Re: VW Mitigation Plan – Propane

As part of Delaware's VW Mitigation Plan consideration should be given to projects that incentivize the use of propane powered vehicles, equipment and associated fueling infrastructure.

Specifically,

1. Propane school bus fleets;
2. All local and state government transit/vehicle fleets;
3. Nonprofit vehicle fleets;
4. Taxi cab fleets;
5. Airport shuttle service fleets; and
6. Off-road applications such as forklifts, commercial landscape mowers and other farm equipment.
