Subject: Fw: DENREC'S Zero emissions Standard proposal

Dear Governor Carney,

This particular proposal is a falsehood of what is really happening here in the United States. First of all the "Global Warming" issue is a mute issue. Warming/Cooling cycles are prevalent throughout several millennia, what we are experiencing is simply a cyclitic event. The fact is that the batteries and chemicals required to manufacture them in fact only add a multitude of toxic emissions, far more dangerous to our climate/air quality than vehicle exhausts. You want to help the atmosphere? Then adapt a mass-transit electromagnetic monorail intercontinental transportation system not limited to inter-continental, but regional/municipal system which is solar/wind power,,,,,Now That would be most effective!!!! In addition it appears we, as Americans are being forced to kow-tow to countries like China, Russia, Brazil and most of South America that produce billions more tons of pollution than we do here in the U.S.

Respectfully,

Alan Desrosiers
