Subject: Proposed electric vehicle law

I am writing to both of you today in total disgust.

First of all we are NOT California, so you treating this state like California with thier crazy, budget busting ideas is very OFFENDING to me and my family.

2nd our electric grid cannot handle an onslaught of electric vehicles to be charged, it would cause us, like California to have rolling blackouts to share the electric.

3rd. The cost to each Family in this state to purchase electric vehicles is not feasible with our medium income. Maybe the high tech and Hollywood Entertainers can but Delaware residents cannot except for the small number of your wealthy friends.

I ask you to reconsider your stance and not treat us like residents of California and if it continues you will likely see an exodus of tax money as most of us do not want to be in California
