Subject: zero emissions

Governor Carney and Mr. Garvin,

I respectfully request that you DO NOT move forward on DNREC's Zero Emissions Standards. It will destroy many jobs, raise private and public electric costs (which at the moment is untenable to support), lower our ability (money-wise) to improve our roads, and cost the citizens much more to own and maintain our vehicles.

If I, personally, will be mandated to own and operate an EV I will not be able to survive on my current salary with the added costs. Since I am an employee of Delaware will I get a 20% raise to be able to operate my vehicle for work?

Please stop this regulation. It is bad for me, it is bad for Delaware and it is bad for the country.

Marcus C. Wiener
