Subject: 2035 No More ?

I ask you to vote against this proposed mandate.

It makes no sense to order something that can not fly on its own merits.

We should be slowly changing to other methods of energy.

We should not be creating mandates that stop current energy when no solid plan is in place first.

When we start seeing cleaner energy being produced and sold, people will but it.

When we see our current systems stop because of a mandate our country will not be able to function.

Vote what you know is the right thing to do, not what will not work.

PLEASE DO YOUR JOB TO REPRESENT US, SAY NO.
