Subject: Working Poor CANNOT Afford EV's, STOP the mandates

Dear Secretary Garvin,

The working poor, the working middle class, the service professionals in Delaware CANNOT and WILL NOT be able to afford EV's now or anytime soon, nor are EV's even capable of the power, endurance, and torque that is required for working vehicles in industries you and liberal elites who are not familiar with yet benefit from on a daily basis, such as tree planting, farming, land clearing, stone hauling, equipment repair and delivery to mention a mere few. Come visit one of our busy gas stations at 7am anywhere in Delaware where work is being done to sustain the standard of living of those who live in ivory mctowers and see how fast you will CRUSH the hard-working families of this state. You must rescind all EV mandates immediately and give Delawareans a choice in mode of transportation which is our right as free citizens in Delaware. My car my choice!
