Governor Carney and Mr. Garvin:

I am writing today to inform you that I oppose the electric vehicle mandate in the state of Delaware. I believe the technology is not ready for this transition to take place. These regulations would not have a great effect on climate change. This would greatly affect our tourism in this state. And this mandate would take away our freedom, freedom to move about when and where we please. Please help to keep our country free and stop pursuing these restrictive regulations.

Thank you,
Pam Procaccini

Frankford, DE 19945
