Subject: I oppose the Delaware version of California New Car II restrictions

Shawn Garvin, DENREC

I am opposed to your support of the Delaware version of California New Car II Restrictions by reducing the sale of gasoline & diesel powered vehicles by 2035. The State or Federal Governments do not have the right to impose regulations of this type on the American Public. You should let the market place and consumer buying determine what will be bought or sold in our State of Delaware. We are not California nor are the people in Delaware like the California Residents. People and industries from California are leaving that State in droves due to high taxes driven by idiotic regulations imposed by their elected officials. I can only hope and pray our leaders will wake up and see the issues they have proposes/supported!
