Subject: EV mandate

I am requesting that you reconsider you EV plan. I am not against people having a choice of electric or gas powered vehicles, to also include lawn power machines. However I believe in choice. Also by forcing this on people especially senior citizens who cannot afford to make the change is very disturbing. I currently own two vehicles, 1 is a 2002, and the other is a 2011, being a senior citizen, and with the price of new cars, gas,electric, and food, it would be a hardship for me and I am sure many other seniors and our children to buy an Electric car, or landscaping equipment. Please reconsider this mandate.

I also do not want to be like California were the gov. ask people not to use electricity or charge their cars because the grid could not handle at that time. I also believe this is for the people to decide, put it on the ballot.

Thank you for taking the time to read this.
