7. Company Affiliations:

List all other companies owned by the same owners, corporate officers, or parent company that are engaged in the business of solid or hazardous waste transportation, treatment, storage, disposal, recovery, or reclamation.

- ☒ List of company affiliates: Attachment 2
No company affiliates

8. Type of Hazardous Waste to be Transported:

Indicate the waste types to be transported. (Note: Characteristic and listed hazardous wastes identified in Delaware's *Regulations Governing Hazardous Waste* (DRGHW) Part 261 are equivalent to RCRA 40 CFR Part 261 wastes.) Check all that apply.

- ☒ Part 261 characteristic or listed hazardous wastes
☒ Used or waste oils (as defined by Part 279, Used Oil Management Standards)
☒ Spent antifreeze exhibiting a characteristic of hazardous waste
☒ PCB-contaminated hazardous waste
☒ Spent fluorescent lighting tubes and ballasts when managed as non-universal waste

9. Treatment, Storage, and Disposal Facilities:

List all treatment, storage, and disposal facilities that have agreed to accept the hazardous wastes identified above.

- ☒ List of treatment, storage, and disposal facilities: Attachment 3

10. Other Transporter Permits:

List all hazardous waste transporter permits held in other states.

- ☒ List of transporter permits: Attachment 4
No hazardous waste transporter permits held in other states

11. Federal DOT and Motor Carrier Numbers:

Indicate your Federal DOT number and Motor Carrier number:

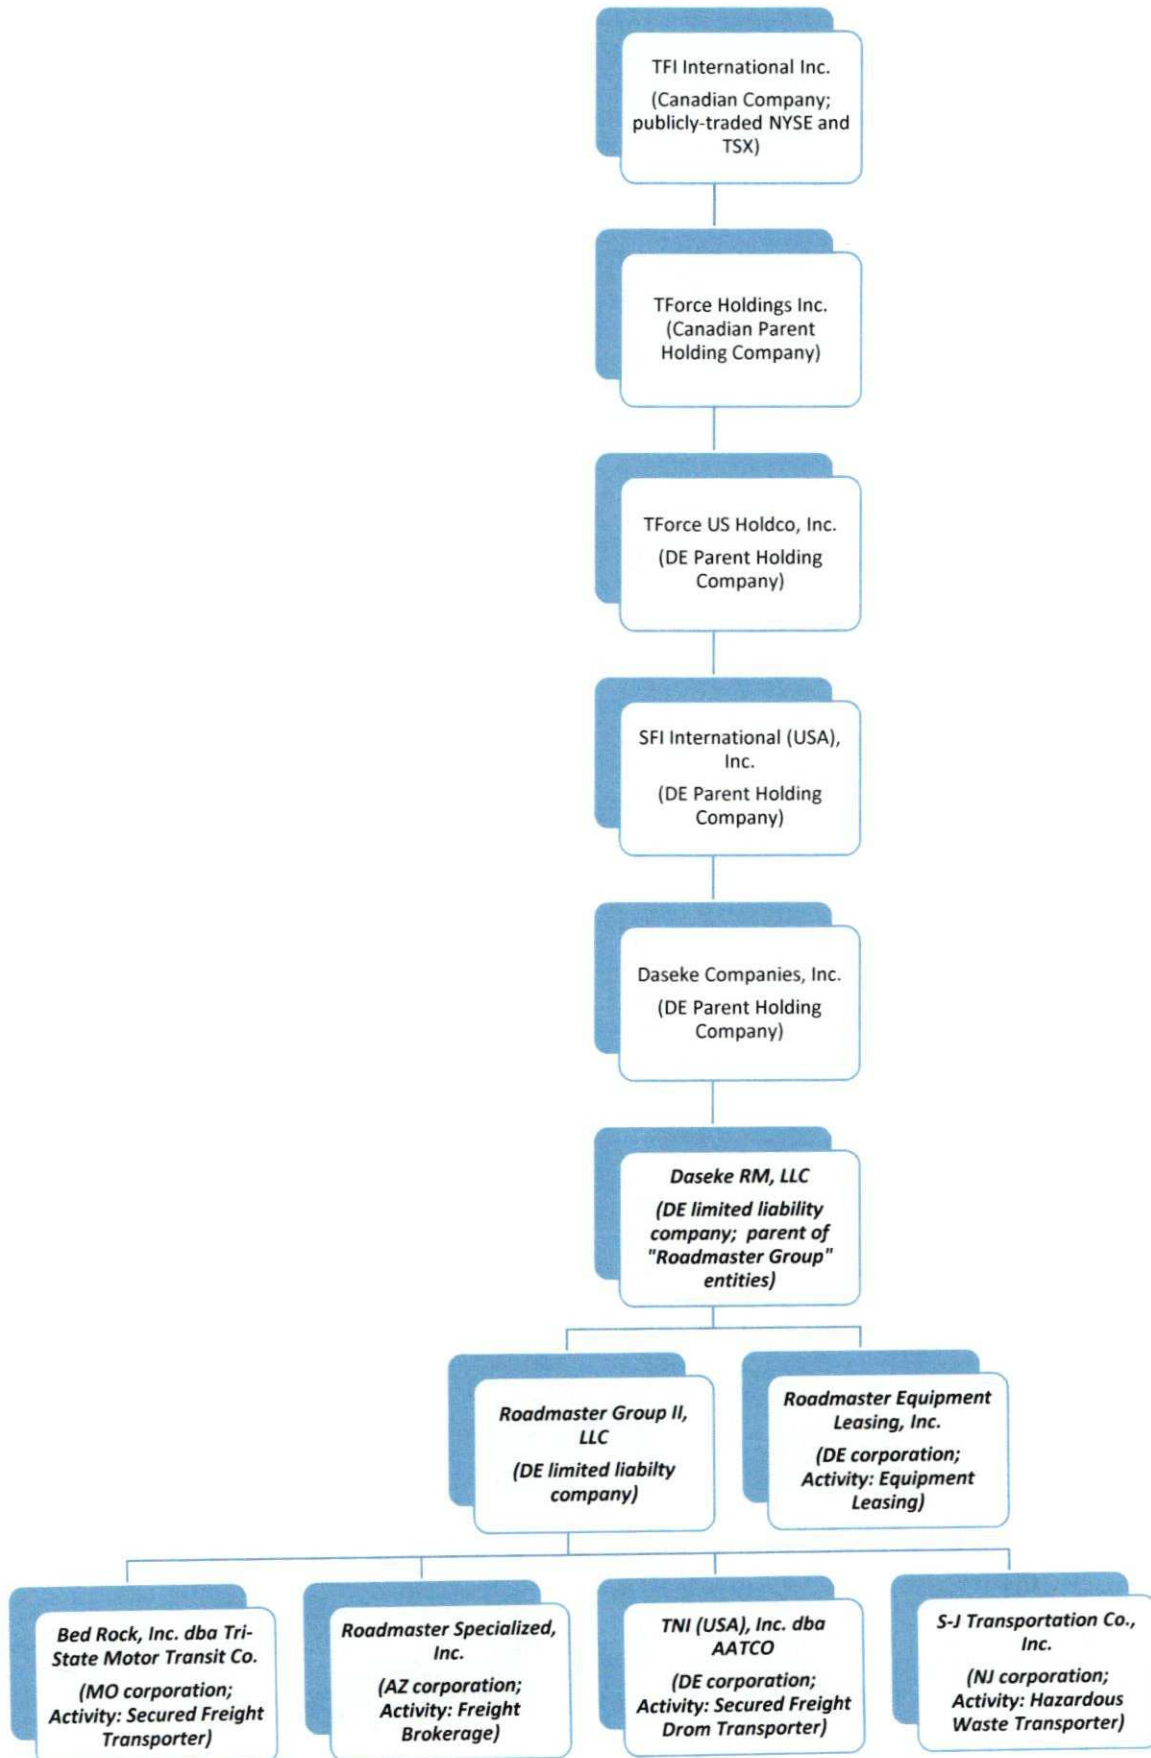

DOT# 513601 MC# 0256500

12. Proof of Insurance:

The transporter identified in this application must meet or exceed minimum insurance requirements as set forth in DOT Title 49 CFR Part 387. The DNREC Compliance and Permitting Section must be identified as the certificate holder. Also include a current MCS-90 endorsement or affirmation that the endorsement is still in effect.

- ☒ Certificate of insurance and MCS-90: Attachment 5

Please note, the expiration date as stated on this form relates to the process for renewing the Information Collection Request for this form with the Office of Management and Budget. This requirement to collect information as requested on this form does not expire. For questions, please contact the Office of Registration, Registration Division.

A Federal Agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2126-0008. Public reporting for this collection of information is estimated to be approximately 2 minutes per response, including the time for reviewing instructions, gathering the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Motor Carrier Safety Administration, MC-RRA, Washington, D.C. 20590.

United States Department of Transportation
Federal Motor Carrier Safety Administration

**Endorsement for Motor Carrier Policies of Insurance for Public Liability
under Sections 29 and 30 of the Motor Carrier Act of 1980**

FORM MCS-90

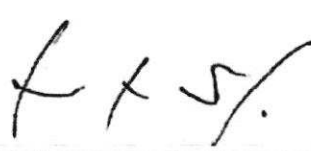

Issued to TNI (USA), Inc. dba AATCO
(Motor Carrier name)

of MO
(Motor Carrier state or province)

Dated at Wilmington, DE 19803 on this 30th day of April, 20 26.

Amending Policy Number: XSA H08891850 Effective Date: 05/01/2026

Name of Insurance Company: ACE American Insurance Company

Countersigned by: 

(authorized company representative)

The policy to which this endorsement is attached provides primary or excess insurance, as indicated for the limits shown (check only one):

- ☐ This insurance is primary and the company shall not be liable for amounts in excess of \$ _____ for each accident.
- ☒ This insurance is excess and the company shall not be liable for amounts in excess of \$ 3,000,000 for each accident in excess of the underlying limit of \$ 2,000,000 for each accident.

Whenever required by the Federal Motor Carrier Safety Administration (FMCSA), the company agrees to furnish the FMCSA a duplicate of said policy and all its endorsements. The company also agrees, upon telephone request by an authorized representative of the FMCSA, to verify that the policy is in force as of a particular date. The telephone number to call is: 215 - 640 - 4555.

Cancellation of this endorsement may be effected by the company or the insured by giving (1) thirty-five (35) days notice in writing to the other party (said 35 days notice to commence from the date the notice is mailed, proof of mailing shall be sufficient proof of notice), and (2) if the insured is subject to the FMCSA's registration requirements under 49 U.S.C. 13901, by providing thirty (30) days notice to the FMCSA (said 30 days notice to commence from the date the notice is received by the FMCSA at its office in Washington, DC).

Filings must be transmitted online via the Internet at <https://portal.fmcsa.dot.gov/UrsRegistrationWizard/>.

(continued on next page)

DEFINITIONS AS USED IN THIS ENDORSEMENT

Accident includes continuous or repeated exposure to conditions or which results in bodily injury, property damage, or environmental damage which the insured neither expected nor intended.

Motor Vehicle means a land vehicle, machine, truck, tractor, trailer, or semitrailer propelled or drawn by mechanical power and used on a highway for transporting property, or any combination thereof.

Bodily Injury means injury to the body, sickness, or disease to any person, including death resulting from any of these.

Property Damage means damage to or loss of use of tangible property.

The insurance policy to which this endorsement is attached provides automobile liability insurance and is amended to assure compliance by the insured, within the limits stated herein, as a motor carrier of property, with Sections 29 and 30 of the Motor Carrier Act of 1980 and the rules and regulations of the Federal Motor Carrier Safety Administration (FMCSA).

In consideration of the premium stated in the policy to which this endorsement is attached, the insurer (the company) agrees to pay, within the limits of liability described herein, any final judgment recovered against the insured for public liability resulting from negligence in the operation, maintenance or use of motor vehicles subject to the financial responsibility requirements of Sections 29 and 30 of the Motor Carrier Act of 1980 regardless of whether or not each motor vehicle is specifically described in the policy and whether or not such negligence occurs on any route or in any territory authorized to be served by the insured or elsewhere. Such insurance as is afforded, for public liability, does not apply to injury to or death of the insured's employees while engaged in the course of their employment, or property transported by the insured, designated as cargo. It is understood and agreed that no condition, provision, stipulation, or limitation contained in the policy, this endorsement, or any other endorsement thereon,

Environmental Restoration means restitution for the loss, damage, or destruction of natural resources arising out of the accidental discharge, dispersal, release or escape into or upon the land, atmosphere, watercourse, or body of water, of any commodity transported by a motor carrier. This shall include the cost of removal and the cost of necessary measures taken to minimize or mitigate damage to human health, the natural environment, fish, shellfish, and wildlife.

Public Liability means liability for bodily injury, property damage, and environmental restoration.

or violation thereof, shall relieve the company from liability or from the payment of any final judgment, within the limits of liability herein described, irrespective of the financial condition, insolvency or bankruptcy of the insured. However, all terms, conditions, and limitations in the policy to which the endorsement is attached shall remain in full force and effect as binding between the insured and the company. The insured agrees to reimburse the company for any payment made by the company on account of any accident, claim, or suit involving a breach of the terms of the policy, and for any payment that the company would not have been obligated to make under the provisions of the policy except for the agreement contained in this endorsement.

It is further understood and agreed that, upon failure of the company to pay any final judgment recovered against the insured as provided herein, the judgment creditor may maintain an action in any court of competent jurisdiction against the company to compel such payment.

The limits of the company's liability for the amounts prescribed in this endorsement apply separately to each accident and any payment under the policy because of anyone accident shall not operate to reduce the liability of the company for the payment of final judgments resulting from any other accident.

--

Type of carriage	Commodity transported	January 1, 1985
(1) For-hire (in interstate or foreign commerce, with a gross vehicle weight rating of 10,001 or more pounds).	Property (nonhazardous)	\$750,000
(2) For-hire and Private (in interstate, foreign, or intrastate commerce, with a gross vehicle weight rating of 10,001 or more pounds).	Hazardous substances, as defined in 49 CFR 171.8, transported in cargo tanks, portable tanks, or hopper-type vehicles with capacities in excess of 3,500 water gallons; or in bulk Division 1.1, 1.2, and 1.3 materials, Division 2.3, Hazard Zone A, or Division 6.1, Packing Group I, Hazard Zone A material; in bulk Division 2.1 or 2.2; or highway route controlled quantities of a Class 7 material, as defined in 49 CFR 173.403.	\$5,000,000
(3) For-hire and Private (in interstate or foreign commerce, in any quantity; or in intrastate commerce, in bulk only; with a gross vehicle weight rating of 10,001 or more pounds).	Oil listed in 49 CFR 172.101; hazardous waste, hazardous materials, and hazardous substances defined in 49 CFR 171.8 and listed in 49 CFR 172.101, but not mentioned in (2) above or (4) below.	\$1,000,000
(4) For-hire and Private (In interstate or foreign commerce, with a gross vehicle weight rating of less than 10,001 pounds).	Any quantity of Division 1.1, 1.2, or 1.3 material; any quantity of a Division 2.3, Hazard Zone A, or Division 6.1, Packing Group I, Hazard Zone A material; or highway route controlled quantities of a Class 7 material as defined in 49 CFR 173.403.	\$5,000,000

*The schedule of limits shown does not provide coverage. The limits shown in the schedule are for information purposes only.

13. Spill Control and Safety Equipment:

List all spill control and safety equipment that will be carried on each vehicle.

☒ List of spill control and safety equipment: Attachment 6

14. Spill Control Plan:

Attach a copy of the Spill Control Plan that describes prevention, containment, and clean up procedures during transportation. The plan must demonstrate compliance with the requirements outlined in DRGHW Sections 263.30, 263.31, and 263.105. **Spill Control Plans must contain the following Delaware Emergency Reporting Telephone Numbers: 1-800-662-8802 and 302-739-9401.**

☒ Spill Control Plan: Attachment 7

15. Driver Training:

Attach a copy of your driver training program. All drivers must be trained in current DOT Motor Carrier Safety Regulations and have knowledge of the proper handling procedures for the type of waste transported, the hazardous waste manifest system, and safe vehicle operation as provided in 49 CFR Parts 383, 390 – 399, and DRGHW Section 263.104. All drivers must be familiar with the approved Spill Control Plan.

☒ Driver Training Program: Attachment 8

16. Controlled Substance Testing:

Do you maintain a controlled substance testing program for drivers in your employment (including contract drivers) in compliance with Federal DOT 49 CFR Part 391?

☒ Yes

No, Explain:

--

17. Vehicle Identification Information:

List all vehicles to be used for the transportation of hazardous waste into, out of, or through Delaware. You may use the form provided or another printout that contains all required information.

☒ Vehicle Identification Information: Attachment 9

TNI (USA) INC dba AATCO

Subject: Spill Control and Safety Equipment

To: Drivers

The following personal protective equipment and related items should be stored for easy access in the event of a spill, leak, or requested for inspection by our customers or other officials.

The following items will be contained within the kit issued:

**Hard Hat
Safety Glasses
Nitrile Gloves
Steel-Toe Boots
2-3" x 4' Socks
10-15" x 18" Pads
Disposal Bags & Ties
Reflective Vest**

In the event you must use any of the above items and need them replaced, contact your driver manager who will coordinate the replacement.

As a part of your pre-trip inspection, be sure all items listed are available.

**Donnie Lester
VP of Safety**

**TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN**

**CONTINGENCY PLAN FOR ACCIDENTS / INCIDENTS INVOLVING
TRANSPORTATION OF EXPLOSIVES, HAZARDOUS WASTES, AND RADIOACTIVE
MATERIAL**

Should TNI (USA) INC dba AATCO become involved in an accident / incident while transporting Explosives, Hazardous Materials and Wastes, or Radioactive Material the following contingency plan will be enacted. This would include any suspicious activity.

**Emergency Response Instructions
To The Driver**

1. If you suspect any suspicious activity, press your panic button for assistance. This way we can eliminate any questions you might have regarding your surroundings. (Do not hesitate to use your Panic Button).
2. Safeguard yourself and others – keep everyone but law enforcement, emergency, fire, and regulatory personnel clear of the area.
3. Protect the scene by setting up warning signals to prevent further incidents.
4. Render first aid or medical assistance first to yourself and/or others as deemed necessary.
5. **AS SOON AS POSSIBLE**, notify the **TNI (USA) INC dba AATCO Safety Department in Joplin, MO at 1-800-723-8768**, local law enforcement, emergency and fire departments. The TNI (USA) INC dba AATCO'S. Safety Department in Joplin, is staffed **24 hours a day, 7 days a week, 365 days a year**, they will access the extent of the emergency and determine the appropriate response action. Immediate notification will be made in accordance with **Appendix A**. TNI (USA) INC dba AATCO Safety Department will advise Customer Service and Operations who will in turn advise the customer. At the earliest practicable moment, the Safety Department will notify:
 - A. **The National Response Center or Department of Transportation** **800-424-8802**
Or 202-267-2675
 - B. **The Environmental Protection Agency Regional Office** **See Appendix B**
 - C. **The Appropriate State Agency**
 - D. **Canadian Shipments-notify CANUTEC** **613-996-6666**
 - E. **Explosives Emergency (Commercial) Bureau of Alcohol, Tobacco, and Firearms** **888-283-2662**
(Loss/Theft) 800-461-8841
 - F. **Explosive Emergency (Government/Other) Notify All Listed:**
 - a. **U.S. Military National Response** **703-697-0218 / 0219**
 - b. **Any "TPS" Shipment (DTTS)** **800-826-0794**
 - c. **Any Accident or Emergency** **800-826-0794**
 - d. **Also notify Army Operation Center (AOC)** **703-695-4695 / 4696**
 - e. **DOD Radioactive Materials, Army Only** **703-695-4695 / 4696**
 - f. **Military (all other dangerous goods)** **800-851-8061**
 - g. **POCs**
SDDC – Mr. Kim Morrison, 618-220-6894
Army – Mr. Craig Coffman, 570-615-7070
AF – Mr. James Frank, 937-257-1984
20th CBRNE Cmd – Mr. Jay Land, 410-436-9719
 - G. The Panic Button must be activated on any "TPS" shipment (DTTS).

**TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN**

IN ORDER TO PROTECT THE INTERESTS OF YOURSELF, TNI (USA) INC dba AATCO, OUR SHIPPERS, AND CONSIGNEES, ABSOLUTELY NO STATEMENTS ARE TO BE GIVEN TO NEWS MEDIA PERSONNEL.

6. Continue to report to Joplin at reasonable intervals and for requesting assistance in the form of personnel, materials, and equipment, as necessary, to assure prompt and effective restoration of the affected areas.
7. Make calls quickly and return immediately to the scene. Make yourself readily available to law enforcement, emergency, fire, and regulatory personnel when they arrive at the scene.
8. Do not allow any person to pick up or otherwise handle containers or packages of hazardous material until authorized to do so by the shipper, manufacturer, or an appropriate government official.
9. Allow only those persons absolutely necessary to deal with the emergency to remain in the area. Keep all bystanders at a safe distance and up wind.
10. Stay out of smoke, mist, dust, or other visible airborne substances.
11. Fight fire from up wind where possible and treat it as if involving toxic fumes. In the case of explosives do not fight the fire. Evacuate the area.
12. Do not eat, drink, smoke, or allow open flames in the immediate area.
13. After putting on proper personal protection equipment, take the appropriate steps to stop the spread of the released hazardous material and minimize the effect (only if advised to do so).

- A. Containment**-The critical problem is to prevent the escape of any spilled liquid or solid onto the ground or into a storm or sanitary sewer. A barrier must be constructed immediately to prevent the escape of spilled material and/or waste liquids, using whatever material is at hand, even a dirt curb to prevent spreading of the spill. Containment of solids will be dependent on wind and weather conditions, use the tarpaulin in the vehicle, or plastic if conditions are wet and windy.

The source of the spill or leak must be located and controlled, i.e., a drum plugged or taped, or turned upside down.

The possibility of evacuation should be considered in the event of a major spill (i.e. a collision with another vehicle or a loaded trailer that has over-turned with subsequent container(s) rupturing). Major concerns involve ignitable wastes that may catch fire and possibly explode or generate toxic fumes. **If a fire threatens or actually occurs, personnel should be evacuated as recommended by the Emergency Response Guidebook. If no fire threatens, and container(s) have ruptured, a distance of 50-100 feet should suffice.**

Check the shipping description from the shipping papers with the name in your Emergency Response Guidebook in the blue pages and turn to the Corresponding Guide Number (orange bordered pages) (also check the green pages for proper distances for toxic material).

- B. Cleanup** – With containment effected and the spillage source controlled, cleanup is the next step. If the spill is contained on an impervious paved surface, material should be absorbed onto a compatible material (i.e. sand diatomaceous earth). Any of a number of commercial absorbent inert materials may be used, but make sure they are compatible with the waste and will not cause a reaction. If the spillage has reached earth, all contaminated dirt should be collected into drums or bags for disposal at an EPA authorized disposal site.

TNI (USA) INC dba AATCO EMERGENCY CONTINGENCY PLAN

If any spilled waste has reached the ground, the contaminated soil will be removed. The extent of contamination will be determined by sampling the spill area. Sampling techniques, chain-of-custody requirements, and analytical methods will follow approved procedures. Any soil exhibiting contamination above the local background level will be removed to an authorized, permitted disposal site.

In addition to contaminated absorbents, dirt, or the like as notes above, damaged containers also present a disposal problem. Special "recovery drums" (oversized fiber salvage drums) will be used for containing the damaged 55-gallon drums. Disposal will be at an authorized disposal site.

14. After the spill is contained (if a small leak) dig up the ground where the spill occurred and place the earth in a recovery drum. The regulatory personnel will determine the amount to be disposed of.

Decontamination – A truck or trailer exposed to a spill or leak will be decontaminated at the site in order to prevent any further release to the extent that it can be transported (or move under its own power) to an authorized facility capable of further decontamination if necessary.

Equipment will be decontaminated in the following manner. Each item used will be placed in an open head container and thoroughly rinsed with a compatible solvent of cleaning compound. The residue or wash water will then be drained into a tight head container, sealed, and disposed of in accordance with Federal and State Regulations at an authorized disposal site.

15. Any clothing will be placed with the clean up residue and disposed of in accordance with Federal and State Regulations at an authorized disposal site. If clothing is reusable, it will be decontaminated properly and the residue added to the other waste.
16. Remain at the scene and available until the emergency is declared over and you are released by both law enforcement officials and regulatory agency personnel and TNI (USA) INC dba AATCO.
17. Do not touch anything that will be eaten or otherwise ingested before thoroughly washing your hands. Shower as soon as possible.
18. A written report as required by 49 CFR Part 171.16 will be sent to the US Department of Transportation, Director of Hazardous Materials Registration, Materials and Transportation Bureau, Washington, DC 20590, by the TNI (USA) INC dba AATCO. Safety Department in Joplin. (Or Designee)

**TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN**

EMERGENCY RESPONSE ORGANIZATION

To determine the proper response to an accident or incident involving the release of hazardous waste and/or materials, it is imperative that such response be based upon detailed, factual information. The gathering and dissemination of such information is the primary function of the **TNI (USA) INC dba AATCO EMERGENCY RESPONSE TEAM** located in **Joplin, MO, 800-234-8768 X 2658**.

The **TNI (USA) INC dba AATCO Emergency Response Team Coordinators** are as follows:

- A. **Safety personnel** will be on duty in **TNI (USA) INC dba AATCO Safety Department** during **normal business hours (800-234-8768 x-2658)** and **Safety personnel** will be on duty (other than normal working hours) at the Gate in **Joplin, MO** at **800-723-8768**.
- B. **Donnie Lester** (VP of Safety) will be on call at **417-621-2658**, cellular # **417-434-0296**.

The Customer Service Representative or the Shift Supervisor on duty is responsible for notifying the shipper of all available information concerning the shipment. The **TNI (USA) INC dba AATCO Emergency Response Team Leader** will assist in this notification with any pertinent technical information. The **TNI (USA) INC dba AATCO Emergency Response Team Leader** will determine from the available information the emergency response required and notify the **EMERGENCY RESPONSE FIELD TEAM*** of the available facts, and for directing them to respond as necessary. Until the **Emergency Response Field Team** arrives at the site of the accident and/or incident, the source of all information and requests for assistance may be the shipper, the consignee, the truck driver, local law enforcement, emergency and fire personnel, or other public official. The decision to mobilize the **EMERGENCY RESPONSE FIELD TEAM** may have to be made without the access to complete and factual information.

On any major accident and/or incident, the **TNI (USA) INC dba AATCO** management group will assign a lead recovery person. This individual shall have the accountability for customer follow through after the notifications have been made.

TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN
APPENDIX A

U. S. DEPARTMENT OF ENERGY

The U. S. Department of Energy (formerly the U. S. Energy Research and Development Administration) can provide assistance on an emergency basis when accidents or incidents occur involving Radioactive Materials.

Regional Coordinating Office, Post Office Address, & Telephone Number for Assistance:

	National Capital Region 202-586-8100

EMERGENCY REPORTING

In the event of an emergency or a hazardous material and/or waste spill during transportation, the transporter will immediately notify the National Response Center, the appropriate State Agency, and the locally affected municipality, with the following information:

1. Name of person reporting the incident.
2. Name, Address, and EPA Identification number of the transporter,

**TNI (USA) INC dba AATCO
8141 E 7th Street
Joplin, MO 64801**

MOR000501981 (EPA ID #)

3. Phone number where person reporting the incident can be reached.
4. Date, Time, and Location of incident.
5. Mode of transportation and type of transport vehicle.
6. A brief description of the incident, including the type of incident.
7. For each waste involved in the spill:
 - A. Name and EPA Identification number of the generator of the waste.
 - B. Shipping Name, Hazard Class, and UN and/or NA number of the waste.
 - C. Estimated quantity of the material of waste spilled.
 - D. The extent of the contamination of land, waters, or airs.
 - E. Name of injured (if any).
8. Shipping Name, Hazard Class, and the UN and/or NA number of any other material carried.

The transporter will submit a written report to other state agencies as required by any such state agency.

Emergency phone number is (512) 458-7460**

PROVINCE OF BRITISH COLUMBIA

In the event of a spill or emergency situation arising during the transportation of **Hazardous Materials** and/or **Waste** in the **Province of British Columbia**, the **TNI (USA) INC dba AATCO Safety Department** will immediately notify the following state agencies:

**Provincial Emergency Spills in B. C.
800-663-3456 (24 hours)
250-387-5956**

**Transport Canada
613-996-6666 (24 hours)**

**Local B.C. Police
604-660-2421
800-663-7867**

**Environment Canada
604-666-6100 (24 hours)**

**Canadian Coast Guard (if near marine water)
604-666-6011 (24 hours)**

**Canutrec
(613) 996-6666**

NOTIFICATION IS REQUIRED FOR ANY AMOUNT OF HAZARDOUS MATERIAL OR WASTE.

**TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN**

GENERAL LOADING RULES

1. A solid can be shipped in a container marked for liquids if the specific gravity, converted to pounds, allows for the weight of the material.
2. A liquid cannot be shipped in a container that is approved for solids only.
3. Liquids, or solids that may liquefy in transit, cannot be shipped in super sacks.
4. Liquids cannot be double-stacked.
5. Super sacks should not be double-stacked without approval from safety.
6. Solids may be double-stacked only when the containers can be properly secured and the total load does not exceed allowable weight limits.
7. Check all lids, bungs, rings or other closure to make sure they are sealed tightly.
8. Ensure that containers are not severely creased or dented, especially in the chimes of the drums.
9. No hazardous materials or residue can be on the outside of the container.
10. No Placards or Markings should be stuck to the outside of the trailer.
(Especially DO NOT STICK PCB Marking to Trailer)
11. If containers are questionable, or not in compliance, politely discuss it with the shipper. If you are not comfortable in that the containers will travel safely, do not leave. Contact the Safety Department if necessary.

**TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN**

SPILL PREVENTION PLAN

Most spills enroute occur due to container condition. The most common conditions contributing to a spill are as follows:

1. Leaking or missing gaskets in open head drums.
2. Fittings (bungs and rings) not sufficiently tightened.
3. Damaged containers failing during shipments.
4. Improper loading.

To avoid spills and delays enroute, you must inspect container conditions during loading.

1. Do not load drums that are badly damaged or wet.
2. Do not load drums that show evidence of leaking or are badly corroded.
3. Tip drums during loading to check gasket and bung seals, except drums containing explosives. If leaking, try to tighten. If still leaking it may need a new gasket. Notify the shipper and call the TNI (USA) INC dba AATCO Safety Department in Joplin immediately.
4. Observe bottom, center of drum, and bottom rim of drum for pinhole leaks.
5. If drum is wet have shipper dry it before loading. Observe area that was wet for leaks.
6. A drum that has a sharp crease (pop can dent), especially through a roller chine, will develop a leak due to metal fatigue. Do not load a creased drum.
7. If you have any questions concerning drum quality or condition, contact your Driver Manager and the TNI (USA) INC dba AATCO Safety Department in Joplin immediately.
8. Tanker's valves shut, hoses drained, all closures checked.
9. Roll-off / End Dump's Doors / lids bolted properly, tarps secured.

During the loading of drums at a customer's dock, observe appropriate loading procedures to be certain that damage to drums or vehicle does not occur. Most spills and leaks occur during loading and unloading.

If material is spilled into your truck, call the TNI (USA) INC dba AATCO Safety Department in Joplin immediately.

Before leaving the shippers facility, review the characteristics, emergency procedures and ERG for the material you are transporting--A few minutes spent at this time could save your life.

TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN
HAZARDOUS MATERIAL / WASTE SPILL NOTIFICATION REQUIREMENTS

49 CFR Part 171.15 requires immediate telephone notification to the U. S. Department of Transportation at 800-424-8802, if during the course of transportation (including loading, unloading, and temporary storage) an incident occurs in which as a direct result of Hazardous Materials:

1. As a direct result of a hazardous material--
 - (i) A person is killed;
 - (ii) A person receives injury requiring admittance to a hospital;
 - (iii) The general public is evacuated for one hour or more;
 - (iv) A major transportation artery or facility is closed or shut down for one hour or more, or
 - (v) The operational flight pattern or routine of an aircraft is altered;

Telephone notification of the US DOT is required if there is a fire, breakage, spillage, or **suspected radioactive contamination occurs** involving shipments of radioactive materials.

If an accident occurs and there is doubt whether it meets any of the above criteria—go ahead and make the notification.

Each notification to the Department of Transportation must include the following information:

1. Name of reporter.
2. Name and Address of carrier represented by reporter.
3. Phone number where reporter can be reached.
4. Date, time, and location of incident including the county.
5. The extent of injuries, if any.
6. Class or division, proper shipping name, and quantity of hazardous materials involved, if such information is available.
7. Type of incident and nature of hazardous material involvement and whether a continuing danger to life exists at the scene.

Upon completion of the notification, a report number will be issued.

In addition to the notifications required by the Department of Transportation, the following notifications are required by the U. S. Environmental Protection Agency, 40 CFR Part 302.6.

The release of a **Hazardous Substance** in a quantity equal to or exceeding the reportable quantity (RQ) shall be reported immediately to The National Response Center at 800-424-8802. A release is defined as any amount of material that is spilled or escapes **INTO THE ENVIRONMENT**. If a Reportable Quantity is released then notification is required. This includes a release that is made up of a mixture or solution and the quantity of one or more of the hazardous constituents of the mixture or solution released equals or exceeds the RQ for the hazardous constituent with the lowest RQ.

TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN

Additional notifications are required under 40 CFR Part 355.40. A release of a hazardous substance in a quantity equal to or exceeding the reportable quantity (RQ) shall be reported immediately to the Community Emergency Response Coordinator for the Local Emergency Planning Committee and the State Emergency Response Commission. Notification to the Community Emergency Coordinator can usually be made by contacting local emergency response personnel such as the Fire Department. The notification requirements required under 40 CFR Part 355.40 may be met by contacting a telephone operator and providing the following to the extent known at the time of the notification:

1. The chemical name or identity of any substance involved in the release.
2. An indication of whether the substance is an extremely hazardous substance.
3. An estimate of quantity of any such substance that was released into the environment.
4. State the time and duration of the release.
5. The medium or media into which the release occurred.
6. Any known or anticipated acute or chronic health risks associated with the emergency and, where appropriate, advice regarding medical attention necessary for exposed individuals.
7. Proper precautions to take as a result of the release, including evacuation (unless such information is readily available to the Community Emergency Coordinator pursuant to the emergency plan).
8. The names and telephone numbers of the individual (or individuals) to be contacted for further information.

The following chart is a breakdown of notification requirements.

Agency	RQ	Fatality	Injuries	PD excess 50M	Evacuation	Road Closure	Flight Diversion
DOT	X	X	X	X	X	X	X
NRC	X						
LEPC	X						
SERC	X						

DOT – Department of Transportation

NRC – National Response Center

LEPC – Local Emergency Planning Committee

SERC – State Emergency Response Commission

TNI (USA) INC dba AATCO EMERGENCY CONTINGENCY PLAN

The first priority when handling leaks or spills is health and safety. TNI (USA) INC dba AATCO drivers are trained to the "First Responder Operations Level" level under the OSHA Hazardous Waste Operations and Emergency Response Rule (HAZWOPER) Standard 29 CFR Part 1910.120. This training is not without limitations. Drivers are not to respond to the following as "First Responder Operations Level":

Poison By Inhalation –	Do Not Enter
Flammable Liquid PGI –	Do Not Enter
Flammable Gas –	Do Not Enter
Toxic Liquids PGI –	Do Not Enter
Corrosive Liquid PGI –	Do Not Enter
Radioactive Material -	Do Not Enter

Employees trained to the "First Responder Operations Level" may take defensive action only such as diking or placing absorbent materials socks to prevent the spill from spreading if it is safe to do so. After defensive measures are in place, the driver should evacuate the area and wait for the emergency response team.

The Emergency Response Coordinator should implement the following spill control and disposal plan.

Spill Control and Disposal Plan

The following Spill Control and Disposal Plan has been promulgated by TNI (USA) INC dba AATCO for implementation in the event it is needed:

Undiked Area Spill Cleanup Procedures

In the event of a spill or leak of liquid hazardous material, the following spill cleanup procedures apply:

Response:

- a. Notify the Emergency Coordinator, Donnie Lester (417) 434-0296.
- b. If the liquid leaked from a drum, follow the Drum Leak Procedure on page 17.
- c. Obtain the clean-up materials and empty DOT specified drums
- d. Contain any flowing waste by drums of absorbent materials (e.g. Zep-o-Zorb)
- e. Spread absorbent over the entire affected area, using sufficient materials to absorb all liquids
- f. Allow 10-15 minutes for absorption, and add more absorbent if the first layer becomes saturated throughout.
- g. Remove absorbent material to working area with a broom to absorb all liquid
- h. Remove remaining absorbent
- i. Dispose of properly as hazardous or non-hazardous waste, as appropriate

**TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN**

Drum Leak Procedure and Dike Area

In the event that a drum is leaking, the following Drum Leak Procedure should be followed:

- a. Identify which drum is leaking
- b. Over pack the drum
- c. If an over pack is not available, patch the drum
- d. Clean up any released chemicals in accordance and place in over pack and properly mark and label the over pack

Disposition of Wastes, Once the Release is Contained

- a. Determine if the wastes are "hazardous" (see b.) or non-hazardous liquid or solid, and dispose of in an appropriate manner.
- b. The wastes are technically "hazardous" if the waste contains heavy metals or constituents in excess of the amounts outlined in 40 CFR 261 including TCLP testing for metals, or if the material is flammable.
- e. Even if the wastes are not technically hazardous but contain significant concentrations of "toxic chemical 3" (e.g. high concentrations of copper) it will still likely be desirable to dispose of these wastes as "hazardous" wastes.

Non-Hazardous Waste Disposal

- a. If the waste is a liquid, solidify if possible using material or some other method and deposit the solids in the TNI (USA) INC dba AATCO dumpster. Do not leave the waste in a drum. Landfills will typically not take liquid wastes whether in a drum or not.
- b. If the waste is a liquid and cannot readily be solidified, contact the Emergency Coordinator for further instructions.

Hazardous Waste Disposal

- a. Arrange for disposal with a local hazardous waste disposal facility. Testing of the waste may be required to define the precise nature of the waste.
- b. Properly prepare and label the waste.
- c. Properly manifest the wastes to the hazardous waste disposal facility

Failure of Licensed Waste Hauler to Act

- a. Immediately notify the Emergency Coordinator.
- b. Call all available licensed waste haulers in order to find one who will act expeditiously and transport the hazardous wastes in a professional manner.

TNI (USA) INC dba AATCO
EMERGENCY CONTINGENCY PLAN

Failure of Licensed Disposal Facility to Accept the Wastes

- a. Determine reason why facility would not accept wastes (e.g. leaking drums, unknown contents, free liquid, improper manifest, etc.)
- b. Make corrections if possible without having waste returned (e.g. paperwork corrections).
- c. If the reason for non-acceptance is regulatory problems at the disposal site, contact your Driver Manager for further instructions.
- d. If the reason for non-acceptance is improper packaging, have the wastes returned to the shipper and repackage the waste as required.
- e. If the above steps do not remedy the situation, or if you have any questions, contact the Emergency Response Coordinator for advice.

Evacuation Plan

The established facility evacuation plan is to be followed for any type of emergency requiring evacuation and may be instituted by anyone who determines that any emergency exists. A building evacuation will be initiated by announcing on the PA system (3 times) for all personnel to evacuate the building via the nearest exit and assemble in the parking lot. The Emergency Coordinators will be responsible for accounting for all personnel, contacting local response agencies, and notifying the Emergency Response Team.

The Emergency Response Team will determine if there is to be a further evacuation from the facility to protect the employees or nearby residents, school, or other facility. The evacuation of persons other than employees will be made through notification by the local fire department, as allowable given the circumstances of the emergency.

TNI (USA) INC dba AATCO
Hazardous Materials/Waste Training Course

As required by the U.S. Department of Transportation, all employees who are involved with the handling or transportation of hazardous materials must be trained in accordance with 49 CFR 172.704 (Subpart H).

The program covers the following subjects:

- ◆ I. Introduction to DOT Hazard Classes
- ◆ II. DOT Tables
- ◆ III. DOT Shipping Descriptions
- ◆ IV. Shipping Papers
- ◆ V. Marking Of Containers
- ◆ VI. Labels
- ◆ VII. Placards
- ◆ VIII. Emergency Response Guidebook (ERG)
- ◆ IX. Separation/Compatibility
- ◆ X. Permits
- ◆ XI. Quality of Containers
- ◆ XII. Safety Procedures
- ◆ XIII. Company Policies and Procedures
- ◆ XIV. Customer Service
- ◆ XV. Emergency Response (Hazardous & Non-Hazardous Spills)

18. Environmental Record:

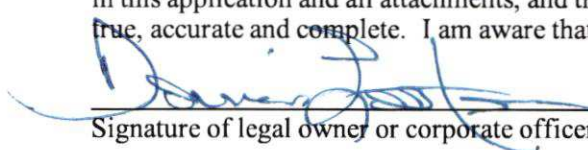

List all criminal citations, arrests or convictions, civil or administrative violations, and civil or administrative enforcement actions, and the disposition(s) thereof for the violation or alleged violation of any environmental statute, regulation, permit, license, approval, or order, regardless of the state in which it occurred. Indicate whether it was a local, state, or federal violation or alleged violation. List all such items for the applicant, and if the applicant is other than an individual, for any employee while employed by the applicant or any partner, officer, or director of the applicant as an individual or for any other former business of such partner, officer, or director. For civil or administrative violations or alleged violations, list all such items for the last five (5) years from the date of application.

Environmental Record: Attachment _____

☒ Not Applicable – No violations within the specified time period

19. Signature:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attachments, and that upon personal knowledge and information, the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information.

Signature of legal owner or corporate officer

Subject: Delaware Hazardous Waste Transporter Permit Application

Hello,

Thank you for submitting your application to obtain your Delaware hazardous waste transporter permit. Upon review, I have found that some information is missing or needs to be updated. Please address the items listed below:

- **Section 12-** The MCS-90 endorsement form policy doesn't match your automotive liability insurance on your certificate of insurance. Please provide an MCS-90 endorsement form that does.
- **Section 17-** Please fill out the vehicle list attached. The vehicle list was missing from your application.

Please provide the information requested above via e-mail within five (5) days.

Thank you,

DaQuan Davis

Endorsement for Motor Carrier Policies of Insurance for Public Liability
under Sections 29 and 30 of the Motor Carrier Act of 1980

FORM MCS-90

Issued to TNI (USA), Inc. dba AATCO of Missouri

(Motor Carrier name)

(Motor Carrier state or province)

Dated at Schaumburg, IL on this 11th day of July, 2026

Amending Policy Number: BAP 0381289-11 Effective Date: 07/01/2026

Name of Insurance Company: Zurich American Insurance Company

Countersigned by: _____

(authorized company representative)

The policy to which this endorsement is attached provides primary or excess insurance, as indicated for the limits shown (check only one):

- ☒ This insurance is primary and the company shall not be liable for amounts in excess of \$ 2,000,000 for each accident.
- ☐ This insurance is excess and the company shall not be liable for amounts in excess of \$ _____ for each accident in excess of the underlying limit of \$ _____ for each accident.

Whenever required by the Federal Motor Carrier Safety Administration (FMCSA), the company agrees to furnish the FMCSA a duplicate of said policy and all its endorsements. The company also agrees, upon telephone request by an authorized representative of the FMCSA, to verify that the policy is in force as of a particular date. The telephone number to call is: 800-382-2150.

Cancellation of this endorsement may be effected by the company or the insured by giving (1) thirty-five (35) days notice in writing to the other party (said 35 days notice to commence from the date the notice is mailed, proof of mailing shall be sufficient proof of notice), and (2) if the insured is subject to the FMCSA's registration requirements under 49 U.S.C. 13901, by providing thirty (30) days notice to the FMCSA (said 30 days notice to commence from the date the notice is received by the FMCSA at its office in Washington, DC).

Filings must be transmitted online via the Internet at <http://www.fmcsa.dot.gov/urs>.

(continued on next page)

DEFINITIONS AS USED IN THIS ENDORSEMENT

Accident includes continuous or repeated exposure to conditions or which results in bodily injury, property damage, or environmental damage which the insured neither expected nor intended.

Motor Vehicle means a land vehicle, machine, truck, tractor, trailer, or semitrailer propelled or drawn by mechanical power and used on a highway for transporting property, or any combination thereof.

Bodily Injury means injury to the body, sickness, or disease to any person, including death resulting from any of these.

Property Damage means damage to or loss of use of tangible property.

Environmental Restoration means restitution for the loss, damage, or destruction of natural resources arising out of the accidental discharge, dispersal, release or escape into or upon the land, atmosphere, watercourse, or body of water, of any commodity transported by a motor carrier. This shall include the cost of removal and the cost of necessary measures taken to minimize or mitigate damage to human health, the natural environment, fish, shellfish, and wildlife.

Public Liability means liability for bodily injury, property damage, and environmental restoration.

The insurance policy to which this endorsement is attached provides automobile liability insurance and is amended to assure compliance by the insured, within the limits stated herein, as a motor carrier of property, with Sections 29 and 30 of the Motor Carrier Act of 1980 and the rules and regulations of the Federal Motor Carrier Safety Administration (FMCSA).

In consideration of the premium stated in the policy to which this endorsement is attached, the insurer (the company) agrees to pay, within the limits of liability described herein, any final judgment recovered against the insured for public liability resulting from negligence in the operation, maintenance or use of motor vehicles subject to the financial responsibility requirements of Sections 29 and 30 of the Motor Carrier Act of 1980 regardless of whether or not each motor vehicle is specifically described in the policy and whether or not such negligence occurs on any route or in any territory authorized to be served by the insured or elsewhere. Such insurance as is afforded, for public liability, does not apply to injury to or death of the insured's employees while engaged in the course of their employment, or property transported by the insured, designated as cargo. It is understood and agreed that no condition, provision, stipulation, or limitation contained in the policy, this endorsement, or any other endorsement thereon,

or violation thereof, shall relieve the company from liability or from the payment of any final judgment, within the limits of liability herein described, irrespective of the financial condition, insolvency or bankruptcy of the insured. However, all terms, conditions, and limitations in the policy to which the endorsement is attached shall remain in full force and effect as binding between the insured and the company. The insured agrees to reimburse the company for any payment made by the company on account of any accident, claim, or suit involving a breach of the terms of the policy, and for any payment that the company would not have been obligated to make under the provisions of the policy except for the agreement contained in this endorsement.

It is further understood and agreed that, upon failure of the company to pay any final judgment recovered against the insured as provided herein, the judgment creditor may maintain an action in any court of competent jurisdiction against the company to compel such payment.

The limits of the company's liability for the amounts prescribed in this endorsement apply separately to each accident and any payment under the policy because of any one accident shall not operate to reduce the liability of the company for the payment of final judgments resulting from any other accident.

(continued on next page)

SCHEDULE OF LIMITS — PUBLIC LIABILITY
--

Type of carriage	Commodity transported	January 1, 1985
(1) For-hire (in interstate or foreign commerce, with a gross vehicle weight rating of 10,001 or more pounds).	Property (nonhazardous)	\$750,000
(2) For-hire and Private (in interstate, foreign, or intrastate commerce, with a gross vehicle weight rating of 10,001 or more pounds).	Hazardous substances, as defined in <u>49 CFR 171.8</u> , transported in cargo tanks, portable tanks, or hopper-type vehicles with capacities in excess of 3,500 water gallons; or in bulk Division 1.1, 1.2, and 1.3 materials, Division 2.3, Hazard Zone A, or Division 6.1, Packing Group I, Hazard Zone A material; in bulk Division 2.1 or 2.2; or highway route controlled quantities of a Class 7 material, as defined in <u>49 CFR 173.403</u> .	\$5,000,000
(3) For-hire and Private (in interstate or foreign commerce, in any quantity; or in intrastate commerce, in bulk only; with a gross vehicle weight rating of 10,001 or more pounds).	Oil listed in <u>49 CFR 172.101</u> , hazardous waste, hazardous materials, and hazardous substances defined in <u>49 CFR 171.8</u> and listed in <u>49 CFR 172.101</u> , but not mentioned in (2) above or (4) below.	\$1,000,000
(4) For-hire and Private (In interstate or foreign commerce, with a gross vehicle weight rating of less than 10,001 pounds).	Any quantity of Division 1.1, 1.2, or 1.3 material; any quantity of a Division 2.3, Hazard Zone A, or Division 6.1, Packing Group I, Hazard Zone A material; or highway route controlled quantities of a Class 7 material as defined in <u>49 CFR 173.403</u> .	\$5,000,000

*The schedule of limits shown does not provide coverage. The limits shown in the schedule are for information purposes only.

Use this form, or other format which provides the same information, to answer the VEHICLE IDENTIFICATION requirement of the application. List all vehicles, both motorized and container (if a license plate is required on the container) to be used to haul solid waste in the state of Delaware. In addition, list the vehicle owner, owner's address, and domicile address if different from the company address provided in the application.
