Subject: vehicle ban, 2035

Dear sirs,

I have been a registered Democrat in Delaware for all of my 69 years. I have been driving Electric vehicles for over 14 years and plan on only purchasing EV's in the future. However, this is my personal preference and choice. To eliminate gas and diesel sales in Delaware is taking a person's freedom of choice away. It's simply wrong and I do not support it.

I believe people will realize, on their own, that Electric vehicles are not only cleaner and perform better, but also at a much more reasonable cost. I advocate EV's to all of my friends and try my best to correct all of the false statements out there about the new EV's available today. But I would never tell them they HAD to buy them.

Please don't take their choice away.

Respectfully,
Kevin M. McMullin
Bear, DE
