| These next 6 questions are specific to how your system runs for Irrigation purposes. | | | | | | |
|--|--|--|-----------------------|--|--|--|
| 8. How many inches of wat | er is required per w | eek to meet the n | eeds of y | your crop? 2" | | |
| 9. How many days would yo | | igate in a week to 3 IAYJ | meet th | e needs of item 8? | | |
| 10.How many hours per day | would the spray irr | igation run on a ty 24Mt MY | pical da | y? | | |
| 11. How many weeks is irriga | ation required during (| g a typical growing Y weekS | g seasor | 1? | | |
| 12.Do you require any pre/p | ost-season irrigation | n to adjust soil mo | oisture pr | rior to planting the crop? | | |
| 13. If off-peak season irrigation | on is required, what | is the weekly wat | er need | and for how many weeks? | | |
| 14. Requested rates (Million Ga | | | | | | |
| 15. For irrigation projects only: | Total tillable acreage | : _35 Irri | gated acı | reage: <u>33</u> | | |
| 16. What is the estimated consu | umptive use, as a per | centage of the total | withdraw | val? | | |
| 17. For each well listed in #8 (a Well Permit. If reports not a | bove), attach Comple vailable, attach all inf | tion Reports and pu formation about the | umping te wells or | est reports as specified in the intakes. | | |
| 18. Describe all treatment the w | rithdrawn water will re | ceive prior to use. | NA | | | |
| Are all facilities listed in #7 (a proposed schedule for me | above) individually m ter installation. | etered? <u>4£5</u> . | Identify th | nose not metered and submit | | |

20. A. Public water supply systems: A Conservation Program which provides for the monitoring, prevention, and repair of leakage throughout the system, provides customer information relating to water conservation and water-saving devices.

N/A

B. Industrial, Commercial, and other water supply projects: A Conservation Program which provides for the investigation of all feasible conservation measures and provides for the implementation of those feasible as soon as possible. A description of leak-detection monitoring and all feasible process-modifications for minimizing both water usage and loss.

N/A

21. Drought Emergency Plan for projects with total system water withdrawal over 1.0 mgd. Attach the following plan description. (not applicable to irrigation projects).

A. Identification of all priority uses for water throughout the system or service area, water usage restriction schedules, implementation procedures, and any alternate sources of water.

22. AFFIDAVIT

I, DOUG TOUGH.

A. hereby affirm this application and any plans, reports, or documents submitted with this application to be true and correct to the best of my knowledge and belief.
