Subject: EV mandate

Sir,

The mandate for EV's by 2035 must not go through. Far too many people will be negatively impacted by this unfair legislation. EV's are unaffordable to many people, their range for long distance travel is limiting as the mileage vs. charge time increases any travel time. Infrastructure is nowhere near capable of handling EV only, and loss of revenue will occur without gas taxes. Many repair shops will go out of business, and many businesses will have to make major high dollar investments to keep up. Please think further about this unfair legislation.

Thank you,
Rich Martin
