In addition... what about the Rare minerals used to make the batteries, where is it coming from ??? CHINA???

How safe are the batteries???

I have heard the batteries if coagulation in fire ...Can NOT be put out!!! How is that safe for the public?

I oppose zero emissions standards for Delaware .

Our right to choose

Our business' going out of business

Not all can afford

Charging stations how can u put in enough??? Cost and effect

AGAIN...our choice matters!!!
