Subject: REGISTER NOTICE SAN # 2018-03 1147 CO2 Budget Trading Program

No new regulation is warranted so i recommend keeping everything the same. If DE met their air quality goals they should just keep monitoring. There is no real need to change the triggers. (known as CO2 CCR Triggers and CO2 ECR Triggers)

As I understand it Delaware met its air quality goals for 2025 in 2017, so do we really need to add to the expenses on these companies? NO
