To: Krall, Kyle (DNREC) <Kyle.Krall@delaware.gov>

Dear Kyle Krall,

It is crucial that Delaware adopts ACC2 as soon as possible! We need clean air in Delaware! Our current level of air pollution is unacceptable and is having a terrible effect on the health and lives of our children, senior citizens and all of our citizens, especially many in low-income areas. It is key that we increase the supply of EVs and plug-in hybrids in Delaware to lower emissions. I want to buy an EV and I want to buy one in Delaware, and see my money benefiting my state! Transportation has a huge negative affect on our climate as a whole, and it's essential that our state plays a role in reducing these emissions for the sake of our planet. Our state needs to adopt ACC2 NOW!

DNREC Staff,

I want to urge you to not listen to the opposition groups that are pouring thousands of dollars into Delaware to try and stop your progress on this vital front!

The clean cars program you are working on addresses the climate crisis by reducing greenhouse gas emissions. 70% of transportation greenhouse gas emissions come from passenger cars and trucks.

This shift also addresses the serious health impacts from smog and other tailpipe pollution like asthma, cardiovascular disease, impaired lung development in children, and preterm and low-birthweight infants, for all Delawareans but particularly disadvantaged communities. The ACCII also includes improvements in the air quality standards that protect our health.

Delaware drivers deserve to have access to these clean, money-saving, health protecting vehicles that are almost completely unavailable from Delaware dealers until we join this program.

Don't let the opposition's misrepresentations get in the way of this important opportunity.

The many benefits are compelling and I urge you to stay the course and pass this regulation.

Thank you for your consideration.

Sincerely,

Nancy Wahler
