Subject: OPPOSE Zero Emissions in DE!
Good Morning:

I am writing to each of you to stress my opposition to your executive order to adopt California's zero emission regulation/mandate. Delaware does not have the necessary infrastructure in place (and neither does California), to support such a regulation. By implementing this order, you will be directly causing a majority of Delawareans undue financial stress and burden as well as negatively impacting so many small and local businesses. It astonishes me that this was even considered, let alone made mandatory by executive order, thereby circumventing the legislative process and hearings that such a major change should involve. So much for democracy.

I urge both of you to consider **all** Delawareans. Allow **us** to decide which type of vehicle we drive (and as such, how much money we spend on a vehicle). Allow the **State** the *decades* it will need to build such an infrastructure. Please stop mandating your will on us and allow us to have a say in how we live our lives!

Regards,
Carina Slater
