, and clean up procedures during transportation. The plan must demonstrate compliance with the requirements outlined in DRGHW Sections 263.30, 263.31, and 263.105. **Spill Control Plans must contain the following Delaware Emergency Reporting Telephone Numbers: 1-800-662-8802 and 302-739-9401.**

☒ Spill Control Plan: Attachment 6

15. Driver Training:

Attach a copy of your driver training program. All drivers must be trained in current DOT Motor Carrier Safety Regulations and have knowledge of the proper handling procedures for the type of waste transported, the hazardous waste manifest system, and safe vehicle operation as provided in 49 CFR Parts 383, 390 – 399, and DRGHW Section 263.104. All drivers must be familiar with the approved Spill Control Plan.

☒ Driver Training Program: Attachment 7

16. Controlled Substance Testing:

Do you maintain a controlled substance testing program for drivers in your employment (including contract drivers) in compliance with Federal DOT 49 CFR Part 391?

☒ Yes

☐ No, Explain:

--

17. Vehicle Identification Information:

List all vehicles to be used for the transportation of hazardous waste into, out of, or through Delaware. You may use the form provided or another printout that contains all required information.

☒ Vehicle Identification Information: Attachment 8

18. Environmental Record:

List all criminal citations, arrests or convictions, civil or administrative violations, and civil or administrative enforcement actions, and the disposition(s) thereof for the violation or alleged violation of any environmental statute, regulation, permit, license, approval, or order, regardless of the state in which it occurred. Indicate whether it was a local, state, or federal violation or alleged violation. List all such items for the applicant, and if the applicant is other than an individual, for any employee while employed by the applicant or any partner, officer, or director of the applicant as an individual or for any other former business of such partner, officer, or director. For civil or administrative violations or alleged violations, list all such items for the last five (5) years from the date of application.

- ☒ Environmental Record: Attachment 9
☐ Not Applicable – No violations within the specified time period

19. Signature:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attachments, and that upon personal knowledge and information, the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information.

Signature of legal owner or corporate officer

RE: Driver Training

Dear Sir or Madam,

Please accept this letter as certification from Safety Kleen Systems, Inc regarding our company Driver Training requirements:

All drivers are trained under the current DOT Motor Carrier Safety Regulations and have knowledge of the proper handling procedures for the types of waste transporter, the hazardous waste manifest system, and the safe vehicle operation as provided in 49 CFR Parts 383, 390-399 and DRGHW Section 268.104. All drivers are familiar with and carry a current copy of our company Spill Control Plan.

Should you have any questions, please contact me at 781-792-5000.

Sincerely,

Gwendolyn Hill
SVP of Transportation Compliance

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)
10/23/2024

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an **ADDITIONAL INSURED**, the policy(ies) must have **ADDITIONAL INSURED** provisions or be endorsed. If **SUBROGATION** IS **WAIVED**, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

Please note, the expiration date as stated on this form relates to the process for renewing the Information Collection Request for this form with the Office of Management and Budget. This requirement to collect information as requested on this form does not expire. For questions, please contact the Office of Registration and Safety Information, Registration, Licensing, and Insurance Division.

A Federal Agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2126-0008. Public reporting for this collection of information is estimated to be approximately 2 minutes per response, including the time for reviewing instructions, gathering the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Motor Carrier Safety Administration, MC-RRA, Washington, D.C. 20590.

United States Department of Transportation
Federal Motor Carrier Safety Administration

Endorsement for Motor Carrier Policies of Insurance for Public Liability
under Sections 29 and 30 of the Motor Carrier Act of 1980

FORM MCS-90

Issued to SAFETY-KLEEN SYSTEMS, INC. of Norwell, MA
(Motor Carrier name) (Motor Carrier state or province)

Dated at 12:00 midnight on this 1st day of November, 2024

1000679502241

Amending Policy Number: 1000679513241 Effective Date: 11/01/2024

Name of Insurance Company: Starr Indemnity & Liability Company

Countersigned by: Carmella Capital
(authorized company representative)

The policy to which this endorsement is attached provides primary or excess insurance, as indicated for the limits shown (check only one):

- ☒ This insurance is primary and the company shall not be liable for amounts in excess of \$ 5,000,000.00 for each accident.
- ☐ This insurance is excess and the company shall not be liable for amounts in excess of \$ _____ for each accident in excess of the underlying limit of \$ _____ for each accident.

Whenever required by the Federal Motor Carrier Safety Administration (FMCSA), the company agrees to furnish the FMCSA a duplicate of said policy and all its endorsements. The company also agrees, upon telephone request by an authorized representative of the FMCSA, to verify that the policy is in force as of a particular date. The telephone number to call is: (866) 519-2522.

Cancellation of this endorsement may be effected by the company or the insured by giving (1) thirty-five (35) days notice in writing to the other party (said 35 days notice to commence from the date the notice is mailed, proof of mailing shall be sufficient proof of notice), and (2) if the insured is subject to the FMCSA's registration requirements under 49 U.S.C. 13901, by providing thirty (30) days notice to the FMCSA (said 30 days notice to commence from the date the notice is received by the FMCSA at its office in Washington, DC).

Filings must be transmitted online via the Internet at <http://www.fmcsa.dot.gov/urs>.

(continued on next page)

DEFINITIONS AS USED IN THIS ENDORSEMENT

Accident includes continuous or repeated exposure to conditions or which results in bodily injury, property damage, or environmental damage which the insured neither expected nor intended.

Motor Vehicle means a land vehicle, machine, truck, tractor, trailer, or semitrailer propelled or drawn by mechanical power and used on a highway for transporting property, or any combination thereof.

Bodily Injury means injury to the body, sickness, or disease to any person, including death resulting from any of these.

Property Damage means damage to or loss of use of tangible property.

Environmental Restoration means restitution for the loss, damage, or destruction of natural resources arising out of the accidental discharge, dispersal, release or escape into or upon the land, atmosphere, watercourse, or body of water, of any commodity transported by a motor carrier. This shall include the cost of removal and the cost of necessary measures taken to minimize or mitigate damage to human health, the natural environment, fish, shellfish, and wildlife.

Public Liability means liability for bodily injury, property damage, and environmental restoration.

The insurance policy to which this endorsement is attached provides automobile liability insurance and is amended to assure compliance by the insured, within the limits stated herein, as a motor carrier of property, with Sections 29 and 30 of the Motor Carrier Act of 1980 and the rules and regulations of the Federal Motor Carrier Safety Administration (FMCSA).

In consideration of the premium stated in the policy to which this endorsement is attached, the insurer (the company) agrees to pay, within the limits of liability described herein, any final judgment recovered against the insured for public liability resulting from negligence in the operation, maintenance or use of motor vehicles subject to the financial responsibility requirements of Sections 29 and 30 of the Motor Carrier Act of 1980 regardless of whether or not each motor vehicle is specifically described in the policy and whether or not such negligence occurs on any route or in any territory authorized to be served by the insured or elsewhere. Such insurance as is afforded, for public liability, does not apply to injury to or death of the insured's employees while engaged in the course of their employment, or property transported by the insured, designated as cargo. It is understood and agreed that no condition, provision, stipulation, or limitation contained in the policy, this endorsement, or any other endorsement thereon,

or violation thereof, shall relieve the company from liability or from the payment of any final judgment, within the limits of liability herein described, irrespective of the financial condition, insolvency or bankruptcy of the insured. However, all terms, conditions, and limitations in the policy to which the endorsement is attached shall remain in full force and effect as binding between the insured and the company. The insured agrees to reimburse the company for any payment made by the company on account of any accident, claim, or suit involving a breach of the terms of the policy, and for any payment that the company would not have been obligated to make under the provisions of the policy except for the agreement contained in this endorsement.

It is further understood and agreed that, upon failure of the company to pay any final judgment recovered against the insured as provided herein, the judgment creditor may maintain an action in any court of competent jurisdiction against the company to compel such payment.

The limits of the company's liability for the amounts prescribed in this endorsement apply separately to each accident and any payment under the policy because of anyone accident shall not operate to reduce the liability of the company for the payment of final judgments resulting from any other accident.

EMERGENCY RESPONSE RESOURCE BOOK

CLEAN HARBORS STRIKE TEAM

(800.OIL.TANK) 24-Hour Emergency Response Services | 800.645.8265

COMPANY QUALIFICATIONS

Clean Harbors manages over three thousand environmental emergency responses or disaster recovery operations on land and water throughout North America each year. Whether it's a cleanup and removal of a single mercury bottle or a large-scale multiphase containment and cleanup of a coastal oil spill or damage from a hurricane, companies and governmental agencies trust our expertise and technical knowledge to handle any emergency with the highest regard to the environment and health and safety.

Since 1980, Clean Harbors has taken the lead in identifying the most effective, safe, and environmentally sound options for managing environmental emergencies. Our commitment to integrity and high-performance standards has resulted in long-standing business relationships with government agencies, insurance companies, and public/private companies. With more than 100 service locations and over 48 waste management facilities in the North America, Clean Harbors is your single source for the safest and most efficient management of any environmental emergency.

Emergencies can happen anywhere and anytime in facilities, on roadways or in waterways. When time and safety are of the essence, Clean Harbors is ready to take control of your emergency situation and make appropriate decisions that will save you time and money. Depending on the nature of the emergency, Clean Harbors can deploy mobilized central command centers and a national response team. Command centers are fully equipped with communication and computer equipment and utilize a satellite link to Clean Harbors systems allowing the team to effectively coordinate all response activities, even in the most remote locations.

Public and private companies along with local, state, provincial, and federal government agencies trust Clean Harbors to handle their emergency response and disaster recovery needs because they know we have the experience, technical knowledge, and operational resources to get the job done right, while adhering to strict regulatory statutes as well as health and safety standards. From immediate response and containment to cleanup operations, Clean Harbors provides the manpower and equipment, logistical support, ICS/NIMS integration, and operational oversight to manage any size environmental emergency.

Clean Harbors can rapidly deploy hundreds of experienced 40-hour OSHA certified workers to meet the needs of any incident. Whatever the response requires, from Level C through Level A, we handle a wide range of hazardous materials including oil, gasoline, chemical, PCB's, and biological hazards.

Clean Harbors typically responds to over-the-road incidents, punctured lines, tank overflows, leaking drums, and saddle tank spills, to major and catastrophic incidents such as large pipeline ruptures, ship groundings, tanker truck rollovers and facility releases that can easily threaten oceans, rivers, streams and lakes, as well as roadways, facilities, and public areas.

Clean Harbors offers its customers emergency response services along with the necessary backup components to complete an entire project. Services such as environmental remediation including surface remediation, groundwater restoration, underground storage tank management, and site decontamination are essential to successful emergency response activities. Our remedial programs are designed to provide both planned and emergency services to any environmental situation that can develop from an emergency spill.

One call to 800.645.8265 (800.OIL.TANK) from anywhere across North America connects you to Clean Harbors' network of emergency response service centers. With our experience, technical knowledge and vast array of resources, Clean Harbors provides a complete solution. Customers know they are in good hands.

For more information about Clean Harbors and the services we provide, please visit our website at www.cleanharbors.com.

STATEMENT OF PURPOSE

This booklet is provided to assist all those involved in emergency response services. The booklet contains names and phone numbers of key personnel throughout Clean Harbors who may be needed "on" or "off" hours to support an emergency response incident.

The listing will be updated once a year and distributed to managers and supervisors in all divisions involved in emergency response operations.

Clean Harbors Environmental Services, Inc.

Strike Team

42 Longwater Drive

EMERGENCY RESPONSE SERVICES

Clean Harbors Strike Team

Dedicated to helping you prepare and respond.

The Clean Harbors Strike Team is a specialized group dedicated to advancing Clean Harbors within the Emergency Response Industry by helping our customers navigate a crisis. Historically, the team has been associated with managing large events such as Deepwater Horizon or the Avian Bird Flu outbreak, however, this is only part of the team's function.

Did you know

- We perform marine response trainings (aka boom schools) anywhere on the continent
- We want to equip sales and operational teams with industry knowledge and tools
- We provide subject matter experts and crews on projects across the globe
- We provide ICS trained personnel to better integrate Clean Harbors with our customers

Let us help you with:

- Hands on Response Training
- Resource tracking/cost estimates
- ICS Training
- Transportation
- Catering/site support services
- Government Customers
- Trainings and deployments
- ER Trailer buildouts and equipment assessments
- Potential equipment procurement and staging
- Ice Response
- Submerged oil recovery
- Subject Matter Experts

MAJOR EVENT EXPERIENCE

2023

- Train Derailment E. Palestine
- WA Vessel Fire Response

2022

- Matagorda Dredging
- Warehouse Fire Cleanup

2021

- Nashville Creek Cleanup
- Deep River Barge cleanup

2019-2021

- COVID decontaminations throughout US

2018

- Hurricane Florence
- Hurricane Michael

STRIKE TEAM

The Strike Team responds to large scale emergencies where more than the local support is required. The team consists of a Support & Planning crew to assist with large scale event readiness and response, as well as a regional network of managers to assist local Service Centers with response and readiness.

Perhaps the greatest benefit of the Strike Team is the ability to manage a large-scale event without interrupting base business. Local Service Centers can perform and manage the initial response until the transition is made to the Strike Team.

STRIKE TEAM ORGANIZATIONAL CHART:

International Response Team

ENVIRONMENTAL SERVICES

Oil Spill Removal Organization Emergency Response Services

As North America's emergency response leader, Clean Harbors maintains a 24/7 Emergency Operations Center, ready to assist and mobilize highly trained response professionals for environmental or industrial emergencies wherever and whenever they occur. With offices, personnel, and equipment strategically located throughout the United States and Canada, our ability to coordinate, control, and respond to a drill or actual incident is unmatched in the industry.

Clean Harbors holds a U.S. Coast Guard classification as an Oil Spill Removal Organization (OSRO), certified to operate in every U.S. Coast Guard Captain of the Port Zone in the contiguous United States, Alaska and Puerto Rico. Additionally, Clean Harbors is one of only a handful of OSROs to be certified by the U.S. Coast Guard to respond to non-floating oil spills. Sunken oil presents unique and complex challenges; due to our experience, specialized resources, and relationships with other response partners, Clean Harbors can provide the experience and professionalism needed when dealing with these substances.

As a classified OSRO in the River/Canal, Inland, and Great Lakes Operating Environments, Clean Harbors is the go-to provider for any response within the inland environment.

Not only are all Clean Harbors response professionals fully trained to industry and regulatory standards, but they also regularly conduct marine training and deployment exercises utilizing the NIMS Incident Command System (ICS). The ICS model is a standardized on-scene emergency management structure designed to aid in the management of resources during an incident. This allows for seamless integration with regulatory personnel during an actual event.

Satisfy your National Preparedness for Response Exercise Program (NPREP) Requirements

For companies with facilities or vessels that are required to have a U.S. Coast Guard approved Facility Response Plan, signing a Standby Emergency Response Agreement and listing Clean Harbors as an OSRO can help satisfy the requirements of the NPREP. This eliminates the need for a plan holder to own and operate all of its own spill-response equipment. As experts in oil-spill response, Clean Harbors can also assist plan holders in pre-planning strategies to ensure readiness if disaster ever strikes.

- Clean Harbors is a classified OSRO
- Clean Harbors has a vast geographical reach and amount of resources
- Clean Harbors' EOC ensures prompt response to any emergency
- Clean Harbors is also classified as a Non Floating Oil OSRO
- Clean Harbors' personnel are expertly trained

NO. OFFICES 1974 TO 2011	EST. VOLUME OF OIL SPILLS RESPONDED	NO. BOATS	NO. TRUCKS	NO. VESSELS RESPONDED

California Office of Spill Prevention and Response

The OSPR OSRO Program is a voluntary classification under the general state response-plan requirements and is in addition to what is required under the Oil Pollution Act of 1990. Clean Harbors is an approved OSPR OSRO.

Washington State Department of Ecology

Clean Harbors is approved as a Primary Response Contractor (PRC), meeting Washington State oil-spill-response contingency planning requirements. We maintain caches of equipment to support a rapid response to oil spills.

One call to Clean Harbors' Emergency Operations Center at **1.800.645.8265 (1.800.OIL.TANK)** is all it takes to initiate an emergency response effort and take advantage of all Clean Harbors has to offer.

USCG OSRO RATINGS BY CAPTAIN OF THE PORT (COTP) ZONE

Oil Spill Response Organization (OSRO)

Clean Harbors Environmental Services (OSRO #13)

This section contains the latest OSRO Ratings by the US Coast Guard Captain of the Port Zone. While this book is regularly updated, due to turnover of personnel and resources, Clean Harbor's most up to date OSRO ratings by US Coast Guard Captain of the Port Zone can be found on the USCG webpage at the following address:

<http://cgrri.uscg.mil/UserReports/WebClassificationReport.aspx>

1. PURPOSE

This Transportation Emergency Response Procedure was developed by **Clean Harbors** for its affiliated carriers. This procedure is intended to describe the equipment, management procedures and notification guidelines for responding to any release of Dangerous or Hazardous goods/wastes, petroleum oil or other materials that may pollute during the course of transportation over public roadways.

Note: *This procedure is designed to initiate procedures to mitigate or prevent the release of petroleum oil and other hazardous materials/wastes to the environment while waiting for the arrival of an emergency response crew. The information provided by the driver will dictate the level of response needed to effectively respond to the release. Clean Harbors has the internal personnel & equipment to respond to spills from its transport vehicles in addition to a network of third party approved subcontractors used to complement internal resources.*

2. IDENTIFICATION OF HAZARDOUS WASTE AND HAZARDS

Hazardous Waste Type/Class	Physical Properties	Chemical Properties	Toxicological Properties	Human Health Risks	Environmental Risks
Class 1.4 Explosives with no significant blast hazard	May be solid, granular or powder. Please refer to MSDS or NIOSH guide for product specifics.	Reacts with flammable substances and reducing agents. Keep away from ignition sources. Please refer to MSDS or NIOSH guide for specific incompatibilities.	Please refer to MSDS or NIOSH guide for product specific toxicological properties.	Minor explosion hazard with possibility of short-range projectiles/shrapnel. Fire may produce irritating, corrosive and/or toxic gasses Refer to MSDS or NIOSH guide for product specifics.	Fire may produce irritating, corrosive and/or toxic gasses Refer to MSDS or NIOSH guide for product specifics.
Class 2.1 Flammable Gases (e.g. natural gas, acetylene, butane, ethylene, hydrogen, LPG)	May be compressed and/or liquefied-please refer to MSDS or NIOSH guide for specific vapor density, flashpoint and LEL/UEL data.	Reacts with strong oxidizers. Please refer to MSDS or NIOSH guide for specific incompatibilities.	Please refer to MSDS or NIOSH guide for product specific toxicological properties.	Flammable gases under pressure may cause cold exposure injuries (frostbite). Respiratory protection may be required. Flash fire is a significant risk. Ensure no ignition sources are present. Refer to MSDS or NIOSH guide for product specifics.	Gas/ Vapor cloud may migrate significant distances to reach an ignition source. Dependent on vapor density, product may rise and dissipate or pool in low lying areas or vertical accesses. Refer to MSDS or NIOSH guide for specifics.

Hazardous Waste Type/Class	Physical Properties	Chemical Properties	Toxicological Properties	Human Health Risks	Environmental Risks
Class 2.2 Non-flammable/ Non-toxic Gases (e.g. nitrogen, CO2, helium)	May be compressed, liquefied, or pressurized cryogenic. Please refer to MSDS or NIOSH guide for product specifics.	Heat or water may vigorously vaporize the product.	N/A.	Possible asphyxiant due to the exclusion of oxygen.	N/A
Class 2.3 Toxic Gases (e.g. chlorine, fluorine, hydrogen cyanide, ammonia)	May be compressed, liquefied, or pressurized cryogenic. Please refer to MSDS or NIOSH guide for product specifics.	May react with water, oxidizers, acids, organic compounds, or other substances. Please refer to MSDS or NIOSH guide for specific incompatibilities.	Known or presumed to be toxic or corrosive to humans as to pose a hazard to health. Please refer to MSDS or NIOSH guide for product specifics.	Significant inhalation risk. Respiratory protection may be required. Refer to MSDS or NIOSH guide for product specifics.	Gas/ Vapor cloud may migrate significant distances or pool in low laying areas or vertical accesses dependent on vapor density and pose a significant hazard to flora, fauna and other forms of life.
Class 3 Flammable Liquids (e.g. Petrol, kerosene, solvents, dry-cleaning fluid)	Liquid, mixtures of liquids, liquids containing solids in solution or suspension that give off flammable vapor at temperatures below 37.8C or 100.04F	Please refer to MSDS or NIOSH guide for product specifics. Regard should be given regarding solubility, specific gravity, and incompatibilities.	Poses possible inhalation, ingestion, and absorption risks. Please refer to MSDS or NIOSH guide for product specifics.	Poses possible inhalation, ingestion, and absorption risks. Please refer to MSDS or NIOSH guide for product specifics.	Please refer to MSDS or NIOSH guide for product specifics. Regard should be given regarding solubility, specific gravity. Poses a risk to flora, fauna, and other life.

Hazardous Waste Type/Class	Physical Properties	Chemical Properties	Toxicological Properties	Human Health Risks	Environmental Risks
Class 6.2 Infectious Substances (e.g. regulated medical waste, forensic materials, used health care products)	Substances or material infected by pathogens may exist in any form of matter.	Please refer to MSDS or NIOSH guide for specific incompatibilities.	Poses possible inhalation, ingestion, injection, and absorption risks. Please refer to MSDS or NIOSH guide for product specifics.	Possible significant risk via all routes of entry. Respiratory protection may be required. Refer to MSDS or NIOSH guide for product specifics.	Please refer to MSDS or NIOSH guide for product specifics. Regard should be given regarding solubility, specific gravity. Poses a risk to flora, fauna and other forms of life.
Class 8 Corrosives (e.g. sulfuric acid, hydrochloric acid)	Liquid or solid that can dissolve organic tissue or severely corrode certain metals. Please refer to MSDS or NIOSH guide for product specifics	This class includes both acids and bases. Incompatible material may react violently if mixed. Please refer to MSDS or NIOSH guide for specific incompatibilities.	Poses possible inhalation, ingestion, and absorption risks. Please refer to MSDS or NIOSH guide for product specifics	Possible significant risk via all routes of entry. Respiratory protection may be required. Refer to MSDS or NIOSH guide for product specifics	Please refer to MSDS or NIOSH guide for product specifics. Regard should be given regarding solubility, specific gravity. Poses a risk to flora, fauna and other forms of life
Class 8 Batteries	Liquid within a solid can dissolve organic tissue or severely corrode certain metals. Please refer to MSDS or NIOSH guide for product specifics	Please refer to MSDS or NIOSH guide for specific incompatibilities	Poses possible inhalation, ingestion and absorption risks. Please refer to MSDS or NIOSH guide for product specifics	Possible significant risk via all routes of entry. Refer to MSDS or NIOSH guide for product specifics	Please refer to MSDS or NIOSH guide for product specifics. Poses a risk to flora, fauna and other forms of life

Hazardous Waste Type/Class	Physical Properties	Chemical Properties	Toxicological Properties	Human Health Risks	Environmental Risks
Class 9 Miscellaneous	Please refer to MSDS or NIOSH guide for product specifics.	Please refer to MSDS or NIOSH guide for product specifics.	Please refer to MSDS or NIOSH guide for product specifics.	Please refer to MSDS or NIOSH guide for product specifics.	Please refer to MSDS or NIOSH guide for product specifics.
Class 9 Asbestos	May be fibrous or solid. Refer to MSDS or NIOSH guide for product specifics	Please refer to MSDS or NIOSH guide for product specifics	Please refer to MSDS or NIOSH Guide for product specifics	When inhaled in significant quantities, asbestos fibers can cause asbestosis (a scarring of the lungs which makes breathing difficult), mesothelioma (a rare cancer of the lining of the chest or abdominal cavity) and lung cancer	Please refer to MSDS or NIOSH Guide for product specifics. If manufacturing activities release asbestos into the environment, it can contaminate the air (where it can be inhaled), water (where it can be ingested), and soil (where it can easily be disturbed and redistributed into the air
NORMs/TENORMs (Canada Only)	May be solid, granular, powder, viscous liquid, sludge or liquid.	May have chemical constituents. Please refer to MSDS or NIOSH guide for product specifics	Poses possible inhalation, ingestion, and absorption risks.	The ionizing radiation is a known carcinogen. Long-term exposure may have cumulative effects.	May pose a risk to flora, fauna and other forms of life. Potential to leach into water sources.
Waste Oil	Viscous liquid or sludge	Not soluble in water. Please refer to MSDS or NIOSH guide for product specifics	Used oil contaminants may include lead, cadmium, chromium, arsenic, dioxins, benzene and polycyclic aromatics	Poses possible inhalation, ingestion, and absorption risks. May be carcinogenic. Please refer to MSDS or NIOSH guide for product specifics	Poses a risk to flora, fauna and other forms of life

3. CONTINGENCY PLAN FOR IN-TRANSIT RELEASES

1. REFERENCE DOCUMENTS (Available to driver and/or response personnel)

- Current Emergency Response Guidebook ERG (updated every 4 years)
- Shipping Document (Manifest, Bill of Lading)
- On-line waste profile information & Safety Data Sheets
 - Accessed via 24-hour emergency response operator at **1-800-OILTANK**

2. GENERAL RESPONSE PROCEDURES

In the event of a release or the threat of a release from a vehicle, the following procedures are to be followed to mitigate or prevent the release of petroleum oil or other hazardous materials/wastes to the environment.

1. Secure the Area

- Stop/shut down the operation, for example
 - Loading or unloading
 - Transporting
- Keep unauthorized people away from the release area by using physical barriers (i.e. caution tape, pylons) or with the assistance of local officials on the scene.
- Stay upwind.
- Eliminate any ignition sources.

2. Determine the type of material/waste that may be involved by reviewing the shipping paper(s).

- Refer to the current Emergency Response Guidebook for properties of the material including any potential evacuation distances, potential fire or explosion hazards, potential health hazards, and/or potential personnel protective equipment that first responders may need.
- When deploying spill containment control materials (i.e. poly sheeting, suitable absorbent material spill containment pail to catch inconsequential drips) ensure that you don your protective Tyvec suit, chemical resistant gloves, hard hat and protective eyewear as a precaution (refer to SDS for full list of required PPE).
- Please note that your initial role is to simply secure the vehicle, keep unauthorized individuals away from the scene and deploy, if safe to do so, necessary initial spill containment controls to protect sensitive areas (storm drains, culverts, pervious surfaces).
- Remember you are not to attempt to remediate the release or to enter the cargo space of a waste hauling vehicle to identify the source of a suspected release. Take those steps that are necessary to secure the scene and initiate notification procedures and have all available shipping papers and related documents needed for first responders to safely determine a response plan.

3. Attempt to locate the source of the release and the extent of the contamination.

4. Determine the volume and rate of release (e.g. slow leak up to a catastrophic failure).

5. Identify which category the release falls into:

	Issued By: Transportation Compliance		Document Control No: TC. 000101-V18	
	Revised By: Transportation Compliance		Revision Date: 10/22/2024	Revision No: 19
	Owner: SVP of Transportation Compliance		Document Name: In-Transit Emergency Response Plan	

a. Category 1

- i. Minor Release (e.g. faulty valve)
- ii. 0-5 gallons or 0-23 liters released
- iii. Includes those inconsequential incidental slops & drips of material characteristic to daily servicing of our clients and which can readily and safely be managed by the respective driver with no adverse effect or requirement to make notification to the regulatory agency

b. Category 2

- i. Serious Release (e.g. container failure)
- ii. 5-55 gallons or 23-250 liters released
- iii. All Dangerous Goods Class 2,3,4,5, 6, 8 and 9
- iv. Any release requiring an immediate notification to Agency, see section D "Notification Procedures"

c. Category 3

- i. Major Release (e.g. tank failure)
- ii. > 55 gallons or > 250 liters released

REMEMBER: The first priority of any emergency response is life & health. If you do not have adequate information or personnel protective equipment, do not approach the release. Do not enter the material/waste hauling portion of the vehicle under any circumstances. These areas may be defined as a "confined space" and require specific Health & Safety safeguards before entering the space.

3. CONTAIN THE RELEASE

Category 1 – Minor

1. Undertake initial response actions to halt the release of the oil or other material and contain its spread using absorbent material, physical barriers, containment pail, etc. if it is safe to do so.
2. Look for storm drains, manhole covers and other vertical access points and dike off or dam to prevent material from entering these areas.
3. Take those actions to protect public health, safety and the environment that can be taken without compromising your safety or the safety of others.
4. Initiate notification procedures.

Category 2 - Serious

1. Undertake initial response actions to halt the release of the oil or other material and contain its spread using absorbent materials, physical barriers, containment device, etc.
2. Look for storm drains, manhole covers and other vertical access points and dike off or dam to prevent material from entering these areas.

	Revised By: Transportation Compliance	Revision Date: 10/22/2024	Revision No: 19	Page 12 of 32
	Owner: SVP of Transportation Compliance	Document Name: In-Transit Emergency Response Plan		

3. Take those actions to protect public health, safety and the environment that can be taken without compromising your safety or the safety of others.
4. Initiate notification procedures

Category 3 - Major

1. Look for storm drains, manhole covers and other vertical access points and dike off or dam to prevent material from entering these areas.
2. Take those actions to protect public health, safety and the environment that can be taken without compromising your safety or the safety of others.
3. Initiate notification procedures.

4. NOTIFICATION PROCEDURES

1. The driver is to immediately notify Clean Harbors Driver Manager at his/her home office and provide his/her name, address & phone number. If after hours, initial notification is to be made to the Clean Harbors 24-hour emergency response phone number. The driver is to provide the following information:
 - a. Exact location of release;
 - b. Identity of material being released;
 - c. Type of vehicle involved in release along with type of container (s). If a tank is involved, provide volume contained within the vessel;
 - d. Estimated amount of material released, flow rate & current weather conditions on scene;
 - e. Area material was released to (i.e. asphalt, soil, storm drain, etc.);
 - f. Name and address of shipper;
 - g. Shipping document and or manifest numbers.
 - h. Actions taken prior to notification.

Note: If required by the respective jurisdiction, the driver must make an immediate report to the applicable agency (i.e. In British Columbia report to Provincial Emergency Program, PEP, 1-800-663-3456).

2. Driver Manager is then to notify the Clean Harbors' Transportation Compliance Team who will then make appropriate notifications to local, state, provincial, and federal agencies (including National Emergency Response Center when applicable) listed in Appendix 1-3.
3. Driver Manager will then dispatch necessary equipment and personnel from the closest Clean Harbors service center to the scene.

4. PRIORITY PHONE NUMBERS

A. 24 HOUR EMERGENCY RESPONSE Numbers:

Clean Harbors: 1-800-483-3718

or

Safety- Kleen: 1-800-468-1760

B. Home Terminal Dispatcher:

C. If the driver is unable to contact his home dispatcher or the Clean Harbor's/Safety Kleen's 24-Hour emergency response phone number for any reason, he/she will be required to contact the following:

- Local fire and police - (911)
- Applicable state and provincial authorities (See Appendix 1 & 2 & 3).
- USA - National Emergency Response Center (If release exceeds the U.S. DOT reportable quantity. amount):
1-800-424-8302

The National Response Center & Director of the Office of Hazardous Materials Regulations, Materials Transportation Bureau, Department of Transportation, Washington DC must be notified via telephone as soon as practical but no later than 12 hours after an occurrence in which:

- A person is killed or requires hospitalization due to injuries.
- Carrier or property damages exceeds \$50,000
- Accident/spill involved radioactive materials or infections/etiological agents.
- The general public is evacuated for one hour or more.
- A major transportation artery or facility is closed for one hour or more.
- The operational flight plan or routine of an aircraft is altered.
- A release of a marine pollutant in excess of 119 gallons for a liquid or 882 pounds for a solid, Or
- A situation exists in which a continuing danger to life exists at the scene of the incident.
- National Emergency Response Center

1-800-424-8302

1-800-232-0124 (Center for Disease Control – to be called if infectious items are involved).

1-800-424-0300 CHEMTREC

- Canada – CANUTEC 1-613-996-6666
- Generator contact (From Manifest or Bill of Lading)

	Revised By: Transportation Compliance		Revision Date: 10/22/2024	Revision No: 19
	Owner: SVP of Transportation Compliance		Document Name: In-Transit Emergency Response Plan	

5. RESPONSIBLE COMPANY OFFICIAL

The company officials listed in Appendix 5 will be responsible for insuring that all required notifications are made, all required reports are generated and submitted, appropriate emergency response resources are dispatched to the incident scene, appropriate health and safety measures are taken throughout the duration of any response activity and all media involvement is handled in accordance with established company protocols.

NOTE: Clean Harbors will utilize internal spill response teams positioned throughout North America based on proximity to an incident scene. In the event local coverage is not feasible, a 3rd party suitably trained and competent subcontractor (CERCA member in Canada) will be engaged to represent Clean Harbors to address and respond to an incident.

	Issued By: Transportation Compliance		Document Control No: TC. 000101-V18	
	Revised By: Transportation Compliance		Revision Date: 10/22/2024	Revision No: 19
	Owner: SVP of Transportation Compliance		Document Name: In-Transit Emergency Response Plan	

6. SCENARIO CLEAN-UP PROCEDURES

The transporter is responsible for the clean-up of a release that occurred during the course of transportation. Therefore, it is the responsibility of the driver to monitor the scene and take any necessary actions to isolate, contain and control the release and prevent its spread. The driver is required to be in attendance (i.e. on-duty not driving) of the motor vehicle until such time that company personnel arrive to conduct the clean-up operation. At this time, the motor carrier will make the determination as to the duty status of the driver.

A. Actions

Once the emergency response crew arrives at the scene, the following actions will be taken if the release has stopped. If the release is ongoing, measures to transfer remaining product from the damaged or defective vessel to a receiving vessel will be conducted concurrent to the below actions. In the event of a fire resulting in a release, the extinguishing agent run-off will be treated as product contaminated.

1. Material that has been released to impervious surface (i.e. concrete or pavement) will be absorbed using a suitable absorbent such as speedy dry or diatomaceous earth. This material will then be containerized and sent to a fully licensed waste management facility for disposal.
2. Material that has reached any pervious surface such as soil will result in the remediation of the affected area to the extent that all contamination is removed. All material collected as a result of said remediation will be containerized and sent for disposal at a fully licensed waste management facility. In addition, analytical will be conducted by an approved lab (BTEX, PAH etc.) when necessary to determine that all contamination has been removed.
3. Material that has reached a water body such as a stream, river or lake will result in a remediation and mitigation of the affected area to facilitate the removal of all contamination possible through use of absorbents, booms, and physical/vacuum material recovery. All material collected as a result of said remediation will be containerized and sent for disposal at a fully licensed waste management facility. In addition, analytical will be conducted by an approved lab (BTEX, PAH etc.) when necessary to determine that all contamination has been removed.
4. Prior to leaving any site, appropriate backfill will be used to replace any ground cover removed during the clean-up process.
5. Any damaged container involved in an incident will be placed into a suitable salvage drum and shipped to a fully licensed waste management facility for disposal.

B. Equipment Requirements

Every Clean Harbors commercial vehicle (vehicles with GVWR >10,000 #) must have the following equipment readily available and in working condition. Vehicles not found to be in 100% compliance with this part will be placed out of service until such time that the required equipment is secured.

1. (Mandatory) Rated 10 B:C or greater fire extinguisher mounted in the cab of the power unit.
2. (Optional for Non-Haz) Rated 40 B:C or greater fire extinguisher mounted outside of the cab. Each fire extinguisher must be inspected for a valid inspection date and to ensure that it is fully charged.

Note: Extinguishers cannot be mounted inside the cargo-carrying portion of the vehicle. In Canada all highway tanks transporting Class 3 or subsidiary Class 3 MUST have a minimum 40 B:C extinguisher mounted to the tank.

3. Working flashlight or headlamp (other than cell phone).
7. Working 2-way communication (cell phone, satellite phone, CB radio).
8. Set of 3 triangle reflectors (warning signals)
9. Chock block set.
10. First aid kit with 16-ounce eyewash
11. Spare fuses and circuit breakers (as appropriate).
12. Current copy of Clean Harbor's In-Transit Emergency Response Procedures. (This document)

All Clean Harbors commercial vehicles with GVWR >10,001 # must also have available:

1. Current DOT Emergency Response Guidebook (must always be with the manifest and within the reach of the driver while at the controls of the vehicle). (US/CAN)
2. Driver's Pocket Guide to Hazardous Materials. (US)
3. Federal Motor Carrier Safety Regulations. (US)
4. Applicable hazardous waste manifest or shipping document

	Revised By: Transportation Compliance		Revision Date: 10/22/2024	Revision No: 19
	Owner: SVP of Transportation Compliance		Document Name: In-Transit Emergency Response Plan	

5. A spill kit (mounted or otherwise) containing, at minimum:
 - (a) Five (5) gallon bucket w/lid
 - (b) Inert absorbent granular material
 - (c) Absorbent pads, diapers and/or socks
 - (d) Small shovel & broom
 - (e) Six (6) mil poly sheet
 - (f) Garbage bags

6. Personal Protective Equipment containing at minimum:
 - (a) Tyvek or chem suit
 - (b) Nitrile gloves
 - (c) Goggles
 - (d) Other PPE may be specific to the product being transported

7. A One-gallon container of germicide [bleach solution] for those vehicles transporting medical waste.

NOTE: Drivers & Dispatchers: Please be aware that it is your responsibility to ensure that the items on this list are available and in working order before each trip. If any item is missing, do not begin the trip until the required equipment is secured.

	Owner: SVP of Transportation Compliance	Document Name: In-Transit Emergency Response Plan		

7. FOLLOW-UP PROCEDURES

A. Decontamination

Decontamination of all contaminated vehicles, equipment and clothing will be conducted prior to departure from a spill site. Decontamination of a truck or trailer will be conducted by removing all visible liquid or solid contamination. In addition, a suitable decontamination solution will be used to prepare the vehicle for transport to a suitable facility for further decontamination if necessary. The primary goal of the on-site decontamination is to prevent additional material being released to the environment. Equipment used in the clean-up process will be decontaminated using a suitable decontamination solution.

All rinse-ate used in the process will be containerized and sent for disposal at a fully licensed waste management facility.

All contaminated clothing will be containerized and managed in the same manner as the rinse-ate collected from the decontamination of the vehicle and equipment involved in the clean-up procedure.

B. Written Notification Canada Notification

If an immediate report was required to be made for an accidental release, a dangerous goods accident, or a dangerous goods incident, a follow-up report must be made as prescribed by TDG Regulations Part VIII and sent to the Director General within 30 days after the occurrence.

USA Notification

Within 30 days of a discharge of a hazardous waste, a written report will be completed on the form prescribed by the U.S. DOT (DOT 5800.1 spill report) and uploaded to the HAZMATICS system on the PHMSA Portal Access Page. This report will be completed by the Transportation Compliance Department

8. DOT/TDG EMERGENCY RESPONSE GUIDEBOOK

A. Purpose of Guidebook

The current Emergency Response Guidebook is to be used to obtain initial response information (i.e. spill containment, personal protective equipment, first aid, evacuation information) while waiting for emergency response crew to arrive on scene. Federal Regulations require that each driver have this reference document available in the event of a release. The book is updated every 4 years.

B. Four (4) Sections of the Guidebook

There are 4 Sections of the Guidebook:

1. Yellow
Reference Chemical
By UN/NA Number
2. Blue
Reference Chemical by Chemical
3. Orange
Response Information
4. Green
Evacuation Distances

APPENDIX 2

LOUISIANA REPORTING REQUIREMENTS

TRANSPORTATION RELEASE AND INCIDENT REPORTING CRITERIA

RS 32:1510. REPORTING OF INCIDENTS, ACCIDENTS, AND CLEANUPS

- A. Each person involved in an incident, accident, or the cleanup of an incident or accident during the transportation, loading, unloading, or related storage in any place of a hazardous material subject to this Chapter shall report immediately by telephone to the department if that incident, accident, or cleanup of an incident or accident involves:
- (1) A fatality due to fire, explosion, or exposure to any hazardous material.
 - (2) The hospitalization of any person due to fire, explosion, or exposure to any hazardous material.
 - (3)(a) A continuing danger to life, health, or property at the place of the incident or accident under any of the following circumstances:
 - (i) The incident or accident results in the release of a hazardous material, as defined in Title 49 of the Code of Federal Regulations.
 - (ii) As a result of the incident or accident, a bulk package of a regulated hazardous material as defined in Title 49 of the Code of Federal Regulations, comes to rest at an angle forty-five degrees or more from the upright position.
 - (iii) It is deemed necessary to transfer a hazardous material, as defined in Title 49 of the Code of Federal Regulations, from one bulk package to another bulk package on a public highway or within 500 feet of an inhabited building.
 - (b) Vehicles suffering mechanical failures completely unrelated to the transportation container or the material contained therein, shall not be required to notify under this Paragraph.
 - (4) An estimated property damage of more than ten thousand dollars.

E. (1) Notwithstanding any other provision of law to the contrary, the provisions of this Section shall not apply to any incidents, accidents, or cleanup of incidents or accidents that occur within a facility that is subject to the release reporting requirements of R.S. 30:2373(B) and is engaged in activities defined or classified under one or more of the following subsectors, industry groups, or industries of the 1997 North American Industry

Classification System (NAICS):

- (a) 211 (oil and gas extraction)
- (b) 22111 (electric power generation)
- (c) 3221 (pulp, paper, and paperboard mills)
- (d) 324 (petroleum and coal products manufacturing)
- (e) 325 (chemical manufacturing)
- (f) 326 (plastics and rubber products manufacturing)
- (g) 331 (primary metal manufacturing)
- (h) 4953 (refuse systems)
- (i) 4212 (local trucking without storage)
- (j) 4789 (trucking without storage)

(2) Notwithstanding the provisions of Paragraph 1 of this Subsection, this Section shall apply to any carrier involved in any incident, accident, or cleanup of an incident or accident which occurs outside the perimeter of any facility exempted from this Section pursuant to Paragraph 1 of this Subsection.

Any emergency or release notification made to the Hazardous Materials Hotline must be received no later than one hour after the occurrence, depending on the exigency of the circumstances. This is a guideline which places the burden of immediate notification on the responsible party ensuring that timely notification to Local and State government occurs. The purpose of this immediate notification is to ensure the public's safety.

2. **Emergency Report** – Immediate additional report if the release or anticipated release resulted in,
- The death of a person;
 - A person sustaining injuries that required immediate medical treatment by a health care provider;
 - An evacuation of people or their shelter in place; or
 - The closure of:
 - A facility used in the loading and unloading of dangerous goods, or
 - A road, a main railway line or a main waterway.
 - A means of containment has been damaged to the extent that its integrity is compromised; or
 - The center sill or stub sill of a tank car is broken or there is a crack in the metal equal to or greater than 15cm (6 in.).

Immediate additional report to:

- CANUTEC, at 1-888-CANUTEC (1-888-226-8832) or 613-996-6666;
- The consignor or the dangerous goods;

3. **Security Reports** – Immediate report to Canutec at 1-888-CANUTEC (1-888-226-8832) or 613-996-6666 in event of Loss or Theft or Unlawful interference of dangerous goods listed in section 8.16 of TDG regulations.

APPENDIX 5

CLEAN HARBORS TRANSPORTATION COMPLIANCE DEPARTMENT INCIDENT/ACCIDENT REPORTING

**24 Hour Emergency Response #
1-800-483-3718**

Company policy requires that a representative of the Transportation Compliance Department be contacted by phone when a company employee is involved in an accident on either public or private property or when there is a release of any material from a company vehicle in transit. In-transit includes loading, unloading, temporary storage and while being transported. In-transit does not include those times when the transporter is not present, and a vehicle is being loaded and/or unloaded by the facility either accepting a shipment or preparing a shipment for transportation. In this scenario – the reporting is the responsibility of the facility not the transporter.

The expectation is for the responsible party to contact the Transportation Compliance Specialist assigned to the region where the accident/incident occurred. If the primary contact is unavailable, contact the 24 hour Emergency Response operator at the number identified above and you will be placed in contact with an alternate Transportation Compliance Specialist.
