**Subject:** Please make electric cars available in Delaware  
**Date:** Wednesday, March 1, 2023 7:42:54 PM

---

Dear Kyle Krall,

To Governor Carney and Secretary Garvin,

I am a retired family doctor with a continuing interest in health. I and many of my physician friends have realized in the past year that clean electric transportation will make Delawareans healthier, and will help with the global climate crisis. ACC2 will speed Delaware's transition to electric transportation and deserves our support. I personally believe that Delaware should implement ACC2 for the health benefits alone, to reduce one of our largest sources of air pollution and causes of asthma, heart disease, and lung cancer. But ACC also increases Delaware's benefits from electrification; ACC2 will grow sales of electric vehicles in-state at Delaware car dealerships, and attract earlier private investments in our electric infrastructure, taking some of the burden off public spending. Delaware languishes behind many other nearby states in health outcomes and economic opportunity.

DNREC Staff,

I want to urge you to not listen to the opposition groups that are pouring thousands of dollars into Delaware to try and stop your progress on this vital front!

The clean cars program you are working on addresses the climate crisis by reducing greenhouse gas emissions. 70% of transportation greenhouse gas emissions come from passenger cars and trucks.

This shift also addresses the serious health impacts from smog and other tailpipe pollution like asthma, cardiovascular disease, impaired lung development in children, and preterm and low-birthweight infants, for all Delawareans but particularly disadvantaged communities. The ACCII also includes improvements in the air quality standards that protect our health.

Delaware drivers deserve to have access to these clean, money-saving, health protecting vehicles that are almost completely unavailable from Delaware dealers until we join this program.

Don't let the opposition's misrepresentations get in the way of this important opportunity.

The many benefits are compelling and I urge you to stay the course and pass this regulation.

Thank you for your consideration.

Sincerely,

Anna Quisel
