To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Dear Kyle Krall,

It is essential that Delaware has more Electric and hybrid plug in cars on our roads , and the sooner the better, to counter the pollution generated by gasoline powered cars, which contribute greatly to the climate catastrophes we are seeing more and more across the country. We need to combat the many lies that are being perpetuated to our fellow citizens , telling them Eva?s are unsafe. That is false. There are already many electric vehicles on the road, including buses, that safely transport people where they wish to go. Let?s work to make the state of Delaware a safer cleaner place for our children , bringing them cleaner air to breathe.

DNREC Staff,

I want to urge you to not listen to the opposition groups that are pouring thousands of dollars into Delaware to try and stop your progress on this vital front!

The clean cars program you are working on addresses the climate crisis by reducing greenhouse gas emissions. 70% of transportation greenhouse gas emissions come from passenger cars and trucks.

This shift also addresses the serious health impacts from smog and other tailpipe pollution like asthma, cardiovascular disease, impaired lung development in children, and preterm and low-birthweight infants, for all Delawareans but particularly disadvantaged communities. The ACCII also includes improvements in the air quality standards that protect our health.

Delaware drivers deserve to have access to these clean, money-saving, health protecting vehicles that are almost completely unavailable from Delaware dealers until we join this program.

Don't let the opposition's misrepresentations get in the way of this important opportunity.

The many benefits are compelling and I urge you to stay the course and pass this regulation.

Thank you for your consideration.

Sincerely,

Debbie Hegedus
