"EMERGENCY PROCEDURE"

DRIVERS GUIDE

HIGHWAY HAZARDOUS WASTE TRANSPORTATION

I. EMERGENCY ACTION: In the event of an on-the-road spill or other emergency, the driver will follow these procedures:

A. Remain with the unit and warn all pedestrians and motorists to stay away from the spill area, pointing out to them the danger involved, and have someone call the police or fire department.

B. Upon the arrival of the police and fire department, the driver will inform them of what kind of material has been spilled and request the area to be blocked off to pedestrians and vehicles to prevent property damage or any serious personal injury.

The driver will request the first responder, fire, or police personnel, to protect the area while the driver reports to an Emergency Coordinator (listed below in the order of calling).

C. The Emergency Coordinator will gather the following information from the driver and relay it to the appropriate Emergency Response Agencies:

1. Name of the person reporting the incident
2. Name, address, and EPA number of the transporter
(PAGE E.T.C., INC., EPA number NYD 9869947).
3. Phone number where the person reporting can be reached
4. Date, Time, and Location of the incident
5. The extent of injuries if any
6. Mode of transportation and type of transport vehicles involved
7. Classification, name, and quality of any hazardous material/ wastes involved, if such information is available.
8. The Generators emergency response phone number off the shipping papers/waste manifest
9. Type of incident and nature of the hazardous material/waste involvement and whether a continuing danger exists at the scene
10. For each waste product involved provide:
 - a) Name and EPA number of the generator
 - b) Product shipping hazardous class
 - c) Estimated quality of material spilled
 - d) If possible, the extent of contamination to land, water, or air
11. Shipping name, hazardous class and identification number of any other material carried.

EMERGENCY RESPONSE CONTRACTOR

CHEMTREC

1-800-424-9300

CHEMTREC is a service of the chemical industry, which ensures that the industry's capabilities are available in an emergency situation. Callers can be transferred between the NRC and CHEMTREC to obtain the needed services.

Specific actions to be taken at the scene of the spill:

- 1.) **CONTAINMENT** The critical problem is to prevent the escape of any spilled solid into the ground or into a storm or sanitary sewer. Containment of solids will be dependent on wind and weather conditions. Use the trailer tarpaulin in the vehicle and/or plastic if conditions are wet and windy.

Simultaneously, the source of the spill or leak must be located and controlled, if possible.

The possibility of evacuation should be considered in the event of a major spill (e.g., a collision with another vehicle or loaded trailer that has turned over). Major concern involves ignitable wastes that may catch fire and possibly explode or generate toxic fumes. If fire threatens or actually occurs, personnel should be evacuated a distance of at least a half-mile or as recommended by

the Emergency Response Guidebook. If no fire threatens, a distance of 50 to 100 feet should suffice.

If the shipping description is known (refer to the manifests and/or shipping papers), find the name in the "Emergency Response Guidebook" in the blue pages and turn to the corresponding Guide Number (the orange pages- last one third of the book).

If the shipping description is not known, check the placard on the vehicle for a "UN" or an "NA" number, look up the number in the yellow pages of the "Emergency Response Guidebook," and refer to the corresponding guide number- or contact the generator of the waste for safety data.

2.) **CLEANUP** With containment affected and the spillage source controlled, cleanup is the next step. If the spill is contained on an impervious, paved surface, solid material should be collected and any contaminated liquid is absorbed onto a compatible material (e.g., sand, diatomaceous earth). Any of a number of commercial absorbent inert materials may be used, but make sure they are compatible with the waste and will not cause a reaction. If the spillage had reached the earth, all contaminated dirt should be collected for disposal at an EPA approved site.

If any spilled waste has reached the ground, the contaminated soil will be removed. The extent of contamination will be determined by sampling the spill area. A qualified laboratory will analyze the sample. Sampling techniques, chain -of-custody requirements, and analytical methods should follow approved procedures. Any solid exhibiting contamination above the local background level will be removed to an appropriate permitted disposal site.

II. EMERGENCY EQUIPMENT

Each tractor carries the following emergency equipment:

- Gloves
- Goggles
- Tyvek Suits (2-one with booties)
- Slicker Suit (for those who require them)
- Boots
- Hazorb (min 4 pillows)
- Shovel
- Respirator
- Triangle Reflectors
- Flashlight (extra batteries)
- Hard Hat (with full face shield for those who require them)
- First Aid Kit with eye wash
- 10 BC Fire Extinguisher
- Eye Wash (min 32oz)
- Duct Tape
- Polyethylene film
- Pail
- Overpack Drum (for those who require them)
- DOT EMERGENCY RESPONSE GUIDEBOOK

All equipment should be tested and maintained as necessary to assure its proper operation in the event of an emergency. After an emergency, all equipment should be decontaminated, cleaned and fit for its intended use before normal operations resume.

EXTERNAL COMMUNICATIONS

All equipment will have CB RADIOS and/or CELLULAR PHONES

III. FOLLOW-UP PROCEDURES

Two steps remain once the immediate emergency aspects of a spill have been taken care of:

1. DECONTAMINATION

A truck or trailer exposed to a spill will be decontaminated at the site in order to prevent any further release to the extent that it can be transported (or moved under its own power to an authorized facility capable of further decontamination, if necessary.

EQUIPMENT: Equipment will be decontaminated in the following manner:

Each item used will be placed in an open head container and thoroughly rinsed with a compatible solvent or cleaning compound. The residue or wash waste will then be drained into a tight head container, sealed, and disposed of in accordance with Federal and State Regulations at an authorized disposal site.

CLOTHING: Contaminated clothing will be placed with the cleanup residue and disposed of in accordance with Federal and State Regulations at an authorized disposal site. If clothing is reusable, then it will be decontaminated properly, and the residue added to the other waste.

2. NOTIFICATION

The National Response Center and the Director of the Office of Hazardous Materials Regulations, Materials Transportation Bureau, Department of Transportation, Washington, DC 20590, will be notified in the event of:

1. A person is killed or requires hospitalization due to injuries
2. Carrier or property damage exceeds \$50,000
3. Accident/spill involves radioactive materials or etiological agents
4. Notification caused by continuing danger to life

They will be notified in writing of the occurrence and nature of the incident and a copy of the report will be submitted to the appropriate state agency in charge of such matters.

For the state of Alabama a copy of the notice will be submitted to the Alabama Department of Environmental Management, P.O. Box 301463, Montgomery, AL 36130-1463.

IV. SUMMARY OF TRAINING PROGRAM

In preparation for handling hazardous materials and hazardous waste, all drivers and response personnel receive classroom training conducted by trained safety personnel followed by refresher training at least once a year. Attached is a copy of the course outline of classroom training provided to all personnel responsible for the handling and transportation of hazardous waste/materials:

Since the drivers' actions are critical in controlling environmental contamination, their instructions specifically includes:

- a) Inspection of their vehicle before and during trips
- b) Driving rules and prevention of spills
- c) Knowledge of safety and health hazards of material being transported (i.e. bulk, waste, hazardous waste and non-hazardous waste)
- d) Action to be implemented in case of spills, accidents or other emergencies involving hazardous materials and hazardous waste.

All drivers are required to have 24 hours of training prior to hauling any hazardous material or hazardous waste and it is mandatory that each driver has at least an 8-hour refresher course annually.

SPILL RESPONSE KIT

A. Purpose

To provide basic equipment needed for emergency response from each district

B. Logistics

Spill response kits will be located at 2758 Trombley Rd Weedsport, NY 13166

C. Inventory (office)

Three (3) personnel protection kits. (Hard hat, monogoggles, face shield, rubber boots, slicker suits, Tyvek suits, and gloves)

Three (3) full-face respirators with organic/acid vapor canisters

One (1) industrial Type first aid kit

Two (2) sets of triangular load reflectors
Three (3) round point shovels
Three (3) rolls of safety tape
Three (3) each two-cell flashlights and batteries
Two (2) 12-volt Q-beam spotlights
Three (3) rolls of pH paper 1-14 range
One (1) 20 lb dry chemical fire extinguisher
Organic Absorbent
Two (2) overpack salvage drums

All Page ETC drivers are screened before hiring. A complete application is required showing previous employment, education, driving history and accident history. All drivers are required to have their hazardous endorsement on their CDL license and must maintain that endorsement.

All drivers complete an online Hazardous waste training through our driver qualification dashboard Ten street at the time of hire and repeat this training every 3 years.

Every January we run a Motor vehicle report on every driver that is active and review any violations.

All drivers are monitored daily on their electronic log system. We monitor speed and any over hour violation and have an internal point system in place to track these violations.

Below are the areas that are covered by the Hazmat training course:

- HM Introduction to basic requirements
- HM Fueling
- HM reporting crashed and releases.
- HM safety, permits.
- HM routs, route planning
- HM railroad highway grade crossing, tunnels
- HM bulk package
- HM operational requirements
- HM Emergency response

DEFINITIONS AS USED IN THIS ENDORSEMENT

Accident includes continuous or repeated exposure to conditions or which results in bodily injury, property damage, or environmental damage which the insured neither expected nor intended.

Motor Vehicle means a land vehicle, machine, truck, tractor, trailer, or semitrailer propelled or drawn by mechanical power and used on a highway for transporting property, or any combination thereof.

Bodily Injury means injury to the body, sickness, or disease to any person, including death resulting from any of these.

Property Damage means damage to or loss of use of tangible property.

Environmental Restoration means restitution for the loss, damage, or destruction of natural resources arising out of the accidental discharge, dispersal, release or escape into or upon the land, atmosphere, watercourse, or body of water, of any commodity transported by a motor carrier. This shall include the cost of removal and the cost of necessary measures taken to minimize or mitigate damage to human health, the natural environment, fish, shellfish, and wildlife.

Public Liability means liability for bodily injury, property damage, and environmental restoration.

The insurance policy to which this endorsement is attached provides automobile liability insurance and is amended to assure compliance by the insured, within the limits stated herein, as a motor carrier of property, with Sections 29 and 30 of the Motor Carrier Act of 1980 and the rules and regulations of the Federal Motor Carrier Safety Administration (FMCSA).

In consideration of the premium stated in the policy to which this endorsement is attached, the insurer (the company) agrees to pay, within the limits of liability described herein, any final judgment recovered against the insured for public liability resulting from negligence in the operation, maintenance or use of motor vehicles subject to the financial responsibility requirements of Sections 29 and 30 of the Motor Carrier Act of 1980 regardless of whether or not each motor vehicle is specifically described in the policy and whether or not such negligence occurs on any route or in any territory authorized to be served by the insured or elsewhere. Such insurance as is afforded, for public liability, does not apply to injury to or death of the insured's employees while engaged in the course of their employment, or property transported by the insured, designated as cargo. It is understood and agreed that no condition, provision, stipulation, or limitation contained in the policy, this endorsement, or any other endorsement thereon,

or violation thereof, shall relieve the company from liability or from the payment of any final judgment, within the limits of liability herein described, irrespective of the financial condition, insolvency or bankruptcy of the insured. However, all terms, conditions, and limitations in the policy to which the endorsement is attached shall remain in full force and effect as binding between the insured and the company. The insured agrees to reimburse the company for any payment made by the company on account of any accident, claim, or suit involving a breach of the terms of the policy, and for any payment that the company would not have been obligated to make under the provisions of the policy except for the agreement contained in this endorsement.

It is further understood and agreed that, upon failure of the company to pay any final judgment recovered against the insured as provided herein, the judgment creditor may maintain an action in any court of competent jurisdiction against the company to compel such payment.

The limits of the company's liability for the amounts prescribed in this endorsement apply separately to each accident and any payment under the policy because of anyone accident shall not operate to reduce the liability of the company for the payment of final judgments resulting from any other accident.
