**Subject:** DE Electric Vehicle Mandate

I am opposed to the DE Mandate for Electric Vehicles.

Our economy is at a critical time for people who are struggling. They cannot afford an electric vehicle now - or anywhere in the near future. This is another way to disenfranchise the poor - that your party is supposed to protect - while elevating the elite who care only about the money they acquire from these mandates.

Shame on you for doing this to our farmers also. They have worked hard at a modest occupation to help feed our communities.

It doesn't take much common sense to know that you should always have a back up plan. Those vehicles will not stand the tests of weather and the batteries will not last and have to be replaced at a cost equal to a new car.

If people want to buy an electric car - that's fine... But you should **not be mandating it**.
