To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Dear Kyle Krall,

I am strongly in favor of reducing tailpipe pollution in Delaware. The future of transportation is clean vehicles without the use of fossil fuels. Why shouldn't Delaware be on the forefront of gaining all the advantages of clean vehicles as soon as possible? The most vulnerable in our state are suffering the most from preventable diseases and maladies. Asthma, COPD and other life-changing and life-shortening ills are preventable! Fossil fuels have to be phased out, must be phased out for us to have a planet that is habitable. Car makers need to see a developing market to research and build even better modes of transportation. Please institute the standards of ACC2.

DNREC Staff,

I want to urge you to not listen to the opposition groups that are pouring thousands of dollars into Delaware to try and stop your progress on this vital front!

The clean cars program you are working on addresses the climate crisis by reducing greenhouse gas emissions. 70% of transportation greenhouse gas emissions come from passenger cars and trucks.

This shift also addresses the serious health impacts from smog and other tailpipe pollution like asthma, cardiovascular disease, impaired lung development in children, and preterm and low-birthweight infants, for all Delawareans but particularly disadvantaged communities. The ACCII also includes improvements in the air quality standards that protect our health.

Delaware drivers deserve to have access to these clean, money-saving, health protecting vehicles that are almost completely unavailable from Delaware dealers until we join this program.

Don't let the opposition's misrepresentations get in the way of this important opportunity.

The many benefits are compelling and I urge you to stay the course and pass this regulation.

Thank you for your consideration.

Sincerely,

Roger Reinicker
