Subject: I oppose the gas and diesel vehicle ban

The subject line says it all. I am a low income voter and oppose the ban on gas and diesel powered cars by 2035. EVs are not a viable option for low income households in our state. It is reckless, untenable, and unrealistic to force everyone to buy electric cars. The day the state forces me to buy an electric car is the day I move out of Delaware. If I chose to buy an electric vehicle, thats my choice. On the flipside my choice to buy a gas or diesel powered vehicle is also my choice. The day the state takes away my choice is the day I leave the state.
