Subject: electric vehicle mandate

I vehemently oppose the electric vehicle mandate being imposed upon Delawareans. It makes little sense for a variety of reasons, especially the cost to purchase and maintain such a vehicle. We already have to cut back on power usage on summer afternoons, and sometimes go without power for extended stretches in the winter. I remember being without power or heat for a solid week following an ice storm!

The choice of vehicle should be up to the individual.

I'm doing my part, as best I can, to save the planet. I recycle, compost, reuse, repurpose.

Please do not let these zero emissions standards proceed!

Carol Kinsley
Seaford, Delaware
