**Attachments:** Review of Revised No 1 Record Plan - Cond Appr - 100119.pdf; Review of Revised No 1 SS GI Plans - Cond Appr - 100119.pdf; Review of Revised No 2 PS & FM Plans - Cond Appr Again - 100119.pdf

Hello Davison,

Please be advised I believe this Project will require a DNREC WWCP.

Please refer to the attached PDF's to see where our Office has reviewed and commented on the MRA prepared SS plans.

Please be advised there is and will be adequate capacity in the KC SS systems to accommodate this Project.

If you need a statement on the land use/zoning, then this will need to come from the KC Planning Dept. I have cc'ed the Asst. Planning Director on this same e-mail.

Please contact me, with any questions/comments.

Thank you, Brian.

Hello Cory,

Please be advised we will be on the lookout for the below indicated package.

If all of the remaining items (attached PDF's) are addressed, then the "approval" should be able to occur, no later than the end of this month.

In addition to the remaining technical items, please remember to address the remaining Administrative requirements at the previously specified times.

We recently went through a similar process with the MRA Project known as "Rojan Meadows".

Please contact me, with any further questions.

Thank you, Brian.

Good morning Brian,

I wanted to reach out to you and let you know that we sent you the Cattail Creek final package, for your approval, on Friday (1/3/20). The package contained 3 paper copies and one electronic (CD) copy of the plans.

Once this package is received, can you let us know the time frame for an approval?

Please let me know if you have any questions or need more information.

Thank you,

---
