Subject: EV MANDATE 2025

Dear Mr. Governor,

I 'OPPOSE' the EV Mandate scheduled for 2025.

I 'OPPOSE' bypassing the General Assembly vote on any matter of this importance.

My key reasons:

The infrastructure needed for such a move is not and will not be in place by 2025, the increase of electricity necessary for such a venture is also not available, i.e.; oil or Nuclear, recycling or disposal of huge car batteries is of great concern and would pose a pollution problem, most homes are not set up electronically to accommodate charging electric vehicles, waiting times for recharging EV's at Stations will become a nightmare due to time and space, EV's and EV batteries are very expensive and many of the population can not afford them.

I am in full agreement with moving forward with green energy as long as we proceed with planning, reasoning and common sense.

Thank you,
Gregory Sell,
AA, BS, MSgt AFR-DOD (R)
