Subject: OPPOSE DNREC Electric Vehicle Mandate

I strongly oppose the electric vehicle mandate. The mandate will:

- increase the cost of buying a new or used vehicle
- disproportionately impact low-income families

Delaware already meets federal air quality standards and has the option of observing the less restrictive federal benchmarks rather than adopting the more problematic California protocols.

Delaware is NOT California, and we should NOT be following in their footsteps with the Clean Car II regulations.

We need to do what is best for Delawareans, and this mandate will only HURT the people of this state.

As a tax-payer, freeholder, and voter in Delaware - I OPPOSE these regulations!

Thank you,
Meghan Pflumm
