## GENERAL CONDITIONS

The permittee must:

1. Carry a copy of this waste transporter permit in each vehicle to transport waste. Failure to produce a copy of the permit upon request is a violation of the permit.
2. Display the full name of the transporter on both sides of each vehicle and display the waste transporter permit number on both sides and rear of each vehicle containing waste. The displayed name and permit number must be in characters at least three inches high and of a color that contrasts sharply with the background.
3. Transport waste only in authorized vehicles. An authorized vehicle is one that is listed on this permit.
4. Submit to the Department a modification application for additions/deletions to the authorized fleet of vehicles. The permittee must wait for a modified permit before operating the vehicles identified in the modification application.
5. Submit to the Department a modification application to add a new waste category or a new destination facility, or to change the current waste or destination facility category. The permittee must wait for a modified permit before transporting new waste types or transporting to new destination facilities.
6. Submit to the Department a modification application for change of address or company name.
7. Comply with requirements for placarding and packaging as set forth in New York State Transportation Law as well as any applicable federal rules and regulations.
8. Contain all wastes in the vehicle so there is no leaking, blowing, or other discharge of waste.
9. Use vehicles to transport only materials not intended for human or animal consumption unless the vehicle is properly cleaned.
10. Comply with requirements for manifesting hazardous waste, regulated medical waste, or low-level radioactive waste as set forth in the New York State Environmental Conservation Law and the implementing regulations. Transporters who provide a pre-printed manifest to a generator/shipper/offeror of regulated waste shall ensure that all information is correct and clearly legible on all copies of the manifest.
11. Deliver waste only to transfer, storage, treatment and disposal facilities authorized to accept such waste. Permittee must demonstrate that facilities are so authorized if requested to do so.
12. Maintain liability insurance as required by New York State Environmental Conservation Law.
13. Maintain records of the amount of each waste type transported to each destination facility on a calendar-year basis. The transporter is obligated to provide a report of this information to the Department at the time of permit renewal, or to any law enforcement officer, if requested to do so.
14. Pay regulatory fees on an annual basis. Non-payment may be cause for revocation or suspension of permit.
15. This permit is not transferrable. A change of ownership will invalidate this permit.
16. This permit does not relieve the permittee from the obligation to obtain any other approvals or permits, or from complying with any other applicable federal, state, or local requirement.
17. Renewal applications must be submitted no less than 30 days prior to the expiration date of the permit to:

## "EMERGENCY PROCEDURE"

### DRIVERS GUIDE

#### HIGHWAY HAZARDOUS WASTE TRANSPORTATION

**I. EMERGENCY ACTION:** In the event of an on-the-road spill or other emergency, the driver will follow these procedures:

A. Remain with the unit and warn all pedestrians and motorists to stay away from the spill area, pointing out to them the danger involved, and have someone call the police or fire department.

B. Upon the arrival of the police and fire department, the driver will inform them of what kind of material has been spilled and request the area to be blocked off to pedestrians and vehicles to prevent property damage or any serious personal injury.

The driver will request the first responder, fire, or police personnel, to protect the area while the driver reports to an Emergency Coordinator (listed below in the order of calling).

**EMERGENCY RESPONSE CONTRACTOR**

CHEMTREC

1-800-424-9300

CHEMTREC is a service of the chemical industry, which ensures that the industry's capabilities are available in an emergency situation. Callers can be transferred between the NRC and CHEMTREC to obtain the needed services.

Specific actions to be taken at the scene of the spill:

- 1.) **CONTAINMENT** The critical problem is to prevent the escape of any spilled solid into the ground or into a storm or sanitary sewer. Containment of solids will be dependent on wind and weather conditions. Use the trailer tarpaulin in the vehicle and/or plastic if conditions are wet and windy.

Simultaneously, the source of the spill or leak must be located and controlled, if possible.

The possibility of evacuation should be considered in the event of a major spill (e.g., a collision with another vehicle or loaded trailer that has turned over). Major concern involves ignitable wastes that may catch fire and possibly explode or generate toxic fumes. If fire threatens or actually occurs, personnel should be evacuated a distance of at least a half-mile or as recommended by

the Emergency Response Guidebook. If no fire threatens, a distance of 50 to 100 feet should suffice.

If the shipping description is known (refer to the manifests and/or shipping papers), find the name in the "Emergency Response Guidebook" in the blue pages and turn to the corresponding Guide Number (the orange pages- last one third of the book.

If the shipping description is not known, check the placard on the vehicle for a "UN" or an "NA" number, look up the number in the yellow pages of the "Emergency Response Guidebook," and refer to the corresponding guide number- or contact the generator of the waste for safety data.

2.) **CLEANUP** With containment affected and the spillage source controlled, cleanup is the next step. If the spill is contained on an impervious, paved surface, solid material should be collected and any contaminated liquid is absorbed onto a compatible material (e.g., sand, diatomaceous earth). Any of a number of commercial absorbent inert materials may be used, but make sure they are compatible with the waste and will not cause a reaction. If the spillage had reached the earth, all contaminated dirt should be collected for disposal at an EPA approved site.

If any spilled waste has reached the ground, the contaminated soil will be removed. The extent of contamination will be determined by sampling the spill area. A qualified laboratory will analyze the sample. Sampling techniques, chain -of-custody requirements, and analytical methods should follow approved procedures. Any solid exhibiting contamination above the local background level will be removed to an appropriate permitted disposal site.

## **II. EMERGENCY EQUIPMENT**

Each tractor carries the following emergency equipment:

- Gloves
- Goggles
- Tyvek Suits (2-one with booties)
- Slicker Suit (for those who require them)
- Boots

---

- Hazorb (min 4 pillows)
- Shovel
- Respirator
- Triangle Reflectors
- Flashlight (extra batteries)
- Hard Hat (with full face shield for those who require them)
- First Aid Kit with eye wash
- 10 BC Fire Extinguisher
- Eye Wash (min 32oz)
- Duct Tape
- Polyethylene film
- Pail
- Overpack Drum (for those who require them)
- DOT EMERGENCY RESPONSE GUIDEBOOK

All equipment should be tested and maintained as necessary to assure its proper operation in the event of an emergency. After an emergency, all equipment should be decontaminated, cleaned and fit for its intended use before normal operations resume.

## **EXTERNAL COMMUNICATIONS**

All equipment will have CB RADIOS and/or CELLULAR PHONES

### III. FOLLOW-UP PROCEDURES

Two steps remain once the immediate emergency aspects of a spill have been taken care of:

#### 1. DECONTAMINATION

A truck or trailer exposed to a spill will be decontaminated at the site in order to prevent any further release to the extent that it can be transported (or moved under its own power to an authorized facility capable of further decontamination, if necessary.

**EQUIPMENT:** Equipment will be decontaminated in the following manner:

Each item used will be placed in an open head container and thoroughly rinsed with a compatible solvent or cleaning compound. The residue or wash waste will then be drained into a tight head container, sealed, and disposed of in accordance with Federal and State Regulations at an authorized disposal site.

**CLOTHING:** Contaminated clothing will be placed with the cleanup residue and disposed of in accordance with Federal and State Regulations at an authorized disposal site. If clothing is reusable, then it will be decontaminated properly, and the residue added to the other waste.

#### 2. NOTIFICATION

The National Response Center and the Director of the Office of Hazardous Materials Regulations, Materials Transportation Bureau, Department of Transportation, Washington, DC 20590, will be notified in the event of:

1. A person is killed or requires hospitalization due to injuries
2. Carrier or property damage exceeds \$50,000
3. Accident/spill involves radioactive materials or etiological agents
4. Notification caused by continuing danger to life

They will be notified in writing of the occurrence and nature of the incident and a copy of the report will be submitted to the appropriate state agency in charge of such matters.

For the state of Alabama a copy of the notice will be submitted to the Alabama Department of Environmental Management, P.O. Box 301463, Montgomery, AL 36130-1463.

#### **IV. SUMMARY OF TRAINING PROGRAM**

In preparation for handling hazardous materials and hazardous waste, all drivers and response personnel receive classroom training conducted by trained safety personnel followed by refresher training at least once a year. Attached is a copy of the course outline of classroom training provided to all personnel responsible for the handling and transportation of hazardous waste/materials:

Since the drivers' actions are critical in controlling environmental contamination, their instructions specifically includes:

- a) Inspection of their vehicle before and during trips
- b) Driving rules and prevention of spills
- c) Knowledge of safety and health hazards of material being transported (i.e. bulk, waste, hazardous waste and non-hazardous waste)
- d) Action to be implemented in case of spills, accidents or other emergencies involving hazardous materials and hazardous waste.

All drivers are required to have 24 hours of training prior to hauling any hazardous material or hazardous waste and it is mandatory that each driver has at least an 8-hour refresher course annually.

**Subject:** [EXTERNAL] Delaware Hazardous Waste Transporter Permit Application

Hello,

Thank you for submitting your application to obtain your Delaware hazardous waste transporter permit. Upon review, I have found that some information is missing or needs to be updated. Please address the items listed below:

- **Section 12-** The certificate of Insurance that you submitted is missing DNREC-89 Kings Hwy SW, Dover, DE 19901 as the certificate holder.
- **Section 17-** Please provide an updated vehicle list:
  - The list for trucks needs to be updated on the following:
    - Missing the model and year for each truck.
    - All VINS are cut off.
    - Missing the manufacturer's GVWR.
    - What does CARR mean in the ownership section for trucks? If not owned by the company please provide lease agreements.

Please provide the information requested above via e-mail within five (5) days.
