Subject: DNREC Zero Emissions Mandate

Dear Governor Carney,

I oppose such Mandates and as I opposed all other mandates that violate our constitutional rights taking AWAY FREEDOM OF CHOICE FROM THE INDIVIDUAL!

I having nothing against alternative energy or electric vehicles however I do oppose government interference where markets forces should prevail. We need all energy until a new technology emerges through competition as it has in our past successes in this country as well in our state.

POINT: We are not California and I hope we never go in that tyrannical direction in regards to government ! I've been to California several times in my life and it is a beautiful state however not so much with their government today !

IMO it is unwise and unrealistic to set such a goal for everyone when the technology to implement such is not online nor sustainable ! This sounds more like a fantasy than reality so please reconsider the consequences of such a mandate from not just the economic perspective but the undue hardship it will create for all !

Respectfully Yours,

Michael J McAnally
