**RE: Allen Harim Foods, LLC.
Harbeson Processing Plant, 18752 Harbeson Road, Harbeson, DE
Interim Permit Modification Request, State Permit No. 597261-01**

Dear Ms. Roushey,

Allen Harim LLC respectfully requests an interim modification to its On-Site Wastewater Treatment and Disposal System Permit (State Permit No. 597261-01).

Specifically, Allen Harim requests that Part I.D be revised to provide greater flexibility in the volume of influent wastewater accepted from the Allen Harim Pinnacle Processing Facility and the Allen Harim Dagsboro Hatchery. The current limits are overly restrictive and do not allow the operational flexibility needed to manage daily business variability, particularly given the limited options available for wastewater management.

Allen Harim requests that the existing 40,000-gallon-per-day limit per site be increased to 60,000 gallons per day per site. To provide additional operational flexibility, Allen Harim also requests consideration of permit language allowing a combined maximum hauling volume of 120,000 gallons per day between the Pinnacle and Dagsboro facilities, without a per-site split. The Harbeson Facility will continue to maintain all required records demonstrating compliance with hauling and flow restrictions.

The Harbeson Processing Plant has sufficient capacity to manage these increased influent volumes while remaining fully compliant with all effluent restrictions, including the 1.5 MGD 7-day average and 2.0 MGD peak daily discharge limits to ANSRWRF. The requested flexibility will allow the facility to manage incoming flows more efficiently without compromising environmental protection or regulatory compliance.

We respectfully request your support in initiating this modification and are available to discuss any additional conditions or clarifications needed.

Should you have any questions, please feel free to contact me at 302.604.1543.

Regards,
