Subject: I oppose the new Zero-Emission Vehicle Standards Mandate

Dear Secretary Garvin,

While I am not opposed to electric vehicles, I am oppose to the mandating of Delawareans having to buy them by a particular time and taking away our options of buying the vehicles we prefer. Charging stations will be a problem and an inconvenience. The cost of replacing the batteries are upwards of \$15,000 to \$18,000 after only using the vehicle for a few years. This is not good for Delaware. Most Delawareans are not high income earners and putting this upon them is very oppressive.

Sincerely,
Nannette Jones
