Title V Fee Committee Status Report

May 1, 2010

Introduction

Title V is an air pollution control program, based in federal law, designed to standardize air quality permits and the permitting process for major sources of air emissions across the country. The name "Title V" comes from Title V of the 1990 federal Clean Air Act Amendments, which required that the U.S. Environmental Protection Agency (EPA) establish a national operating permit program. Accordingly, EPA adopted regulations [Title 40 of the Code of Federal Regulations, Chapter 1, Part 70 (Part 70)], which required states and local permitting authorities to develop and submit a federally enforceable operating permit program for EPA approval. As a result, the State of Delaware developed 7 **DE Admin. Code** 1130.

Section 502(b) of the 1990 Clean Air Act Amendments requires that all sources subject to the permitting requirements under Title V of the 1990 Clean Air Act Amendments pay an annual fee, sufficient to cover all reasonable (direct and indirect) costs required to develop and administer the permit program. These requirements were incorporated into 7 Del. Code Chapter 60, Subchapter VIII. These fees must be reviewed periodically (currently every three years) before the authorization expires to consider adjustments. In the State of Delaware, these annual fees cover both "Major Sources" and "Synthetic Minor" sources. EPA defines a Major Source as a facility that emits, or has the potential to emit (PTE) any criteria pollutant or hazardous air pollutant (HAP) at levels equal to or greater than the Major Source Thresholds (MST). The MST for criteria pollutants may vary depending on the attainment status (e.g. moderate, severe, serious, extreme) of the geographic "Designation" area and the Criteria Pollutant or HAP in which the facility is located. Sources may also elect to take voluntary limits to reduce their PTE to below the MST. These sources are called Synthetic Minor sources.

Please note that the universe of Major and Synthetic Minor sources may change significantly in the near future, especially in Sussex County. The EPA is currently in the process of establishing rules and guidance documents that will regulate CO₂ as a Title V pollutant. When these rules are finalized, many new sources will become a part of the Title V program. At this time it is difficult to predict the impact of these changes.

The Title V revenue is intended to ensure a stable level of support for the technically complex activities undertaken by the Department of Natural Resources and Environmental Control (the Department) to ensure both protection of human health and the environment and a reasonable level of service to customers seeking permits and other services. The services provided by the Department supported wholly or partially by this Title V fee revenue are summarized in a later section of this report called "Program Accomplishments" and include:

- Permitting activities;
- Compliance activities;
- Enforcement activities;
- Planning activities;
- Emission inventory activities;
- Air monitoring activities;
- Small Business Ombudsman activities; and
- Other special accomplishments.

Title V Fee Committee Status Report May 1, 2010

These activities and the fees required to support this work are consistent with the EPA guidance for Title V programs. This report is intended to provide a reasonable amount of accountability over those activities and the fees assessed.

Title V Fee Committee

Delaware Statute established the Title V Operating Permit Program Advisory Committee¹ (also known as the Title V Fee Committee) herein and specified that the membership of this committee include certain emitting business interests as well as members of the public and non-governmental organizations. The purpose or charter of the Title V Fee Committee is to assess whether the fees collected pursuant to 7 Del. Code Chapter 60, Subchapter VIII are adequate to ensure the effective implementation of the Program, and to make recommendations to remedy or improve any deficiencies or elements of the Program.

The Title V Fee Committee has been operating for several years and by working together has expanded its scope to include renegotiating the Title V fee structure periodically prior to expiration to ensure that the financial needs of the Air Quality Management Section and other Title V requirements are being met while the payment burden is distributed fairly across the Major Source and Synthetic Minor facilities. In order to do this, the Air Quality Management Section estimated the cost of the Title V Program through a detailed Workload Analysis. The results of the Workload Analysis then set the baseline for the total Title V revenue that needs to be collected annually for the next three years. Once the baseline is set, the Title V Fee Committee works with the Major and Synthetic Minor Sources to determine how the fees will be distributed fairly. See <http://www.awm.delaware.gov/Pages/Title%20V%20Committee%20Information.aspx> for the Workload Analysis that was used during the 2008 round of fee negotiations.

The current Title V Fee Schedule, which was supported by the title V Fee Committee, was presented to the Delaware General Assembly through House Bill 418. It was passed by the House on June 5, 2008, was passed by the Senate on June 19, 2008 and was signed by the Governor on July 3, 2008. This Title V Fee Schedule applies to Calendar Years 2009, 2010, and 2011. It can be found in 7 Del. Code Chapter 60, Subchapter 8 and is available at: <http://delcode.delaware.gov/title7/c060/sc08/index.shtml#TopOfPage>.

Since we are in the middle of the current fee schedule and do not need to determine a new fee schedule until 2012, the Title V Fee Committee only met once in 2009. The Title V Fee Committee met on April 16, 2009 to review the draft Calendar Year 2008 Title V Status Report and to finalize the report. The Committee will become more active again in 2010 as we work to establish a fee schedule for 2012 through 2014.

¹ 7 Del. Code Chapter 60 Subchapter VII §6099 requires that the Committee "...include, but not be limited to, the Secretary of the Department of Natural Resources and Environmental Control, or the Secretary's duly appointed designee; the Director of Air and Waste Management, or the Director's duly appointed designee; 2 members who will represent stationary sources; 1 to be a member of the Chemical Industry Council; a member of the Delaware State Chamber of Commerce; a member representing a public utility; 2 members of a nationally affiliated or state environmental advocacy group; and the chairpersons of the House and the Senate Natural Resource Committees. The Secretary of the Department of Natural Resources and Environmental Control shall serve as the Chair of this Committee."

**Title V Fee Committee Status Report
May 1, 2010**

Title V Fees are billed annually in December for the next calendar year. Title V bills for Calendar Year 2009 were mailed in December 2008. Facilities can choose to pay their bill in one payment or in quarterly payments. If the facility chooses to pay their bill in one payment, it is due by February 1st. If the facility chooses to pay their bill in quarterly payments, the payments are due on February 15th, May 15th, August 15th, and November 15th. If a facility does not pay their bill, they will be sent three reminders. The third reminder is sent certified mail. If after the third reminder the facility still does not pay their bill, enforcement action will be taken.

Overall Program Costs

See Table 1 for a summary breakdown of Calendar Year 2009 Title V Costs.

Table 1: 2009 Title V Costs

Salary	\$2,438,911
Travel	\$7,700
Contractual	\$596,530
Energy	\$10,640
Supplies	\$13,895
Department Overhead	\$250,000
Total	\$3,317,676

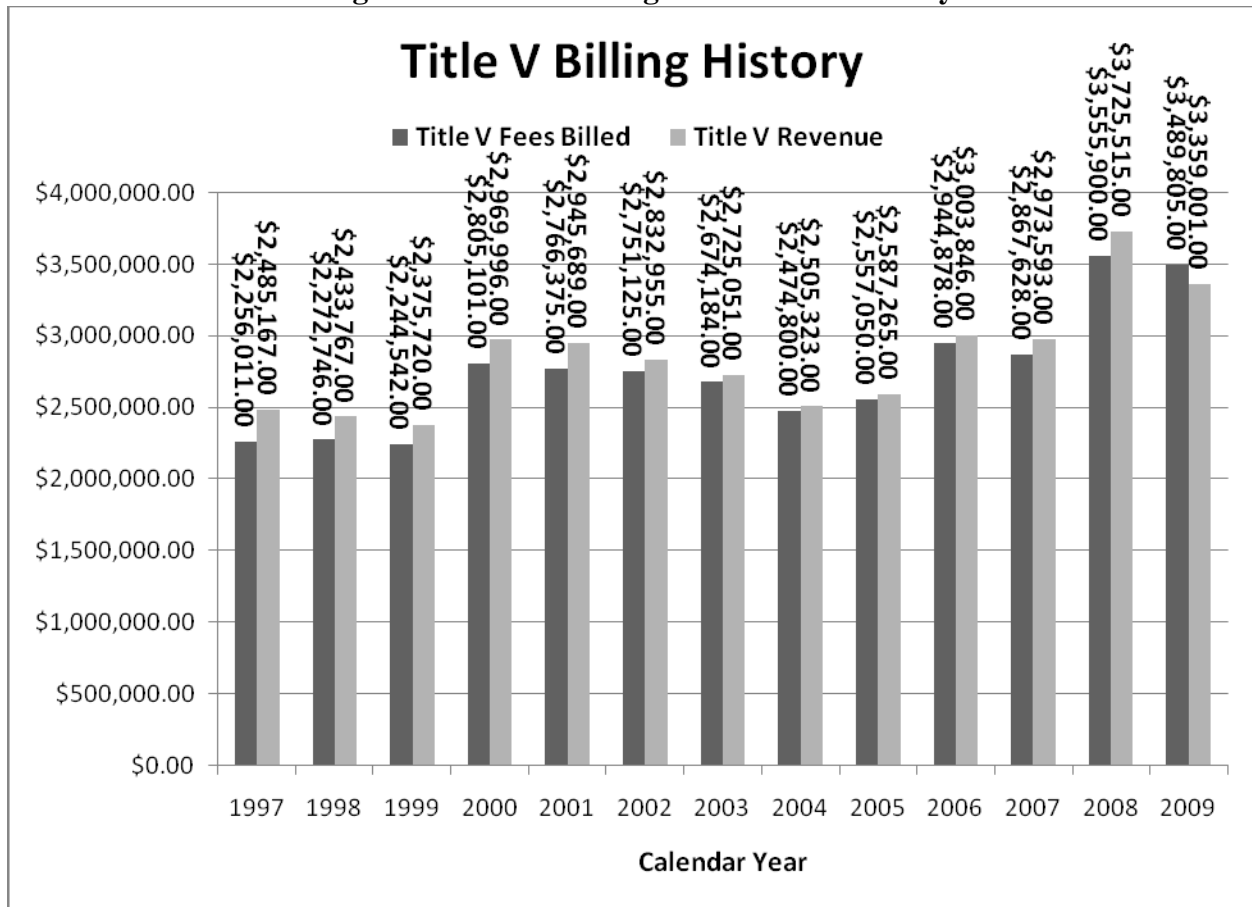

Fees Collected

Title V fees are billed on a calendar year basis (January 1 through December 31), but are spent on a state fiscal year basis (July 1 through June 30). In addition, the calendar year revenue includes interest gained on the Title V account and quarterly payments made by some facilities that were billed in the previous calendar year but not paid until the current calendar year. This makes comparing revenue and expenditures difficult.

The total Calendar Year 2009 Title V revenue was \$3,359,001. See Figure 1 for a history of Title V billing and revenue since 1997.

**Title V Fee Committee Status Report
May 1, 2010**

Figure 1: Title V Billing and Revenue History

In 2009, 79 Synthetic Minor and 62 Title V facilities were billed. A total of \$3,489,805 was billed, however, as of December 31, 2009, \$3,359,001 was collected. The difference of \$130,804 was the result of quarterly payments totaling \$31,495 that had not been received and nine non-payments for \$99,309. These unpaid bills are significantly higher than in previous years and have resulted in the Title V revenue being less than the amount billed for the first time. Some of the facilities that did not pay in 2009 have committed to paying their back fees in 2010. Any back fees that are collected will be counted towards the 2010 revenue.

The Title V balance as of December 31, 2009 was \$1,778,149. Using this carryover balance, the total amount of Title V fees billed in 2009, and projected expenses and revenue losses, a Title V balance of \$2,108,891 is projected at the end of 2010. See Table 2 for this projection.

Table 2: 2010 Title V Balance Projection

Description	Starting Balance	Revenue	Expense	Resulting Balance
2009 Carryover Balance	\$1,778,149			\$1,778,149
2010 Title V Fees Billed		\$4,205,634		\$5,983,783
2010 Unpaid Title V Bills		-\$383,716		\$5,600,067

**Title V Fee Committee Status Report
May 1, 2010**

Description	Starting Balance	Revenue	Expense	Resulting Balance
2010 Projected Expenditures Based Upon 2009 Expenditures			\$3,317,676	\$2,282,391
Additional Department Overhead			\$100,000	\$2,182,391
Enforcement Salary Support			\$73,500	\$2,108,891
Projected 2010 Carryover Balance				\$2,108,891

In the calendar year 2008 report a Title V balance of \$1,228,479 was predicted. The actual balance was \$1,778,149. The actual balance was \$549,670 above the predicted balance.

Current Staffing Levels

The Air Quality Management Section is currently at a staffing level of 93% or a 7% vacancy rate. However, as a result of Governor Markell's initiative to reduce the size of State Government, AQM's number of approved positions was reduced from 75 positions to 69 positions. The positions that were lost were considered long time vacant positions. See Table 3 for a breakdown of staffing levels in each group within the Section. See Table 4 for a breakdown of the positions that were lost.

Table 3: Air Quality Management Section Staffing Levels

Branch	Authorized	Assigned	Staffing Level
Administrator's Staff	9	9	100%
Air Surveillance	13	12	92%
Engineering & Compliance	26	23	88%
Planning	21	20	95%
Total	69	64	93%
Temporary Positions	2	2	100%
Seasonal Positions	1	1	100%

Table 4: AQM Position Reductions

3/30/2009	Romisch, Nicole	External	ESIII	Air Surveillance	NSF/Title V

Program Accomplishments

Title V Permitting Activities

Air Quality Management is responsible for all permitting activities at Title V and Synthetic Minor facilities. In calendar year 2009 the following permitting activities were accomplished:

- 1 initial Title V Permit was issued;
- 11 Title V Permit Renewals were issued;
- 3 Title V Permit Amendments were issued;
- 4 Synthetic Minor Construction Permits were issued; and
- 24 Synthetic Minor Operating Permits were issued.

The Air Quality Management Section is required to issue Title V Renewal Permits within 18 months or 547 days of determination of receipt of a complete application by 7 **DE Admin. Code** 1130. In calendar year 2009, the Air Quality Management Section issued Title V Permit Renewals within 843 days of application receipt on average. The shortest amount of time to issue a Title V Permit Renewal was 90 days while the longest amount of time was 2,253 days. In calendar year 2009 the majority of renewals issued were out of the 547 day timeframe. All of these renewals required significant rework from the original Title V permit. Many of the renewals included complex permitting activities such as case-by-case MACT determinations, incorporation of enforcement actions, or incorporation of new source review requirements.

As part of the Value Stream Mapping efforts for the Synthetic Minor permitting program, Air Quality Management has committed to issuing Synthetic Minor permits within 3.3 to 4.7 months or 102 to 145 days. A permit issuance range was chosen for Synthetic Minor permits because of the varying complexity of these permits. In calendar year 2009, Synthetic Minor permits were issued within 148 days from receipt and 59 days from Technically Complete on average.

Title V Compliance Activities

Many Title V related compliance activities are undertaken by the Air Quality Management Section each year. These activities include on-site compliance evaluations or inspections, stack tests and

² NSF – Non-appropriated Special Funds; ASF – Appropriated Special Funds; GF – General Funds

Title V Fee Committee Status Report May 1, 2010

relative accuracy test audits (RATAs), and report reviews. In calendar year 2008 the following compliance activities were undertaken:

- 53 on-site compliance evaluations were conducted at Title V facilities;
- 77 stack tests and RATAs were conducted at Title V facilities;
- 197 report reviews were conducted for Title V facilities;
- 44 on-site compliance evaluations were conducted at Synthetic Minor facilities;
- 15 stack tests were conducted at Synthetic Minor facilities; and
- 8 report reviews were conducted for Synthetic Minor facilities.

Title V Enforcement Activities

If the compliance activities described above indicate that a facility is not in compliance with requirements, the Air Quality Management Section will pursue enforcement action against that facility. Enforcement actions may take the form of Notices of Violation, Administrative Orders, Consent Decrees or Agreements, or Stipulated Penalties. In some cases the Department takes no further action depending upon specific circumstances such as whether the violation was self-reported, minor, isolated and corrected quickly. In other cases, the Department seeks and generally obtains substantial fines and penalties. For a complete description of enforcement activities, see the Department of Natural Resources and Environmental Control's "Compliance and Enforcement Response Guide" available at:

<http://www.dnrec.state.de.us/dnrec2000/Admin/Enforcement/Guide/CandEGuide.htm>. In calendar year 2009 the following enforcement activities were completed (please note that this does not include pending enforcement activities):

- 8 Notices of Violation were issued to Title V facilities;
- 4 Administrative Orders were issued to Title V facilities;
- 8 Stipulated Penalty Demand Letters were issued to Title V facilities; and
- 2 Notices of Violation were issued to Synthetic Minor facilities.

Title V Planning Activities

There are many planning activities associated with the Title V program. These activities include, but are not limited to:

- Preparing State Implementation Plan (SIP) revisions, including the extensive ozone and fine particulate matter (PM_{2.5}) SIPs, to ensure progress in attaining and maintaining ambient air quality standards;
- Developing and maintaining an air toxics emission inventory; and
- Developing new air pollution control regulations in accordance with State and Federal requirements.

The Planning Branch of the Air Quality Management Section accomplished the following Title V related planning activities in calendar year 2009:

Title V Fee Committee Status Report
May 1, 2010

- State Implementation Plan (SIP) Activities:
 - Successfully rebutted the EPA proposed disapproval of Delaware’s 8-hour 0.08 ppm Ozone SIP. This includes actions necessary for Delaware to submit to the EPA a Clean Air Act (CAA) Section 181(a)(5) request for an extension of the ozone attainment date to June 15, 2011. This extension request will be finalized and submitted in calendar year 2010;
 - Completed a SIP that addressed the infrastructure requirements of the CAA relative to the 24-hour fine particulate matter (PM_{2.5}) NAAQS;
 - Completed a SIP revision to clarify and supplement Delaware’s 2007 Plan which addressed these infrastructure requirements relative to the 1997 ozone and annual PM_{2.5} NAAQS, and visibility requirements;
 - Completed a SIP revision to demonstrate that revision to 7 **DE Admin. Code** 1141, Limiting Emissions of Volatile Organic Compounds from Consumer and Commercial Products, Section 3.0, “Portable Fuel Containers” was consistent with attainment of the ozone NAAQS based on a new Federal Rule;
 - Worked with EPA, federal land managers, and other states in planning and analysis for the upcoming Regional Haze Program mid-course review SIP; and
 - Continued planning for the 75 ppb (or lower) 8-hour ozone and 35 µg/m³ 24-hour PM_{2.5} SIPS that must be finalized and submitted to the EPA in the 2014/2015 timeframe. Accomplishments include the development of regional control strategies, the preparation of a 2007-specific inventory for modeling, and preparation and planning activities associated with the base-year inventory and projection year inventories.

- Regulatory Development Activities:
 - Completed adoption of a regulation and SIP submittal to reduce volatile organic compound (VOC) emissions from Adhesives and Sealants usage (i.e., amendment to 7 **DE Admin. Code** 1141, Limiting Emissions of Volatile Organic Compounds From Consumer and Commercial Products, by adding 4.0 “Adhesives and Sealants.”);
 - Completed revision to 7 **DE Admin. Code** 1146, Electric Generating Unit (EGU) Multi-Pollutant Regulation, to resolve the last remaining appeal of the regulation;
 - Finalized an amendment to 7 **DE Admin. Code** 1141, Limiting Emissions of Volatile Organic Compounds From Consumer and Commercial Products, by revising 2.0 “Consumer Products.” The regulation became effective on April 11, 2009;
 - Finalized an amendment to 7 **DE Admin. Code** 1101, Definitions and Administrative Principles, by revising the definition of exempt VOC to match the federal list. The revision became effective on September 10, 2009;
 - Completed revisions to the following sections of 7 **DE Admin. Code** 1124, Volatile Organic Compound Reasonably Available Control Technology, based on federal Control Technology Guidelines:
 1. Section 12.0, “Surface Coating of Plastic Parts.”
 2. Section 19.0, “Coating of Metal Furniture.”
 3. Section 20.0, “Coating of Large Appliances.”
 4. Section 22.0, “Coating of Miscellaneous Metal Parts.”;

Title V Fee Committee Status Report
May 1, 2010

- Finalized an amendment to 7 **DE Admin. Code** 1125, Preconstruction Review, by revising 3.0, “Prevention of Significant Deterioration.”;
- Finalized an amendment to 7 **DE Admin. Code** 1141, Limiting Emissions of Volatile Organic Compounds From Consumer and Commercial Products, by revising 3.0, “Portable Fuel Containers.”;
- Completed significant amount of work on revising the following sections of 7 **DE Admin. Code** 1124, Volatile Organic Compound Reasonably Available Control Technology, based on federal Control Technology Guidelines. Final action will be taken in 2010.
 1. Section 8.0, Handling, Storage, and Disposal of Volatile Organic Compounds (VOC).
 2. Section 13.0, Automobile and Light-Duty Truck Coating Operations.
 3. Section 16.0, Paper Coating.
 4. Section 23.0, Coating of Flat Wood Paneling.
 5. Section 37.0, Graphic Art Systems.
 6. Section 45.0 Industrial Cleaning Solvents.
 7. Section 47.0 Offset Lithographic Printing;
- Conducted substantial work with the Department of Motor Vehicles on an update to 7 **DE Admin. Code** 1126 and 1132, Delaware’s Inspection and Maintenance program regulations;
- Began research and development of a regulation to control the emission of PM_{2.5} from large electric generating units (EGUs) in New Castle County; and
- Finalized the adoption of several CAA 112 (air toxics) based regulations;
 1. Hospital ethylene oxide sterilizer standards (Section 9 of 7 **DE Admin. Code** 1138).
 2. Plating and polishing standards (Section 10 of 7 **DE Admin. Code** 1138).
- Other Title V Related Activities:
 - Continued to work with the Environmental Protection Agency (EPA) to address issues related to Delaware's transition from the nitrogen oxides (NO_x) SIP Call and NO_x Budget Trading Program to the Clean Air Interstate Rule (CAIR) NO_x program.
 - Continued to work with the EPA to address Delaware’s CAA 126 petition to mitigate the impact of upwind EGUs on our air quality;
 - Analyzed the impact of the new lead NAAQS on Delaware, and submitted to the EPA a letter recommending that 1) indicted DE air quality likely attains the NAAQS, and 2) DE be designated as unclassifiable based on lack of reference method monitoring data;
 - Worked extensively with the Ozone Transport Commission and MANE-VU on planning, inventory, modeling and control strategy initiatives relative to the ozone and PM_{2.5} NAAQS;
 - Continued to update and implement Delaware’s Air Toxics Strategic Plan (ATSP);
 - Substantially completed Delaware’s 2007 periodic emissions inventory;
 - Identified a path forward for implementing the case-by-case MACT determination for the vacated Boiler MACT standard in Delaware; and
 - Completed the 2008 national emissions inventory protocols.

Title V Fee Committee Status Report May 1, 2010

Title V Emission Inventory Activities

The Emission Inventory Group is part of the Planning Branch of the Air Quality Management Section. The Emission Inventory Group is charged with preparing all necessary inventories of emissions from all sources of air pollution in the State, including stationary sources, area sources, and mobile sources. The information gathered by the Emission Inventory Group is used in many of the planning activities described above. Emissions include criteria air pollutants, air toxics, and greenhouse gases.

The Emission Inventory Group accomplished the following Title V related activities in calendar year 2009:

- 2007 Inventory – Point source data for large sources submitted to EPA’s NEI (June 1 deadline);
- 2007 Inventory – Performed additional review and updates to the 2007 inventory and submitted the point source data to the Mid-Atlantic Regional Air Management Association (MARAMA) for use in the upcoming attainment demonstration modeling effort for the latest ozone and fine particulate standards;
- 2008 Inventory – Collected point source data through the annual reporting cycle that takes place in the February through April timeframe;
- 2009 Inventory – Began planning for the 2009 point source reporting cycle; and
- Continued participation with a consortium of states that use i-STEPS to find a replacement for i-STEPS. The selected vendor was awarded the contract late in 2009.

Title V Air Monitoring Activities

The Air Monitoring Branch of Air Quality Management conducts several Title V related activities including:

- Conducting engineering reviews of the plans and methods used for stack testing;
- Reviewing the plans for the installation of continuous emission monitors (CEMS) and subsequent relative accuracy test audits (RATAs);
- Measuring ambient concentrations of selected air pollutants and selected meteorological parameters; and
- Conducting source emission evaluations with the portable analyzer.

The Air Monitoring activities related to source testing are described in the Title V Compliance Activities section above. The ambient air monitoring program receives funding from several sources to accomplish its monitoring objectives. The Title V program supports approximately 30% of the monitoring activities in the program. In Calendar Year 2009, the Air Monitoring Branch accomplished the following Title V related activities:

- Measured the ambient (outdoor) concentrations of the criteria air pollutants along with selected weather parameters. The monitoring network consists of 10, fixed-site monitoring locations;

Title V Fee Committee Status Report May 1, 2010

- Conducted special studies to address citizen concerns, to evaluate the need to relocate or add additional fixed sites, or to measure the impact of a particular air pollution source; and
- Routinely monitored selected hazardous air pollutants (air toxics) including metals, volatile organic compounds, and carbonyls;

Title V Small Business Ombudsman Activities

The Small Business Assistance Program (SBAP) within the Department of Natural Resources and Environmental Control (DNREC) is a free service available to all new and existing small businesses located in the State of Delaware. The SBAP can help small businesses understand their environmental requirements and help them comply in the easiest and most effective way. The SBAP is a non-regulatory program. The Ombudsman is part of the SBAP which was created through the Clean Air Act Amendments of 1990. The SBAP consists of 1.3 staff members. This includes the Ombudsman who manages the SBAP and an administrative assistant who is shared amongst several programs within DNREC.

The SBAP provides the following services:

- Serves as small businesses initial contact within DNREC;
- Provides specific information for small businesses detailing how to comply with environmental regulations specific to their industry;
- Helps small businesses fill out permit applications, forms and other required paperwork;
- Conducts an environmental assessment at a small business and discusses compliance issues in a confidential manner;
- Keeps abreast of developing regulations and current issues impacting small businesses and shares that information with small businesses through workshops, newsletters, trade association meetings, mailings, websites, and other methods;
- Provides feedback to the Air Quality Management Section from small businesses;
- Helps resolve permitting and compliance disputes and cuts red tape;
- Reviews Start Action Notices for impacts to small businesses as new actions are taken by the Department;
- Seeks funding opportunities for special programs that benefit small businesses; and
- Serves as the Manager of the Regulatory Advisory Service.

During calendar year 2009 the SBAP provided the following assistance:

- 26 site visits;
- 322 phone calls made and received;
- 309 e-mails sent and received;
- 7 Regulatory Service Advisory Meetings;
- 12 Workshops/Seminars/Presentations/Trade Association Meetings; and
- 34 Reviews of Start Action Notices.

The SBAP also serves on the following committees:

Title V Fee Committee Status Report May 1, 2010

- Clean Marina Committee;
- Division of Air And Waste Management (DAWM) Program Awareness Training Committee;
- DAWM External Communications Committee;
- EPA Area Source Workgroup;
- Delaware Green Lodging Committee;
- Permitting Efficiency Workgroup;
- Weekly Air Quality Management Administrator's Office Meetings; and
- Title V Fee Committee (as needed).

During the 2009 year the Small Business Ombudsman participated in the first DNREC Environmental Leadership Academy (ELA) taught by Dale Carnegie and graduated in October 2009. As required by the ELA, the SBO participated with three other members from Air Quality Management on a team project for streamlining the billing process for Reg. 2 permit fees. The AQM Billing Project won the award for the best innovative project and was selected by class peers.

Other Special Accomplishments

In addition to the standard activities described above, Air Quality Management also participates in many special projects. These special projects may or may not be Title V related. However, the results of these projects often impact Title V activities. In calendar year 2009, Air Quality Management participated in the following special activities:

- Port Study to assess the baseline impacts and impacts after the diesel retrofits;
- WILMAPCO Conformity Analysis;
- Low carbon fuels activities;
- DPI Generator Dispatch Regulation 1144 Project;
- Consumer Products regulation development;
- Educational programs and public outreaches addressing conserving energy;
- Educational programs or public outreaches addressing school-related anti-idling requirements;
- Public outreach addressing "Community Air Toxics" study;
- Educational information and public outreach on open-burning restrictions;
- Ozone Action awareness outreach;
- Asthma awareness outreach;
- Cancer Consortia activities;
- Completed Delaware's annual vehicle Inspection and Maintenance program analysis and report;
- Participated in Greenhouse Gas Related activities including:
 - RGGI Auctions;
 - Three Regions Work Group; and
 - Low Carbon Fuel Standard program development.

Title V Fee Committee Status Report
May 1, 2010

- Completed substantial work on a new vehicle remote sensing program to provide data to 1) evaluate the effectiveness of our vehicle inspection and maintenance program, and 2) develop strategies to further reduce mobile source related emissions;
- Continued to identify and quantify emissions associated with new residential development in Delaware through the PLUS Process;
- Completed 60 consultations of auto body shops to provide compliance assistance information on a recently promulgated federal regulation;
- Tracked 120 vapor recovery tests of regulated gasoline dispensing facilities;
- Tracked 620 EPA Method 27 tests for 620 permitted gasoline delivery vessels;
- Completed installation of 19 Red Clay School District diesel bus retrofits;
- Submitted and awarded an American Recovery and Reinvestment Act grant for:
 1. Additional school bus diesel retrofits (Brandywine School District; Cape Henlopen School District; Providence Creek School District; Red Clay School District; City of Dover; City of Newark; City of Wilmington);
 2. Smyrna Rest Area truck stop electrification. Substantially completed a Truck Stop Electrification Project RFP for the Smyrna Rest Area;
 3. Fort Delaware alternative power. Substantially completed an RFP to construct a Micro-Turbine at Fort Delaware; and
 4. Awarded contracts and completed installation of diesel retrofits for heavy duty off-road diesel engines at the Port of Wilmington.
- Provided advanced modeling support to the Engineering & Compliance Branch when additional modeling was needed to issue permits;
- Reviewed the modeling protocol, modeling outputs and results for the Evraz Claymont Steel total suspended particulates modeling;
- Identified SO₂ hotspots resulting from point sources as needed for the new 1-hr SO₂ NAAQS;
- Provided necessary modeling info of MiniVol Study to SIERA Club as part of a FOIA request;
- Provided support to SIRB in their review of the modeling protocol needed for remedial investigation work plan for Burton Island Ash Landfill;
- Conducted Hg deposition modeling analysis for Delaware's watersheds;
- Conducted an extensive review of the timekeeping system to improve the way hours assigned to all facilities are tracked;
- Began the process to move the Dover staff to a new office location to reduce operating costs and provide a more professional working environment;
- Began workforce and succession planning activities to address the long-term management of our declining workforce due to budget cuts;
- Established and conducted a Safety Policy and Training program to improve safety both in the office and the field; and
- Implemented a telecommuting policy to create efficiencies in facilities, energy, operating costs, and vehicle emissions.

**Title V Fee Committee Status Report
May 1, 2010**

Source Hours for the Previous Calendar Year

The Title V fee schedule is based upon two components, the Base Fee and the User Fee. The Base Fee is calculated from the total hours spent working on the facility for the previous five years. The User Fee is calculated from the facility's most recent baseline year emission inventory report. The Title V Fee Schedule for Calendar Years 2009 through 2011 is provided in Table 6 below:

Table 6: Calendar Year 2009 through 2011 Title V Fee Schedule

Fee Type	Category	Category Description	2009 Fee	2010 and 2011 Fee
Base Fee	A	> 6,000 Hours	\$207,842	\$243,000
Base Fee	B	5,001 – 6,000 Hours	\$81,255	\$95,000
Base Fee	C	4,001 – 5,000 Hours	\$70,136	\$82,000
Base Fee	D	3,001 – 4,000 Hours	\$60,728	\$71,000
Base Fee	E	2,001 – 3,000 Hours	\$42,766	\$50,000
Base Fee	F	1,501 – 2,000 Hours	\$31,647	\$37,000
Base Fee	G	1,001 – 1,500 Hours	\$21,383	\$25,000
Base Fee	H	667 – 1,000 Hours	\$13,685	\$16,000
Base Fee	I	334 – 666 Hours	\$6,843	\$8,000
Base Fee	J	0 – 333 Hours	\$4,277	\$5,000
Base Fee	K	New Sources that Have Applied for a Permit by December 31, 2008	\$5,132	\$6,000
User Fee	1	> 6,500 Tons	\$149,681	\$175,000
User Fee	2	2,001 – 6,500 Tons	\$106,915	\$125,000
User Fee	3	1,001 – 2,000 Tons	\$42,766	\$50,000
User Fee	4	501 – 1,000 Tons	\$25,660	\$30,000
User Fee	5	201 – 500 Tons	\$11,974	\$14,000
User Fee	6	101 – 200 Tons	\$5,132	\$6,000
User Fee	7	51 – 100 Tons	\$3,849	\$4,500
User Fee	8	26 – 50 Tons	\$2,566	\$3,000
User Fee	9	0 – 25 Tons	\$1,711	\$2,000
User Fee	10	New Sources that Have Applied for a Permit by December 31, 2008	\$2,566	\$3,000

The Base Fee for each facility is obtained by creating reports from the Air Quality Management timekeeping system. For a detailed description of how a facility's Base Fee was calculated, please contact Amy Mann at (302) 323-4542.

In order to help facilities track their Title V Fee Bill, the hours spent working on each Title V and Synthetic Minor facility are presented in Appendix A for Calendar Years 2009 through 2005. Each Title V and Synthetic Minor facility's 2005 Base Year Emission Inventory is also included.
