Subject: DNREC Zero Emissions Standards

Governor Carney & Director Garvin,

I am writing to state my opposition to the proposed implementation of the mandate to implement regulations that phase out the sale of gasoline powered vehicles in Delaware. I am astounded that an agency alone can even consider such a mandate to impose upon the citizens of our state. These regulations will be extremely detrimental to the majority of the folks that live here. Although your intentions may be good, they are, in my educated and well read opinion, very misguided. I'm all for moving away from fossil fuels but not until there is a proven and reliable replacement source of energy in place to replace them.

I for one, will never support a politician or bureaucratic appointment that support these draconian measures being proposed.

I urge you to take the Zero Emissions Mandates off the table!

Respectfully submitted,

Barry M Brill
