Subject: Electric Vehicle Mandate

I strongly oppose this electric vehicle mandate. We don't have the electrical grid to handle it for one thing. i don;t know who can afford to replace a battery in one of those things, let alone afford one of those elctric vehicles. I'm on Social Security and will never be able to afford one, nor do I want one. Another thing. This is Delaware, not California, So if you want what California is doing, THEN JUST MOVE THERE! No one he in there right mind wants that crap!
