**Subject:** Opposition to electric vehicles

Mr. Garvin:. Just wanted to express my opposition to thsue desire for electric cars by 2035 and start the process by 2026. Being a senior citizen I am disappointed that it appears Delaware wants to be the CA of the East coast

I'm sure you firmly believe this is best for our state but I disagree. We cannot afford the price of these vehicles nor will we be well enough to stand around while it charges up. Very disappointed in our state leadership
